ABOUT PAOLI HOSPITAL

The Community

Paoli Hospital is a 231-bed community hospital located about 15 miles outside of Philadelphia, Pennsylvania. Paoli Hospital was founded in 1913 and has been a healthcare leader in Chester County Pennsylvania. Paoli Hospital is part of a larger health care system called Main Line Health. The Main Line Health System includes four acute care hospitals, Bryn Mawr, Lankenau, Paoli and Riddle, a physical rehabilitation hospital, Bryn Mawr Rehab Hospital, a drug and alcohol rehabilitation center, Mirmont Treatment Center, outpatient centers, home care services, physician practices, a research institute and a host of other facilities and services.

Paoli Hospital is recognized regionally and nationally for outstanding medical and surgical services, sophisticated technology and a personalized approach to medical and nursing care. Paoli has many specialized services including a Level II Trauma Center, Cancer Center (affiliated with Fox Chase Cancer Center) and a Neonatal ICU. There is a hospitalist group that provides care for a majority of medical patients.

Paoli Hospital has achieved The Joint Commission Gold Seal of Approval in the following services:
- Hip and Knee Replacement
- COPD
- Breast Cancer
- Sleep Medicine
- Cardiovascular Services

Most Recent Awards:
- Nurses Improving Care for Healthsystem Elders Designation (NICHE)
- 2016 Mission: Lifeline-Silver EMS for quality of care in STEMI patients
- American Nurses Credentialing Center Magnet Designation 2010-2015
- U.S. News and World Report Best Regional Hospital 2015-2016
- Best Hospitals for Common Care, 2015 U.S. News and World Report
- 2014, 2015 Guardian of Excellence Award from Press Ganey for Patient Experience in Inpatient Care
- The Joint Commission Top Performer, 2014 for heart attack, heart failure, pneumonia, stroke and surgical care
- The Joint Commission Gold Seal of Approval, 2013 for stroke care, hip and knee replacement, breast cancer care, sleep disorders and outpatient COPD
- Beacon Award-American Association of Critical-Care Nurses ICU-Gold, Progressive Care Unit-Silver
- Best Places to Work by Philadelphia Business Journal
- Excellence in Health Care Compliance Award (PA Department of Health, 2013)

TRANSPORTATION TO PAOLI HOSPITAL

Paoli Hospital
255 West Lancaster Avenue
Paoli, PA 19301

General Driving Directions

From the North

Take the Pennsylvania Turnpike (I-476 South to I-276 West) to the Valley Forge Interchange (Exit 326). One-quarter mile beyond the toll booths, take Route 202 South two miles and exit right on Route 252 South (Paoli Exit). At Route 30, turn right (West) and proceed one mile. The hospital will be on your right.

From the South

Take I-95 North to Route 322. Follow Route 322 to Route 202 North to the Route 29 (Great Valley/Malvern) Exit. Turn right and continue to Route 30 East (Lancaster Avenue). Turn left on Route 30, and continue traveling eastbound. The hospital will be on your left.

From the East

Take I-76 West to Route 202 (Exit 328, West Chester/Pottstown). Take Route 202 South to Route 252 South (Paoli Exit). Turn right onto Route 30 (West). The hospital will be on your right.

From the West

Take the Pennsylvania Turnpike East to the Valley Forge Interchange (Exit 326). One-quarter of a mile beyond the toll booths, take Route 202 South. Travel two miles on Route 202 to Route 252 South (Paoli Exit). Turn right onto Route 30 (West) and proceed one mile. The hospital will be on your right.

Public Transportation

To map your trip or to find out about possible delays, visit the SEPTA site.

From Center City Philadelphia and West to Paoli

By Train: From Philadelphia’s 30th Street Station, Suburban Station, or Market East Station, take SEPTA’s Regional Rail Paoli/Thorndale Line to Paoli. Paoli Station is located approximately one
mile east of Paoli Hospital on Lancaster Avenue (Route 30). Taxi service can be called from the station.

From the Airport

The SEPTA Regional Rail Airport Line runs from the Philadelphia International Airport to 30th Street Station, where you can take SEPTA's Regional Rail Paoli/Thorndale Line to Paoli.

Parking Locations

Parking

Parking at Paoli Hospital is complimentary. Please follow the signs as you enter the campus for our parking garage. Valet parking is available at the valet entrance. Handicapped persons will receive complimentary valet parking. There is a handicap lot adjacent to the valet entrance with numerous spaces as well as several handicap spaces that are located on the street level of the south garage.
GENERAL BACKGROUND

As part of Main Line Health System, Paoli Hospital is proud to offer a comprehensive, ASHP accredited Postgraduate year one (PGY-1) general pharmacy practice residency in an interdisciplinary setting. As a resident you will play a key role in the development and implementation of patient treatment plans in collaboration with a dedicated team of health care professionals. Additionally, you will play an integral part of Paoli’s mission to provide a superior patient experience. The Paoli Hospital residency program offers each resident the opportunity for instruction and mentoring pharmacy students, lending advice to medical staff, as well as, other health care providers within our institution. The residency program at Paoli Hospital offers residents the opportunity to customize their learning experiences to match with personal career goals.

PURPOSE STATEMENT

The PGY-1 general pharmacy practice residency program at Paoli Hospital will build upon the Doctor of Pharmacy (Pharm. D.) education and outcomes to contribute to the development of clinical pharmacists responsible for medication-related care of patients with a wide range of conditions, eligible for board certification, and eligible for postgraduate year two (PGY2) pharmacy residency training.
THE PHARMACY DEPARTMENT AT PAOLI HOSPITAL

The Paoli Hospital Pharmacy Department focuses on patient care services, educational opportunities and interprofessional research. The pharmacy team consists of 1 Pharmacy Director, 1 Clinical Coordinator, 1 General Medicine Clinical Pharmacist, 2 Emergency Department Pharmacists, 1 Infectious Disease Pharmacist, 20 Staff Pharmacists, 1 Inventory Control Coordinator, 1 Technician Supervisor and 20 Technicians. Throughout the year, various members of the pharmacy team mentor and precept undergraduate and graduate students from Philadelphia College of Pharmacy (PCPS), Jefferson College of Pharmacy, and Temple University School of Pharmacy.

The pharmacy is decentralized, consisting of satellites. The pharmacy at Paoli Hospital services all of the 231 inpatients, as well as a number of outpatients sites located at the hospital or off site:

- Ground Floor Pavilion Pharmacy located near the Emergency Room, staffed 24/7, including weekends and holidays, sterile product preparation and distribution of medications
- Ground Floor Main Building Pharmacy
- IV Room in Ground Floor Main Building Pharmacy, prepares bulk parenterals
- Employee Prescription Pick Up Area Ground Floor Main Building Pharmacy
- OR Satellite Pharmacy located on first floor Pavilion Building
- PYXIS Pharmacy located Third Floor Main Building
- Out-Patient Cancer Center located in Medical Office Building 3
- Out-Patient Cancer Center located in the Exton Mall- Main Line Health Center Exton Square and Collegeville
- Occupational Health located the Exton Square Mall
- Clinical Pharmacy Specialists (6)
  - Critical Care/Trauma
  - Internal Medicine
  - Emergency Medicine
  - Infectious Disease
  - Surgical Care
  - Hematology/Oncology

Each patient care area is equipped with automated dispensing cabinets (PYXIS), allowing ease of access to medications. Technological advancement has been noted with the use of ROBOT-Rx the world’s leading hospital pharmacy robotics system. Using barcode technology and interfaces with the pharmacy information system, the ROBOT-Rx automates 90% of our hospital’s unit-dose medications. The ROBOT-Rx is located at Lankenau Medical Center and fills recurrent unit dose medications in 24 hour increments for Paoli Hospital inpatients. To strive for continual patient safety, computerized prescriber order entry for electronic medication ordering is integrated with electronic health records and the pharmacy information systems. Bedside medication bar code scanning and “smart” infusion pump technology is utilized by nursing when administering medications. Pharmacists utilize integrated medication surveillance applications for medication and adverse event reporting, identification of medication-related problems and monitoring of drug therapies.
PAOLI HOSPITAL PGY1 REQUIRED COMPETANCY AREAS AND EDUCATIONAL GOALS:

Upon successful completion of the program’s curriculum and experiential training, the resident will demonstrate that he/she is competent and proficient in his/her ability to:

Competency Area R1: Patient Care

Goal R1.1: In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients, including those with multiple co-morbidities, high-risk medication regimens, and multiple medications following a consistent patient care process.

