Where do I go?

Please pardon our appearance. We are under construction to make our hospital more modern and accessible. While we are excited about these improvements, we understand these changes may cause some temporary inconvenience to our patients and visitors.

The directions below will help you get to your destination quickly and safely while construction detours are in place.

Have questions or need special assistance? Call 484.476.2138 and one of our volunteers will be happy to help.
