INVESTING IN OUR FUTURE

- Paoli Hospital is entering a new era in its ability to treat complex neurological diseases like stroke. A new Neurointerventional Program will advance neurological care and neurosurgical services across our region.
- Since up to two million brain cells die each minute once a stroke begins, time is crucial for a stroke patient. With this program, fewer patients will be transferred out of our community for stroke care and Paoli Hospital will be well-positioned to provide more complex cranial surgical procedures, save more lives, and help many stroke patients experience fuller recoveries.

PHILANTHROPY

Each year, Paoli Hospital receives thousands of charitable donations, both large and small, from the community. Many people give to the Annual Fund, or make special gifts to the Paoli Hospital Foundation and H. Phelps Potter Society and projects such as capital campaigns for new facilities and technology, or choose to make planned gifts, such as bequests in their will or a life-income gift to establish an endowment in an area of their interest. These gifts help to ensure that Paoli Hospital continues to provide the highest quality and most compassionate, human care possible.