Goal R1.2: Ensure continuity of care during patient transitions between care settings.

Goal R1.3: Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.

Competency Area R2: Advancing Practice and Improving Patient Care

Goal R2.1: Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.

Goal R2.2: Demonstrate ability to evaluate and investigate practice, review data, and assimilate scientific evidence to improve patient care and/or the medication use system.

Competency Area R3: Leadership and Management

Goal R3.1: Demonstrate leadership skills

Goal R3.2: Demonstrate management skills.

Competency Area R4: Teaching, Education, Dissemination of Knowledge

Goal R4.1: Provide effective medication and practice-related education to patients, caregivers, health care professionals, students, and the public.

Goal R4.2: Effectively employs appropriate preceptors’ roles when engaged in teaching.
PGY1 RESIDENCY PROGRAM ROTATIONS

The Residency Program at Paoli Hospital begins on July 1st and finishes June 30th of the following calendar year. If July 1st falls on a weekend the residency will begin on the following Monday.

Each pharmacy resident will be scheduled to complete all required rotations and two elective rotations of their choice.

**Required Rotations (5 weeks each)**
- General Pharmacy Practice and Orientation (7 weeks)
- Internal Medicine
- Adult Critical Care/Trauma
- Infectious Disease
- Practice Management
- Emergency Medicine
- Cardiology

**Elective Rotations (4 weeks each)**
- Medication Safety
- Outpatient Hematology/Oncology
- Pharmacy Informatics
- Pain and Palliative Care
- General Pediatrics/NICU Alfred I Dupont Hospital for Children Nemours

**Required Longitudinal Experiences**
- Senior Oncology Program Ambulatory Care
- Drug Information
- Project Red: Readmission Prevention Initiative
- Pharmacy and Therapeutics Committee
- Nursing-Pharmacy Medication Safety Committee
- Pharmacy Services-Staffing*
- Pharmacy Residency Research Project

Pharmacy Services-Staffing Requirement*
Every other weekend, 1 summer and 1 winter holiday
APPLICATION PROCESS

All candidates for the PGY1 residency program at Paoli Hospital will participate in the ASHP Residency Matching Program.

The following materials must be submitted by the second Friday in January

- Letter of intent
- Current curriculum vitae
- Preference to applicants with hospital pharmacy experience
- College transcript(s)
- Three letters of recommendation

Preferred application process:
PhORCAS-Pharmacy Online Residency Centralized Applicant Service

OR

Mail materials to:
Al Celidonio, RPh
Paoli Hospital
Director of Pharmacy
Paoli Hospital PGY1 Pharmacy Practice Residency Director
Inpatient Pharmacy
255 West Lancaster Avenue
Paoli, PA 19301

- Completed application packets will be reviewed by members of the Residency Advisory Committee (RAC) to determine candidates that most closely match the Paoli Hospital program goals and opportunities
- Selected candidates will be invited to an onsite interview with members of the RAC
- Following the interview process, residency candidates will be ranked based upon the collaborative input from the RAC with regard the interviews and qualifications of the candidate
- A rank list will be submitted to the Residency Matching Program
CANDIDATE QUALIFICATIONS

All candidates must:

- Be highly motivated
- Strong desire to work as part of a collaborative team of health care professionals
- Have hospital pharmacy work experience
- Must have completed a program in pharmacy leading to a Doctor of Pharmacy degree from a pharmacy program accredited by the Accreditation Council for Pharmacy Education (ACPE)
- Be of good moral character.
- Be at least 21 years of age.
- Be a citizen of the United States
- Must be eligible for Pennsylvania State licensure, with all examinations for Pennsylvania State licensure successfully completed by September 30th of the residency year.

Licensure Verification:
The resident will provide the department a copy of their pharmacy licensure certificate to remain on file during the resident’s year at Paoli Hospital. Failure to obtain appropriate licensure within 90 days of starting the residency ie, employment (September 30th) will result in termination of employment. See associated policy on page 30.
PAOLI HOSPITAL RESIDENCY ADVISORY COMMITTEE

The Residency Advisory Committee (RAC) governs the residency program. The committee is comprised of Paoli Hospital Residency Preceptors and current residents. The Committee is chaired by the Residency Program Director and meets from 12pm to 1pm on the second Friday of each month to review and discuss the progress of the residents, as well as, provide preceptor development opportunities. The Preceptors meet during the first half of the meeting and the residents attend the second half of the meeting. Interactive feedback within the committee is utilized to direct the resident in his/her current and upcoming residency activities and to provide mentoring and guidance in the resident’s pharmacy practice. The committee will recommend modifications to the residents’ schedule as necessary. Each member of the RAC is expected to:

- Act as an advocate for the resident
- Provide expertise for the residency projects (when possible) or identify other appropriate resources
- Provide feedback and suggestions on improving current rotation sites, as well as identifying future potential rotation sites
- Provide feedback and suggestions on the current structure of the residency program, and offer possibilities for future direction and quality improvement
- Participate in opportunities for preceptor development
- Be involved in new resident recruitment process
- Participate in resident evaluation and ranking
- Take part in a quarterly review of resident progress

</table>
Successful completion of the Paoli Hospital PGY1 Residency Program requires the achievement of the required ASHP Residency Program Residency Learning System Outcomes, Goals and Objectives (outlined in detail at the beginning of the Residency Manual). Each resident is required to achieve an 80% or better, 20% satisfactory and no needs improvement on all required and selected elective residency goals by the end of the residency year. The resident’s progress towards achieving all RLS goals will be monitored and shared with RAC members at least quarterly by the Residency Program Director or Co-Director. At the midpoint of the program each resident is expected to be receiving 75% of evaluations with scores of 3-5’s and 25% 1-2’s. Residents will sign off during orientation that they have been made aware of stipulations to graduate.

The following are detailed descriptions of required activities:

1. Participation in Residency Orientation Program: Start of Residency
A formal orientation program for all residents is scheduled in late June/early July of each year. All new residents are expected to attend these sessions. This orientation period is to introduce the incoming residents to the Paoli Hospital Department of Pharmacy, the Paoli Hospital and the Main Line Health System; and to outline the expectations for the residency year.

2. Department of Pharmacy Practice-Service Component: July 1st – June 30th
   - Each resident is required to complete a pharmacy practice component of the residency program. Often referred to as "staffing," the service component of the residency is crucial to the development of professional practice and distribution skills so as to provide safe and effective pharmaceutical care.
   - The resident also will develop insight into the operations, policies and procedures of acute care facilities.

3. Rotations- Required and Elective: July 1st - June 30th
   - Each resident is responsible to complete a defined number of core clinical and management rotations as well as a determined number of elective rotations. Rotations will be evaluated using PharmAcademic.
   - It is the responsibility of the incoming preceptor to read over the rotation handoff from the prior rotation preceptor to try and target their rotation towards fulfilling resident learning needs and to hone in on any areas where the resident has excelled. On the first day of each rotation, the resident and preceptor will discuss the resident’s rotation goals so as to provide an opportunity for the preceptor to evaluate and if possible, to design specific activities to meet the resident’s goals. At the beginning of each rotation, the preceptor will provide the resident with the rotation goals and objectives, rotation activities and method of evaluation.
   - Residents are responsible for coordinating their evaluations with the rotation preceptor.
   - Rotation final evaluations should be scheduled during the last week of rotation and are to be completed no later than one week following the conclusion of the rotation.
• Elective rotations choices require approval 8 weeks in advance with the exception of the General Pediatrics/NICU Alfred I Dupont Hospital for Children which requires approval at the beginning of the residency in order to coordinate with the facility.

