

Dear Community Member:

We are delighted that you have expressed an interest in becoming a Main Line Health volunteer!

Volunteers are our most valuable asset performing a variety of non-medical services in both patient and non-patient departments. Main Line Health volunteers come from all walks of life in the surrounding community, but all share the common goal of assisting our professional staff in providing the excellent patient care for which our facilities are known. They also enable us to provide services for both the patients and the community that could not be provided otherwise.

Our volunteers are an integral part of the Main Line Health family, and an assignment and schedule will be worked out for you depending upon your interests, skills, time availability and the needs of the hospital. We prefer our volunteers commit to at least 3 months of weekly volunteer service, however any offer of service will be considered and valued.

In order to facilitate your application, please follow these guidelines:

1. Fill out the application and return it to the Department of Volunteer Services at your desired location.
2. For adults, please give the two reference forms to employers, co-workers or someone who would be willing to attest to your good character and work ethic. Please ask your references to return the forms to the Department of Volunteer Services at your desired location.

Once your application and both references are received and reviewed, the volunteer office will call you to schedule an appointment to discuss your interests and develop a placement.

We will look forward to meeting you and having you become a member of the MLH team!

FAQ

Frequently Asked Questions

QuantiferON - TB Gold in-Tube test (QFT)

Q: What is QuantiferON TB Gold in-Tube test?

A: QuantiferON - TB Gold in-Tube is an accurate, blood test that provides results showing if someone is either infected or not with the TB bacterium. QFT is unaffected by previous BCG vaccinations and most other environmental mycobacteria.

Q: Why is the QuantiferON test better than the TB skin test?

A: The results through QFT are shown to be more accurate at detecting a tuberculosis infection than a TB skin test. A traditional TB skin test requires multiple visits to complete. A TB skin test may also result in false positives due to cross-reactivity with the BCG vaccination or responses to environmental mycobacteria. These and other limitations have shown QFT to be the most effective and best alternative to TB skin testing.

Q: What are the benefits of the QuantiferON® - TB Gold in-Tube test?

A: Some of the benefits include:

- Requires only one visit
- Does not compromise previous test results
- Is a controlled laboratory test
- Is objective and not affected by interpretation
- Results can be available in as little as 72 hours

Q: Is the QuantiferON test approved by the CDC and FDA for TB testing?

A: Yes, both the U.S. Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC) have approved the use of the QuantiferON - TB Gold in-Tube test (QFT).

Q: Who at Main Line Health will be required to receive the QuantiferON test?

A: Currently, all new-hires of Main Line Health are receiving the QFT test, and Main Line Health will be transitioning all annual tuberculosis required employees and volunteers to the QFT test beginning July 1, 2012.

Q: I am a MLH employee who is currently required to complete an annual PPD Skin Test, will I need to complete the QuantiferON test?

A: Infection Control is currently working to redefine which employees at MLH will be required to complete an annual tuberculosis test. If it is determined that your position *will* require an annual tuberculosis test to be completed, you will be required to complete the QuantiferON test instead of the PPD Skin Test.

Q: I have a history of a past-positive PPD and normally complete an annual Positive PPD Questionnaire, will I be required to complete the QuantiferON test for medical surveillance?

A: Yes, you will be required to receive the QuantiferON test initially which will determine if you are a confirmed positive. If you are confirmed as a positive, you will be required to continue annual monitoring, regardless if your position is taken off the annual requirement list by Infection Control. If you are confirmed negative by the QFT test, the Infection Control guidelines will determine if you are required to complete an annual tuberculosis test.

Q: Where will the QuantiferON test be offered?

A: Currently, the QFT test is being offered at the Paoli and Lankenau Occupational Health offices. Other testing locations are as listed on the QFT instructions sheet.
