

Lankenau Medical Center
Main Line Health

*Our
future.
begins
now.*

welcome

As we complete the celebration of our 150th Anniversary, there is much more to look forward to. We are embarking upon our future as Lankenau Medical Center and continuing our campus transformation, which will culminate with the opening of our new Patient Pavilion, allowing us to realize our vision as a fully integrated world-class academic medical center.

Lankenau Medical Center
Main Line Health

I am proud and honored to join the ranks of great leaders of this incredible institution that serves so many of us so well. Lankenau was in amazing shape when I arrived – and my goal is to make it even better.

Join me as I take you on a tour of our present *and* future,

which features the largest renovation and building expansion in Lankenau's history. With some projects completed, and others underway, our campus transformation will touch you and your family in countless ways. Thank you for joining us as we unveil the new Lankenau in the coming pages.

The Philadelphia Inquirer
Lankenau to start sweeping expansion

Here at Lankenau, our priority is on integrating the finest in patient care, education and research. The result is the very best doctors and nurses providing you *world-class* care and the most advanced medicine in facilities that are convenient and comfortable for you and your family.

“ Lankenau’s Comprehensive Breast Center, opened in May 2010, not only demonstrates our commitment to **state-of-the-art coordinated care in a comfortable environment**, but further contributes to our research mission. ■ We are one of only 50 cancer centers in the U.S. to be part of the Community Clinical Oncology Program as designated by the National Cancer Institute. This program, among others, brings **the most current clinical trials to you** at Lankenau. ■ For over 80 years, the scientists of the Lankenau Institute for Medical Research (LIMR) have been **giving hope to those suffering with life-threatening illnesses**. Through research in cancer and cardiovascular disease, Lankenau has made a number of ground-breaking discoveries and tested new treatments. ■ To further our commitment to advanced medical education we opened the Simulation Center in our Walter and Leonore Annenberg Center for Medical Education. ■ This facility allows **mastery of skills away from the bedside** through the use of virtual learning devices. Advancements like these are what allow us to train current and future physicians and clinicians, taking the lead in defining the future of medicine. ”

the *most* advanced care

“ In order to respond to critical care situations, our Cardiothoracic Intensive Care Unit was completely transformed in September 2010. Of utmost importance in this project was to design the **safest and most healing patient environment**. Private rooms, triple the size of previous rooms, with natural light and space for family members speed recovery, while the latest bedside technology and cardiac monitoring equipment provides the best in care. ■ Renovations to our existing Cardiac Intervention and Electrophysiology Suites were completed in February 2011. These suites were designed for physicians to provide **the most advanced care to patients with complex cardiac issues**. ■ Our all-new Interventional Gastroenterology Suite includes the latest imaging systems available on the market. Lankenau is the single source in our region for the **most advanced and minimally invasive procedures in this field**. ■ And to make all **outpatient lab work and pre-admission testing a smoother process for you**, registration and testing services will be combined into one convenient space — the new Ambulatory Access Center. ”

“ Welcome to the future of Lankenau Medical Center, and the culmination of our campus transformation: The Patient Pavilion. A destination for cardiac care for decades, Lankenau is acclaimed for its clinical expertise and comprehensive services including general cardiology, interventional cardiology, electrophysiology and cardiovascular surgery.

■ Lankenau cardiologists have been true innovators and educators in the use of the latest surgical and non-surgical techniques — including off-pump beating heart bypass surgery and minimally-invasive robotic procedures — with the goal of reducing risk and improving outcomes for patients.

■ The new Patient Pavilion will link together all of the recent improvements made at Lankenau creating a fully complete destination in our region for extraordinary patient care, innovative research and advanced education. ■ This incredible new free-standing facility, planned for completion in 2013, will be dedicated to providing a superior experience — particularly for our cardiovascular patients. ■ At The Patient Pavilion, you will have access to our exceptional physicians and latest technology in one convenient location — from testing to procedures. ■ This means that our multidisciplinary team of specialists and staff can more quickly respond to your needs in the most seamless, coordinated way. And for inpatients, all rooms will be private and have been designed for maximum comfort and efficient care. Overall, our campus will be easier to reach. Nearly 1,500 new parking spots and restructured interior roadways will make getting to us more convenient. ”

a fully *complete* destination

the challenges and
opportunities ahead

“As we realize our vision for the future of Lankenau Medical Center, external forces like the economy, healthcare reform and an aging population are going to challenge us. In this industry, you have to reinvent yourself or be left behind. ■ The positive economic impact of our building project on this region is significant. Most notably: nearly 300 construction sector jobs with an associated payroll of approximately \$100 million were created for this project; \$37 million worth of materials were purchased within our region; and 90% of all project materials were made in the U.S. In addition, nearly 40 full-time, high-quality jobs will be created for physicians, nurses and ancillary staff. ■ I am confident that our Medical Center will excel because of the commitment of our caregivers, the dedication of our administration, and perhaps most of all, the participation of you, our community members who have given Lankenau so much of your time and treasure. ■ The Master Facility Project is made possible because Lankenau and Main Line Health — under Jack Lynch’s leadership — have been good stewards of our resources, which consist in part of transformational dollars provided by visionary philanthropists. Continued prudent management of Lankenau’s assets — in addition to the future philanthropic participation of our entire community — will make the culmination of Lankenau’s campus renaissance a reality. We commit ourselves to building our future, and look forward with excitement to the challenges and opportunities that lie ahead.”