4. Residency Project: See Project Timeline (Appendix A)
• Each resident is responsible for the completion of residency project. The project may be in the form of original research, a problem-solving exercise, or development, enhancement or evaluation of some aspect of pharmacy operations or patient care services.
• As a component of the project, the resident will submit the project as a work in progress for poster presentation at the ASHP Midyear Meeting.

5. Participation in Resident Advisory Council (RAC) Meetings: Longitudinal
• Residents will attend the second half of scheduled RAC meetings to discuss upcoming resident events, other issues pertaining to the residency program, and actions/recommendations made at residency committee meetings, etc.
• Meetings will be scheduled by the Director of the Residency Program on the second Friday of each month from 12-1 pm.

6. Active Participation In and Completion of a Medication Use Evaluation: TBD
• Each resident is required to participate in a Medication Use Evaluation (MUE). Many of these MUEs will be conducted in support of patient care at the Paoli Hospital or Main Line Health in general.
• Satisfactory performance as determined by the Residency Program Director or his/her designee is required for successful completion of the program. The MUE will be fulfilled as part of the Pharmacy and Therapeutics Committee Rotation.

7. Active Participation In and Completion of a Formulary Drug Review: TBD
• Each resident is required to participate in a Formulary Drug Review/Drug Class Review/Drug Monograph.
• The drug monograph will be presented to Pharmacy and Therapeutics Committee as part of an addition or therapeutic change to the current Main Line Health Formulary.
• All necessary formulary paperwork will also be completed as part of the formulary review.
• Satisfactory performance as determined by the Residency Program Director or his/her designee is required for successful completion of the program. The formulary drug review will be fulfilled as part of the Pharmacy and Therapeutics Committee Rotation.

8. Active Participation in and Completion of a Quality Improvement (QI) / Medication Safety Project: TBD
• The objective of the Med Safety/ QI project is to provide residents with the opportunity to better understand the QI process and how it impacts the functioning of the pharmacy and patient care at Paoli Hospital.
• The resident will meet with the Nursing-Pharmacy Medication Safety Committee Rotation preceptor/s to develop the project. A more substantial QI project may also serve as the primary residency project. The goal would be 2 projects/resident.
10. Participation in Drug Information Services: Longitudinal
   • Each resident will participate in several venues to provide drug information, which include but are not limited to drug information questions, contributions to Pharmacy Newsletter, Pharmacy & Therapeutics Committee formulary reviews, Journal Club, staff in-services/education, Drug Information On-call services to medical staff, nursing and pharmacists.
   • The goal of these activities is to provide the resident with experience in the provision of pertinent drug information in a number of venues.

11. Participation in the Teaching Activities: TBD per student calendar
   • Resident involvement in the teaching activities fosters development and refinement of the resident's communication. In coordination with the University of the Sciences, Temple University School of Pharmacy, and Jefferson Pharmacy School the residents will serve as preceptors to students during their Introductory, Intermediate and Advanced Pharmacy Practice Experiences.
   • The residents will be responsible for developing the rotation goals and objectives for the students as well as coordinating all on-site activities and evaluations.
   • Additional teaching activities may be assigned at the discretion of the Clinical Pharmacy Supervisor.

12. Participation in Grand Rounds Medical Education and Schwartz Rounds: Fall to June of each year
   • Each resident will attend weekly Medicine Grand Rounds held on Wednesdays at noon in the Potter Room-topics TBA {short summary should be put in PharmAcademic as part of Nursing-Pharmacy Medication Safety Committee rotation}
   • Each resident will attend Oncology Conference/Tumor Board held every other Thursday at noon in the Potter Room-topics TBA.
   • Each resident will attend Schwartz Rounds schedule TBA on periodic Wednesdays at noon in the Potter Room-topics TBA. {short summary should be put in PharmAcademic as part of Nursing-Pharmacy Medication Safety Committee rotation}
   • Each resident will attend Cardiology Grand Rounds held on the third Tuesday of the month at noon in the Potter Room-topics TBA

13. Participation in Recruitment Efforts: Fall to March of each year
   • Each resident will assist with the new resident recruitment efforts of the department. This will occur as part of their Pharmacy Administration Rotation and their RAC requirements.
   • Because each resident is an important source of information and advice for potential candidates, there will be scheduled time within the interview process for interviewees to interact with current residents.
   • Additionally, each resident is required to spend time providing information to interested parties during the ASHP Midyear Clinical Meeting and the yearly Residency Showcase in Philadelphia, PA.

14. Attendance/Podium Presentation- Eastern States Residency Conference: May yearly
• The Eastern States Residency Conference is held in the spring of the year (generally in early May) and is a forum where residents share experiences and expertise.
• Each resident will present a platform presentation on his or her residency project, which will be evaluated by the Residency Director and/or coordinating preceptor. Residents will also be reviewed by their peers and other preceptors attending the program.
PAOLI HOSPITAL PGY1 RESIDENCY
OBLIGATIONS OF THE PROGRAM TO THE RESIDENT

The PGY-1 pharmacy practice residency at Paoli Hospital provides a 12 month advanced education and training experience for the Pharmacy Resident. The program is designed to provide the best possible environment to resident learning.

The program competency areas, goals and objectives are in line with ASHP Residency Learning system required goals. These goals will be taught and evaluated throughout the program to assure that each resident achieves the desired outcomes. Structured learning activities are in place in each rotation to assure that residents have multiple opportunities to achieve the desired outcomes.

Each resident will have a customized residency learning plan built upon identified areas of interest throughout the program. Flexibility has been built into the program to allow the resident to adapt to the program and preceptors will be reviewing each resident’s needs and areas of improvement to customize each rotation for the individual resident. The Residency Program Director or Residency Program Co-Director will assess the residents’ progress and update the resident’s customized training plans each quarter.

Each resident will be provided adequate opportunities to interact with their preceptors with teaching, modeling, facilitating and coaching direct patient care roles as well as other roles in the pharmacy department such as leadership, time management, professionalism, compassion and organization.

Each resident will be provided adequate feedback on their progress and encouragement throughout the residency.
PAOLI HOSPITAL PGY-1 RESIDENCY PRECEPTOR DEVELOPMENT PROGRAM

The Paoli Hospital residency program will provide activities, opportunities and resources for preceptor development and improvement:

- Facilitate informal preceptor development discussions at scheduled RAC meetings including journal article reviews, web based presentations, etc.
- Attendance at local, state and national programs bringing back information to share with other preceptors
- Encourage participation in training offered by affiliated colleges of pharmacy on preceptor development issues
- Support preceptors in pursuing scholarship activities in a variety of areas such as formal presentations, participating as a journal reviewer, writing and submitting publications and performing research
- Preceptors will be provided compensation to pursue board certification or specialized coursework in their area of expertise
- Preceptors will be provided travel expenses and compensation to attend conferences including ASHP midyear, Eastern States Conference and ASHP National Pharmacy Preceptors Conference
- Encourage preceptors who participate in conferences to offer their time to moderate and/or evaluate resident presentations

All preceptors are required to:

- Maintain ACPE accredited C.E. units sufficient to satisfy Pennsylvania State licensure.
- Attend RAC meetings regularly
- Actively seek out training for self-improvement in their precepting skills
- Document their preceptor development training on an annual basis
- Address any deficiencies in preceptor performance based on resident, Residency Program Director feedback and self-evaluation
- Keep up with current literature topics relevant to improving precepting, mentoring and teaching skills
- Complete a minimum of 3 credits each for preceptor development clinical core and preceptor development core activities based on the approved Preceptor Development Policy.
- Complete a Preceptor Needs Assessment/Gap Analysis yearly due by August 31st
Paoli Hospital PGY-1 Resident and Preceptor Evaluations

Guidelines for Performance Evaluations

An essential component of developing the skills of a resident and continuous improvement to the residency program is frequent two-way feedback between residents and preceptors. The goal of such discussion and interaction is to:

- Discuss the resident's achievements in terms of learning objectives established for the rotation
- Provide feedback that may assist the resident with future rotations or practice
- Provide feedback to the preceptors for continuous improvement of preceptor skills, that may strengthen mentoring during future rotations
- Provide feedback to the coordinator, in order to improve the residency program, and coordinator skills.

The preceptors, program director, and residents will frequently provide feedback to one another during individual rotations and in general throughout the residency program. Specific program and rotation feedback may be given via different formats depending upon the learning experience. This will include both oral and written feedback and evaluation. See specific rotations for evaluation strategies. Learning objectives and level of achievement may vary somewhat with each resident depending upon baseline previous experience and knowledge and personal interests.

Frequency of Evaluations:
The resident’s entering knowledge and skills will be assessed in relation to the program’s educational goals and objectives. This initial assessment will be documented into the resident’s customized development plan by the end of the orientation period and will be utilized to determine each resident’s learning experiences, learning activities, evaluations and overall plan for the program.

1. Rotation Summative Evaluations:
Due by the last day of the rotation period; this evaluation of the resident’s performances will document progress and attainment in meeting the educational goals and objectives assigned to each rotation. PharmAcademic will be utilized to complete all summative evaluations. The resident and preceptor(s) will review these evaluations together. For rotations with more than one preceptor, a primary preceptor will be designated who will collaborate with secondary/co-preceptors to provide one summative evaluation in PharmAcademic. In some rotations, co-preceptors may choose to complete their own summative evaluation of the resident and will complete only areas of the evaluation they were directly responsible for instruction.

To be completed by the Preceptor:
- End of Rotation Summative Evaluation
- Remember that this is not a grade, but rather it is an evaluation on whether the resident has achieved the residency educational goals and objectives for the residency program. Once the resident has a goal “Achieved for the Residency” that means the resident has fully accomplished the educational goal and no further instruction or evaluation is required. This is important to understand as it would be very difficult to achieve a residency required goals and
objectives after only completing a few weeks or month of the residency. Residents and preceptors should state in the comments-examples of how they a have met the or not met the objective and why they have achieved if that is going to be the evaluation of that objective. Please be candid and offer constructive feedback. This is for learning purposes. The RAC Members will vote on whether a Resident has achieved a goal for the Residency.

To be completed by the Resident:
- **Preceptor Evaluation**: The resident will complete this at the end of the rotation. If more that one preceptor is working with a resident on a rotation please give feedback on both preceptors. This is an area to comment for areas of strength and improvement. Please provide examples.

- **Evaluation of an Experience**: The resident will complete this at the end of the experience. This again is the time for feedback on what was good, ok, great etc about a rotation. This enables the preceptors to improve the rotation. Please provide examples.

To be completed by the Preceptor:
- **Rotation Hand-off**: The preceptor (s) will complete this at the end of 5-8 week block rotations. This is to be used by the next preceptor to determine any areas to focus on with the resident. The preceptor will provide valuable information for future preceptors on various skills, knowledge, projects, attendance, problem-solving, professionalism, communication, initiative and progress towards achieving individual and residency goals and objectives for the residency program.

- Please provide examples of for each area evaluated. If more than one preceptor is working with a resident then collaboration would be needed to complete this evaluation.

2. **Quarterly Summative Evaluations**: These are provided for longitudinal rotations and are performed in PharmAcademic and are utilized to provide an evaluation of the resident’s progress within the residency program. The quarterly evaluation will address progress towards the resident’s individual residency goals and objectives as well as the required and longitudinal activities of the program.

To be completed by the Resident:
- A quarterly self-assessment snapshot in PharmAcademic will be required on some rotations to be completed in PharmAcademic and is due one week before the end of each quarter. See section 4 below for more on self-assessments.

To be completed by the Preceptor
- Quarterly rotation specific evaluations are done the same as a summative evaluation. See page 22. See list of longitudinal rotations which require quarterly evaluations.

3. **Criteria Based Assessments**: Feedback and evaluations of selected activities will be conducted throughout the residency.

To be completed by the Preceptor
- These will include but are not limited to:
  - Formative (on-going) formerly known as “Snapshots” of resident progress on individual instructional objectives for each rotation. These are performed in PharmAcademic. Choose the resident and click on the “provide feedback to the resident button” You can use this to document
verbal feedback or choose to give written feedback. You will need to choose the option that describes your relationship to the resident.

- It can apply to Learner Goals and Objectives, Learning Experiences, Activities for Learning Experiences, Portfolio Evidence, or Not Applicable. Provide detailed examples of how the resident met the objectives in terms of specific activities. The preceptor should discuss these with the resident and make necessary adjustments to the rotation activities to assist in helping the resident learn.

- Formative feedback is a means for preceptors to tell residents how they are progressing and how they can improve. They should be frequent, immediate, specific (measurable-describe the observed behavior), accurate and constructive.

- Projects, case presentations, class reviews, journal clubs, DUEs, policy reviews, participation in rounds or meetings, meeting minutes, problem solving, communication strategies or any other assignments which offer an opportunity to provide feedback to the resident either verbally or in written format such as a written evaluation.

4. Self-Assessments:
These will be required as part of several of the longitudinal and block rotations and as part of the Resident’s Customized Training/Learning Plan. This will also comply with the residency objective R3.1.2

- The resident will be required to complete an “Entering Interests Form” at the start of the residency. Each quarter the resident will meet with the RPD or Designee to discuss progress towards attainment of the resident’s personal career goals, goals of the residency, strengths and weaknesses and areas of interest. Since this is completed at the start of the residency, its intent is to allow the resident to determine self progress and to assist them in determining their attainment of their own goals both professionally and personally. This should be done in PharmAcademic initially by the resident and then the RPD or Designee will meet the resident in person to complete quarterly as part of the resident’s customized training/learning plan.

- A resident quarterly self-assessment (snapshot) will be incorporated into some of the longitudinal rotations. The self-assessment will provide the preceptor with information to base quarterly summative evaluations on progress towards achievement of educational goals and objectives. It will assist in providing the preceptor with a means to modify activities to offer learning opportunities to help residents get the most out of these longitudinal rotations. These will be due one week prior to the end of the quarter.

- A notes function or resident self-assessment will be generated in PharmAcademic for some of the block rotations. These will offer the resident an opportunity to keep track of activities they are participating in as a means of self reflection and documentation of their hard work. Preceptors will be able to view these in PharmAcademic and are not evaluable, merely informational purpose only and are created by preceptors to hone in on specific areas of the rotation they want the resident to self-reflect or gain more opportunities.

PharmAcademic link:
https://www.pharmacademic.com/Login.aspx
Contact for assistance: Andrea Weeks 484.565.1144, if need further resolution: Scott McCreadie PharmD, MBA (staff) email: support@mccreadiegroup.com
**Evaluation Scales**

Summative Scale to be used for all learning experiences by preceptors and pharmacy residents when performing summative evaluations.

1-5 Point Rating Scale:

- **1=** Resident is not competent in this area. Multiple deficits exist, extensive intervention needed, preceptor may need to complete task(s), unable to work independently. (i.e. Needs Improvement)
  - Ex: Quality of product, work skills and professionalism requires much improvement, requires considerable assistance to achieve competency, may need to repeat assignments

- **2=** Resident is not fully competent in this area. Below expected, marginal, limited deficiencies, needs consistent preceptor intervention, unable to work independently (i.e. Minimally Acceptable, Needs Improvement)

- **3=** Resident is competent in this area. No deficiencies, progressing satisfactorily, good, expected level, requires only occasional intervention. (i.e. Meets Standards, Satisfactory Progress)

- **4=** Resident excels in this area. No deficiencies, fulfilling objectives, fully competent, works independently. (i.e. Exceeds Standards, Achieved)
  - Ex: Demonstrates independent competency, superior work skills, and high level of professionalism.

- **5=** Resident excels in this area. No deficiencies, surpasses expectations and objectives, exceptional, works independently. Resident brings new insight into clinical situations based on experience and/or critical evaluation of the literature. (i.e. Outstanding, Achieved)

- **Achieved for the Residency=** Demonstrates independent competency, superior work skills, and high level of professionalism on an expert, mastery level on a consistent basis.

PAOLI HOSPITAL PGY1 PHARMACY RESIDENCY

General Information:

Salary:
The residents will receive a stipend of $48,000.

Benefits:
- 10 vacation days during 52 week period (excluding weekends) / sick time
- Health Benefits including Medical, Dental, Vision, and Life Insurance
- 403B Tax Shelter Annuity with Employer Match
- Travel and accommodations for ASHP Midyear Conference and the Eastern States Conference
- ACLS Certification

Staffing:
Each resident will be scheduled to work every other weekend during the residency as part of the longitudinal rotation Pharmacy Services/Staffing—beginning in August around the time of licensure and ending June 30th of the following calendar year.

Residency Academic Year
The Residency Program at Paoli Hospital begins on July 1st and finishes June 30th of the following calendar year. If July 1st falls on a weekend the residency will begin on the following Monday.

Holiday Staffing Requirements:
Each resident will be required to work a one winter and one summer holiday which will be in addition to the every other weekend staffing requirement. These include: July 4th, Labor Day, Thanksgiving Day, Christmas Day, New Year’s Day, and Memorial Day. Residents are entitled to time off on legal holidays unless scheduled to staff.

Additional Staffing Hours:
Additional staffing hours beyond the required every other weekend shifts are permissible, but may not occur during the weekday dayshift operating hours as they would correspond the assigned resident learning experience activities. Any additional shifts chosen to be picked up by the resident need to occur on second shift or on weekends and should have at least 10.5 hours between the end of the shift and the next scheduled residency learning experience start time. For example: the resident puts in a staffing shift from 2 pm to 10 pm. The earliest they can come in the next day is 8:30 am. Residents should be mindful of their residency learning experience expected hours on site and should choose staffing shifts which do not interfere with rotation requirements, as in the example above. If the resident was expected to be on site for a rotation that begins with rounds at 8 am they would only be able to work until 9:30 PM at the latest the night prior.
Moonlighting:
As a Paoli Hospital Pharmacy Practice Resident you are a paid-employee of Main Line Health System. Resident obligations as part of their employment and job descriptions are crucial to successfully completing the residency. Residents who choose to work outside of either staffing for any of the Main Line Health Hospitals or their daily residency obligations will need to clear this employment with the RAC including the Residency Director. The RAC members may ask to review the outside employment contract or job description and hours of employment before making a decision. Patient-care rotations, teaching, and service requirements take precedence over scheduling for external employment and thus, the residency program is considered the primary priority of each resident.

Residents should not swipe their badges in the Kronos timekeeping machines. Any additional shifts worked by the resident need to be emailed to Al Celidonio (Residency Program Director) with the date, time in and out.

Maximum Hours of Work per Week and Duty-Free Times:
Duty hours include all scheduled clinical and academic activities related to the pharmacy residency program as well as all additional staffing hours and moonlighting hours. These hours are limited to a maximum of 80 hours per week averaged over a four-week period.

Residents must have a minimum of one day in seven days free of duty when averaged over four weeks. For example, from January 1st to January 28th, residents must have at least 4 days off free of duty hours during that time period although there may be periods where the resident may have worked seven days in a row.

For more information visit http://www.ashp.org/DocLibrary/Accreditation/Regulations-Standards/Duty-Hours.aspx

Sick Days:
Sick time is accrued and requires notification as soon as possible to the current preceptor for sick days during rotations or Al Celidonio, Director of Pharmacy, for scheduled staffing assignments. If the resident is sick beyond 3 days and is unable to fulfill residency obligations a physician note will be required. Rotation assignments will also be made up at the discretion of the preceptor(s).

Personal days/Vacation Time:
Residents are provided a total of 10 personal/vacation days. These cannot be used during assigned staffing weekend shifts or in place of assigned holidays. Residents will need to utilize these days in order to attend job interviews, exams, conferences etc. Advance notification and approval with Al Celidonio, (Residency Program Director) is required before taking a personal or vacation day.

Bereavement Days:
All residents are entitled to receive time off with pay for a period of up to three days if a death occurs within the immediate family. Immediate family is considered a spouse, parent, brother, sister, or child.
Residents are entitled to one day of absence with pay if there is a loss of grandparent, grandchild, or parent-in-law. For additional days off the resident will be required to use personal days. The resident would need approval from Al Celidonio (Residency Program Director).

**Call outs:**
The resident is responsible to attempt to work assigned staffing shifts. If the resident is not able to make it into work for staffing shift they are to call Al Celidonio to find coverage. For residency rotations the resident is expected to be fully present on site, times may vary at the discretion of the preceptor(s) and the actual rotation requirements. If the resident is unable to make it in for a scheduled meeting or rotation they are expected to call their preceptor(s) in advance or to send an email. Weather related call-outs need to be cleared with Al Celidonio (Residency Program Director).

**Leave of Absence/Medical Leave**
Any leave of absence including medical leaves will need approval from Al Celidonio (Residency Program Director). All requests for leave must be submitted in writing to the Residency Program Director. If the leave of absence results in the inability of the resident to complete the required residency goals and objectives, the RAC members will put together an action plan. The action plan will require the resident to make up missed time and all rotation requirements. In some cases depending upon the length of the leave of absence this may extend the residency year beyond June 30th of the residency academic year.
PAOLI HOSPITAL PGY1 PHARMACY RESIDENCY
Expectations and Responsibilities of Residents

Professional Practice:

Professional Conduct:
It is the responsibility and expectation of all Residents participating in the Paoli Hospital Residency to maintain the highest degree of professional conduct at all times. The resident will display an attitude of professionalism in all aspects of his/her daily practice.

Professional Dress:
All residents are expected to dress in an appropriate professional manner whenever they are within the hospital or participating in or attending any function as a representative of Paoli Hospital or Main Line Health System. It is the expectation that the resident will wear a clean, pressed white lab coat at all times in patient care areas.

Employee Badges:
Paoli Hospital requires all personnel (including residents) to wear his/her badge at all times when they are within the hospital. Badges will be obtained from the Paoli Hospital Security office located in the Emergency Room during Orientation. If the employee badge is lost the resident must report the loss immediately to Security, and render a fee for replacement.

Communication:
The resident is responsible for promoting good communication between the pharmacists, patients, physicians, and other health care professionals. The resident shall abide by the Paoli Hospital policies regarding the use of hospital and cellular phone within the hospital and in patient care areas.

As part of communication, constructive criticism and feedback will be provided to residents in a professional manner and is meant as a form of learning and is not meant to embarrass. Any conflicts which may arise between the resident and a preceptor should first be handled by face to face discussion. If the resident or preceptor has a disagreement or concern and the situation cannot be handled together the next step would be to contact the Residency Program Director. Both the resident and the preceptor should send an email together to the Residency Program Director requesting an appointment to speak together to discuss each point of view to come to a resolution.

Patient Confidentiality:
Patient confidentiality will be strictly maintained by all residents. Time for completion of HIPPA training will be scheduled during the pharmacy practice rotation training. It is the expectation that residents will not discuss patient-specific information with other patients, family members or other person not directly involved in the care of the patient. Similarly, residents will not discuss patients in
Residents will not leave confidential documents (profiles, charts, prescriptions, etc.) in public places. Residents should understand that inappropriate conduct (e.g., breach of confidentiality) may result in disciplinary action.

Attendance:
Residents are expected to attend all functions as required by the Residency Advisory Committee, the Residency Program Director and rotation preceptors. The residents are solely responsible for meeting the obligations of their assigned service commitments (staffing). Specific hours of attendance will be delineated by each preceptor in accordance to the individual rotation requirements. Successful completion of the residency program is directly related to fulfilling all the program’s requirements, which determine the primary schedule of the resident. It must be understood that the responsibilities of the resident may not correspond to a consistent day to day schedule and at times, extra hours of overage may be necessary to complete residency requirements.

Licensure:
In order to achieve the required goals and objectives for the Pharmacy Practice Residency Program and for the resident to gain the full value of residency training, residents are expected to be fully licensed to practice Pharmacy in the State of Pennsylvania by September 30th. This complies with 90 days from the start of the residency and their employment with Paoli Hospital/Main Line Heath. Residents are encouraged to be licensed before their first weekend of staffing. Any resident who fails to obtain appropriate pharmacist licensure by September 30th of the residency year will be subject to termination of employment.

Resident Disciplinary Action:
Residents are expected to conduct themselves in a professional manner at all times and to follow all relevant departmental and hospital policies and procedures.

Disciplinary Action Will Be Initiated if a Resident:
- Does not follow policies and procedures of Paoli Hospital Pharmacy Services, or Residency Program
- Does not present him/herself in a professional manner
- Does not make satisfactory progress on any of the residency goals or objectives
- Does not make adequate progress towards the completion of residency requirements (e.g. residency project, rotation requirements, longitudinal activities service requirements, etc.)

Disciplinary Action Policy and Procedure:
In the event of the identification of need for disciplinary action of a resident or if a resident fails to make satisfactory advancement in any aspect of the residency program, the following disciplinary steps shall be taken:

1. The Resident will meet with the Residency Program Director (RPD) and/or involved preceptor to discuss the identified issue(s). If the RPD is not involved in the initial discussion, he will be notified of the meeting and of the events that transpired. Action steps that will follow include:
[in conjunction with the resident], an appropriate solution to rectify the behavior, deficiency or action will be determined. A corrective action plan and specific goals for monitoring progress must be determined and outlined. These suggestions will be documented in the resident’s personnel file by the RPD. Corrective actions will be in progress before the next scheduled quarterly evaluation.

2. The resident will be given a **second warning** if the resident has not improved within the determined time period set forth by the RPD.

3. If the preceptor/RPD determines that the resident may not complete the residency program in the designated time frame, a plan to adequately complete the requirements shall be worked on by the member of RAC and presented and reviewed with the resident. The action plan will be clear in its recommendations for completing the desired residency requirements and the desired time frame for completion. The resident will have up to 18 months from July 1 of the calendar year from the start of their residency to complete the residency. Action plans may include remedial work or termination.

4. When and if dismissal is recommended by the Residency Program Director, a meeting with the resident to discuss the final decision will occur.

**Completion of Program Requirements:**

- Each resident will receive a copy of the Paoli Hospital PGY1 Residency Manual at orientation and will be expected to review its contents and be aware of graduation requirements.
- Each resident is required to achieve an 80% or better, 20% satisfactory and no needs improvement on all required and selected elective residency goals by the end of the residency year.
- Each resident must complete at least one MUE, one drug monograph for P and T, one newsletter article, one staff in-service, and 2 Nursing Pharmacy Medication Safety Committee Projects.
- Each resident must complete all required evaluations in PharmAcademic.
- Each resident is required to fulfill their staffing requirements.
- Each resident will have up to 18 months from July 1 of the calendar year from the start of their residency to complete the residency.
- Each resident is responsible for the completion of a residency project including a poster for ASHP midyear (which can be submitted as a work in progress) and an Eastern States Residency Platform Presentation.
- Each resident will hand in a summary of their Residency Project in manuscript style.

Upon successful completion of all requirements of the residency program, the resident will be awarded a certificate of completion. This certificate will attest that the resident has achieved competencies consistent with and in accordance with accreditation standards as set forth by ASHP and/or other accrediting bodies.
ROTATIONS

Required Rotations

Paoli Hospital Pharmacy
General Pharmacy Practice and Orientation Rotation Learning Experience

Preceptor(s): Liz Ferrigno, RPh
Pavilion Pharmacy - Located in the ER Wing
255 West Lancaster Avenue • Paoli, PA, 19301
484.565.2550 (phone) • 484.565.2560 (fax)
ferrignol@mlhs.org

Steve Breslin, PharmD
OR Pharmacy - Located in 1st Floor Pavilion Bldg.

breslins@mlhs.org

1) General Description
Pharmacy Practice and Orientation is a required 7 week rotation beginning the date of hire. This rotation will allow for the resident to become familiar not only with the layout of Paoli, but also with the staff, each satellite’s intricacies, and the pharmacy system. During this rotation, the resident will observe and participate in technician responsibilities, such as IV admixture, medication filling/delivery, restocking Pyxis process, ordering, pre-packing unit dose medications, and compounding. The resident will also observe and participate in pharmacist duties, as this will encompass the majority of their responsibilities. These include, but not limited to, learning policy/procedures of MLH, Siemens Pharmacy system, non-formulary drug reviews, therapeutic substitutions, daily reports and chemotherapy. Also, included during this time is 2-day MLH Orientation as well MLH Culture of Safety Training. Good communication and interpersonal skills are vital to success in this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

2) Goals and Objectives
During the learning experience the resident will focus on the goals and objectives outlined below by performing activities that are associated with each objective. Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to this learning experience.

3) Activities

<table>

<table>
<thead>
<tr>
<th>Goal R1.1:</th>
<th><strong>In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients...following a consistent patient care process.</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R1.1.1 (Applying)</td>
<td>Interact effectively with health care teams to manage patients’ medication therapy.</td>
</tr>
<tr>
<td>2.</td>
<td>Demonstrates in daily practice understanding of the importance of contacting appropriate parties when a problem is identified.</td>
</tr>
<tr>
<td>OBJ R1.1.2 (Applying)</td>
<td>Interact effectively with patients, family members and caregivers.</td>
</tr>
<tr>
<td>1.</td>
<td>Provide information or modifications to the therapeutic plan to the patient or members of the health care team.</td>
</tr>
<tr>
<td>2.</td>
<td>Interacts respectfully and collaboratively.</td>
</tr>
<tr>
<td>OBJ R1.1.3 (Applying)</td>
<td>Collect information on which to base safe and effective medication therapy.</td>
</tr>
<tr>
<td>1.</td>
<td>Demonstrate the ability to use the Internet and Intranet (department policies and procedures, SDS resource, drug info resources), Siemens Pharmacy, Smart Chart. Understand the type of data collected, transmitted and stored by each information system.</td>
</tr>
<tr>
<td>2.</td>
<td>Access various technology databases within the department (automated dispensing cabinet, carousel, robot, medical record) and understands the limitations of information in health records and which sources of information are the most reliable (electronic, face to face).</td>
</tr>
<tr>
<td>4.</td>
<td>Follow all security and HIPAA privacy regulations when using information technology.</td>
</tr>
<tr>
<td>OBJ R1.1.4 (Analyzing)</td>
<td>Analyze and assess information on which to base safe and effective medication therapy.</td>
</tr>
<tr>
<td>1.</td>
<td>Demonstrates ability to identify medication therapy problems, including: therapeutic duplications, adverse drug events or potential for such events, clinically significant drug-drug, drug-disease interactions or potential for interactions.</td>
</tr>
<tr>
<td>2.</td>
<td>Demonstrates ability to evaluate laboratory values and make modifications to therapy according to hospital policy (Renal dose adjustment policy.)</td>
</tr>
<tr>
<td>OBJ R1.1.7 (Applying)</td>
<td>Document direct patient care activities appropriately in the medical record or where appropriate.</td>
</tr>
<tr>
<td>1.</td>
<td>Selects appropriate direct patient-care activities for documentation.</td>
</tr>
<tr>
<td>2.</td>
<td>Demonstrates ability to document interventions and understands the significance of documentation and all</td>
</tr>
</tbody>
</table>
relevant criteria involved in documentation.
3. Follows the hospital’s policies and procedures for documentation, written and electronic. All entries are signed, dated, timed, legible, and concise.
4. Utilizes safety surveillance tool (Sentri-7) and documents IV to PO conversions and Vitamin K interventions appropriately.

<table>
<thead>
<tr>
<th>Goal R1.3</th>
<th><strong>Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.</strong></th>
</tr>
</thead>
<tbody>
<tr>

</thead>
<tbody>
<tr>
<td><strong>OBJ R3.1.2</strong></td>
<td>(Applying) Apply a process of on-going self-evaluation and personal performance improvement.</td>
</tr>
<tr>
<td></td>
<td>1. Complete 4-two week self-evaluations as part of the Pharmacist Orientation Checklist.</td>
</tr>
<tr>
<td></td>
<td>2. Address with preceptor weaknesses and develop plan for personal performance improvement.</td>
</tr>
<tr>
<td></td>
<td>3. Seeks counsel of others (e.g. mentor, preceptor, employee assistance program) if needed.</td>
</tr>
<tr>
<td></td>
<td>4. Explains the relationship between operational tasks and clinical activities and is able to perform tasks related to both.</td>
</tr>
<tr>
<td><strong>OBJ R3.2.4</strong></td>
<td>(Applying) Manage one’s own practice effectively.</td>
</tr>
<tr>
<td></td>
<td>1. Accurately assesses successes and areas for improvement in managing one’s own practice. (Pharmacist Orientation Checklist self-assessment)</td>
</tr>
</tbody>
</table>
2. Routinely seeks applicable new learning opportunities when performance does not meet expectations.
3. Demonstrates pride in, and commitment to, the profession through appearance, personal conduct, planning to pursue board certification and pharmacy association activities.
4. Demonstrates personal commitment to and adheres to organizational and departmental policies and procedures. (Red Rules and MLH Safety Behaviors)

4) **Preceptor Interaction**
   Daily: 0800–1630, May vary based on activities of the day.
   Day 1: Preceptor to review learning activities and expectations with the resident.
   Each week the resident will perform various activities outlined on a checklist with direct supervision and guidance by their preceptor or mentors. Progression towards achieving the necessary skills required to become a competent staff pharmacist will also depend upon the resident’s previous skill set/knowledge upon entering the residency. Preceptors will assess incoming knowledge and tailor the activities based on resident performance. Preceptors and residents will have open communication to discuss progress and offer added opportunities to aid in the learning process. (See evaluation strategy for more information)

*(The length of the time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and where the rotation occurs in the residency program)*

5) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Rotation Notes/Resident Self-Assessments: these will be used to document in PharmAcademic the weekly activities completed by the resident along with their self-reflection of the learning experience and their own performance
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.
- Formative assessments (see below) will be ongoing, constructive, focus on activities and be measurable in order to strengthen the resident’s skills regarding their role in preparing, dispensing and managing safe and effective drug therapy for patients.

Formative evaluations will be performed by verbal feedback and criteria-based performance on assigned tasks listed on the Pharmacy Department Weekly Checklist for Pharmacist Orientation and the Computer Skills Assessment. The Pharmacy Department Weekly checklist will serve as a guide for the resident to familiarize themselves with the health system, pharmacy department including administrative, policies, procedures, manuals and safety. The checklist serves as a tool to assist in training the resident in all aspects of dispensing medications throughout the hospital including specialized departments such as preparing chemotherapy, neonatal and cath lab medications. The tool will be used initially at baseline for the preceptor to determine the knowledge level of the resident in the various dispensing areas and then to tailor the teaching to the needs of the resident. Every 2 weeks the resident will do a self-assessment using the items listed in V through VII on the checklist. Any areas the resident feels they need reinforcement, the preceptor will provide more instruction. Another formative tool utilized by the preceptor will be the Computer Skills Assessment. This will be used as an ongoing instrument to assist in knowledge recall as the resident will be required to complete assessment question(s) after exposure to these computer based skills are taught or as they come up in day to day practice. This will give both the resident and preceptor the ability to go back and reteach where there is a deficiency.
Internal Medicine Rotation Learning Experience

Preceptor: Kelly Butler, Pharm.D., Clinical Pharmacist
Designated Rotations: Internal Medicine, Project Red
Office: Ground Floor Pharmacy – Main Building
        255 W. Lancaster Ave • Paoli, PA 19301
        484-565-1192 (phone) • 484-565-4997 (fax)
        butlerk@mlhs.org
Preceptor Office Hours: 7am – 3:30pm (M-F)

1) General Description
The Internal Medicine rotation is a 5 week required rotation in the PGY1-pharmacy residency program. This rotation will give the resident a basic understanding of disease states encountered in adult internal medicine. This rotation will stress the application of therapeutics in patient care and require the resident to develop skills in proper drug therapy selection, patient monitoring, pharmacokinetics, patient education, drug administration and delivery of pharmaceutical care to hospitalized patients.

Core Content which will be covered via patient experiences; discussion of reading materials; and/or case presentations.

Good communication and interpersonal skills are vital to success in this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

2) Disease States
During this Internal Medicine rotation, the resident will round on the telemetry floor, medical/surgical floor, and the orthopedic floor. Common disease states in which the resident will be expected to gain proficiency through literature review, topic discussion and/or direct patient care experience include but are not limited to:
- Cardiovascular topics: Heart Failure, Stroke, Acute Myocardial Infarction, Atrial Fibrillation
- General Medical/Surgical topics: Common Infectious Diseases (Community Acquired Pneumonia, Hospital Acquired Pneumonia, Skin and Soft tissue infections, urinary tract infections, bacteremia), Chronic/Acute Renal Failure, COPD, Thromboembolic Disease, Diverticulitis, Ulcerative Colitis
- Orthopedic topics: Surgical Care Improvement Project (SCIP); DVT/VTE Prophylaxis; Acute Pain Management, Post-op nausea and vomiting

3) Interdisciplinary Rounding
Interdisciplinary rounds for Internal Medicine rotation include:
- 3A (Telemetry) – Tuesdays 10:30-11:30 lead by Patient Care Facilitators (PCFs) – Lisa Springer, MSN and Joyce Kish, MSN
- 4A (Ortho) – Wednesdays 7:40am with Dr. Garino; Thursdays 7:30am with Dr. Mazur
- 4B (Med/Surg) – Wednesdays 10:00-11:00 lead by PCFs – Melissa Winters, RN and Deb Tagland, NP
- 4A (Trauma) – Fridays 11am – lead by Trauma PA

4) Activities
• Daily activities include: patient profile review and identification of and resolution of any medication related issues (i.e. IV to PO, duplicate therapy, home med reconciliation, etc.), laboratory data monitoring for appropriated dosing of drug therapy (i.e. renal dosing, antimicrobial cultures and sensitivities), and evaluation of medication regimens for appropriateness. Counsel any Project Red patients consulted.
• Documentation of Interventions – document all interventions through Sentri7 and PharmAcademic
• Project Red (longitudinal experience) – counseling patients on their medications to prevent re-admissions in CHF, AMI and Pneumonia
• Topic Discussions (with a patient case) – weekly on Fridays at 2pm.
• Discussions of other pertinent literature or readings at the discretion of the preceptor throughout the week.
• RN In-service – 1 per rotation completed during 2nd half of rotation
• ADR reporting – utilize on-line reporting system (STARS) to document any ADRs. Assist preceptor in quarterly summary of ADRs for MLH system. *Fulfills objective R2.1.4 from the Pharmacy and Therapeutics Rotation and will be evaluated as part of that rotation*

5) **Preceptor Interaction**
• Pre-rounds – 30 minutes prior to rounds
• Post-rounds – 30 minutes after rounds to discuss follow-ups
• Monday, Thursday, Friday (non-round days) – 2pm to discuss review of patients and interventions for the day
• Fridays 2pm – Topic Discussion
• Additional meetings as needed

6) **Expected Progression**
• Day One – 8am - Orientation to Rotation; meet with preceptor to review learning activities and expectations
  • Week 1
    o Complete all daily activities as described above on patient care units assigned and document all interventions
    o Attend rounds with preceptor; observe pharmacist’s role in interdisciplinary rounds.
    o Discussion with Preceptor on Surgical Care Improvement Project (SCIP) and DVT/PE prophylaxis post orthopedic surgery
    o Topic Discussion/Patient Case
  • Week 2
    o Complete all daily activities as described above on patient care units assigned and document all interventions
    o Attend and participate in rounds with preceptor (resident 25%, preceptor 75%)
    o Topic Discussion/Patient Case

  • Week 3
Complete all daily activities as described above on patient care units assigned and document all interventions
- Attend and participate in rounds with preceptor (resident 50%, preceptor 50%)
- Begin discussing and select topic for RN In-service
- Topic Discussion/Patient Case

- **Week 4**
  - Complete all daily activities as described above on patient care units assigned and document all interventions
  - Attend and participate in rounds with preceptor (resident 75%, preceptor 25%)
  - Finalize topic for RN in-service. Submit draft to preceptor.
  - Topic Discussion/Patient Case

- **Week 5**
  - Complete all daily activities as described above on patient care units assigned and document all interventions
  - Attend and participate in rounds with preceptor (resident 100%, preceptor observe)
  - Complete RN In-service
  - Topic Discussion/Patient Case

### 7) Evaluation Strategy
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation. The resident and the preceptor will meet to discuss the evaluations. The discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- **Formative assessments:** The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- **Summative evaluations:** This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- **Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.**

<td>Complete one nursing in-service on assigned floors and include handout. Writes in a manner that is easily understandable and free of errors; uses tables and graphs to enhance audience understanding; demonstrates understanding of topic.</td>
</tr>
</tbody>
</table>
During the learning experience the resident will focus on the goals and objectives outlined in section 8 above by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table above demonstrates the relationship between the activities and the goals/objectives assigned to the internal medicine learning experience.

Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases will be personalized based upon resident’s abilities and timing of the learning experience during the residency year).
**Adult Critical Care/Trauma Rotation Learning Experience**

Learning Experience Type: Acute Care, Required  
Primary Preceptor: Kiyo Yoda, Pharm.D  
Office: Ground Floor Pharmacy – Main Building  
255 W. Lancaster Ave • Paoli, PA 19301  
484-565-1172 (phone) • 484-565-4997 (fax)  
yodak@mlhs.org

1) **General Description**

The Intensive Care Unit (ICU) is a 16-bed unit comprised of medical and surgical intensive care patients. This is a 5-week rotation that provides experience in a variety of disease states and pharmacotherapy management. The daily ICU interdisciplinary rounds focusing on medical or cardiac patients are typically led by the ICU director (a Critical Care/Pulmonary Specialist - Dr. Ryan Reber) or a Critical Care Hospitalist. The Trauma interdisciplinary rounds are led by Jefferson Health System Trauma Surgeons twice a week on trauma patients including patients in the Progressive Care Unit (PCU). The interdisciplinary team generally consists of the following members: ICU director and/or hospitalist, the primary nurse caring for the patient, nurse manager/educator, pharmacist, dietitian, respiratory therapist, infection preventionist nurse, case manager/social worker and chaplain.

2) **Goals of the rotation include:**

1. To develop the resident's clinical knowledge and skills through literature reviews, topic discussions and direct patient care experience in order to gain confidence in recommending and promoting appropriate drug therapy in the critical care setting.
2. To gain an understanding and be able to effectively discuss common critical care disease states and pharmacotherapy.
3. To provide the opportunity for the resident to become an integral member of the critical care and trauma multidisciplinary teams through collaboration.
4. To identify and resolve any medication therapy problems based on laboratory data, cultures, drug levels, side effects, potential for adverse drug events, patient functional and health status, quality of life and cost-effectiveness.

**Interdisciplinary Rounds:**  
ICU rounds daily @10am  
Trauma rounds twice weekly (ex. Mon & Thurs 1:30 pm)

**Week 1-2**  
Preceptor will attend rounds with residents to model pharmacist’s role in multidisciplinary team

**Week 3-5**  
Resident to work up patients & round on own by the end of 4th week. Most interventions should be initiated by the resident during the last 2 weeks.

**Patient Review Discussions:**  
Pre-rounds daily  
Post-rounds daily

**Topic Discussions:**  
Twice weekly or 2 topics once weekly
In-service for ICU Nurses: At least one

Mini-MUE project: At least one; choose topic by 1st week

ADR reporting (if available): 1

Clinical student precepting: Available upon request & school availability

Documentation of Interventions: Residents will document interventions through Sentri7 and Siemens Pharmacy

3) **Core content** will be covered via patient experiences, discussions of reading materials, case presentations. Topics that may be reviewed during the rotation could be as follows:

- ICU analgesia, sedation and neuromuscular blockade
- Sepsis/septic shock/systemic inflammatory response syndrome (SIRS)
- Multiple organ failure and oxygen delivery in critically ill patients
- Management of Common Infectious Diseases: Community Acquired Pneumonia, Hospital Acquired Pneumonia, Skin and Soft Tissue infections, UTIs, Bacteremia, Meningitis, Osteomyelitis, post-op infectious complications
- Acute alcohol withdrawal
- Acute GI bleeding
- Traumatic Brain Injury
- Spinal Cord Injury
- Anticoagulation reversal
- Acute overdoses (opioid, benzodiazepine, acetaminophen, miscellaneous)
- Diabetic ketoacidosis (DKA)
- Glycemic control in the ICU
- Hypertensive Emergency
- Post PCI management
- Fluid and electrolyte balance/replacement in critically ill patients
- Hemodynamic support using inotropic/vasoactive agents
- Acute renal failure/uremic bleeding/acid-base disturbances
- Pharmacokinetics in critically ill patients
- ICU prophylaxis issues: GI stress ulcer prophylaxis, venous thrombosis prophylaxis

During the learning experience the resident will focus on the goals and objectives outlined in section 4 below by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the critical care learning experience.
Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases will be personalized based upon resident’s abilities and timing of the learning experience during the residency year).

5) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- **Formative assessments:** The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- **Summative evaluations:** This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- **Preceptor and Learning Experience evaluations** must be completed by the last day of the learning experience.

Infectious Disease Rotation Learning Experience

Preceptor: Andrea Weeks Pharm.D. Clinical Pharmacist Infectious Disease
Office: Third Floor Pharmacy – Main Building
        255 W. Lancaster Ave • Paoli, PA 19301
        484-565-1144 (phone) • 484-565-4997 (fax)
        weeksa@mlhs.org

1) General Description
The Infectious Diseases rotation is a 5 week required rotation in the PGY-1 residency program at Paoli Hospital.

Goals of the rotation include:

1. To develop the resident's clinical knowledge and skills in recommending and promoting the appropriate use of antimicrobials in the hospital setting and to incorporate evidence-based pharmaceutical care to improve patient outcomes.
2. To provide the opportunity for the resident to become an integral member of the infectious disease multidisciplinary team through collaboration.
3. To promote the Paoli Hospital antimicrobial stewardship program by utilizing stewardship strategies.

Description
The Paoli Hospital Antimicrobial Stewardship Program incorporates an infectious disease clinical pharmacist and Dr. Young S. Kim a board certified infectious disease physician located at Paoli Hospital and Dr. David Trevino a board certified internal medicine physician devoting his practice to infectious diseases also located at Paoli Hospital. Additional members of the antimicrobial stewardship team include the infection preventionist nurse Kathleen Francis at Paoli Hospital. The antimicrobial stewardship program was devised out of a need to optimize patient clinical outcomes while minimizing unintended consequences of antimicrobial use such as adverse events, risk of development of antimicrobial resistance and inappropriate treatment-related costs. Stewardship guidelines are based upon the 2014 CDC Core Elements of Hospital Antibiotic Stewardship Program publication, the Joint Commission 2017 Antimicrobial Stewardship Standard for Acute Care Hospitals and the Infectious Diseases Society of America and the Society for Healthcare Epidemiology of America Guidelines for Developing and Institutional Program to Enhance Antimicrobial Stewardship. The focus of the rotation is for the resident to gain clinical pharmacy experience while working with the Infectious Disease service. The resident will design, recommend, monitor and evaluate patient-specific therapeutic regimens which will concentrate on proper antimicrobial selection based on knowledge gained during actual rounds, physical exams, progress notes and laboratory values as well as utilizing the pharmacology, pharmacokinetics, pharmacodynamics and therapeutics of the drugs.

On days when the resident is not rounding on the infectious disease service they will be expected to follow patients in the hospital who are receiving antimicrobial therapy using our surveillance technology software called Sentri-7. As part of the Antimicrobial Stewardship team the resident will gain insight into the utilization of antimicrobials within the acute care hospital setting and in all age populations. They will develop problem solving skills and participate in antimicrobial stewardship
activities which include appropriate selection, dosing, route and duration of antimicrobial therapy. The PGY1 resident will utilize the following stewardship strategies including formulary restrictions and pre-authorizations, streamlining or de-escalation of therapy, dose optimization, parenteral to oral conversions, prospective audit with intervention and feedback and education based on clinical guidelines and pathways. Both electronic data and chart review will be utilized to assess concurrent antimicrobial orders. Physicians/services will be contacted as needed for dose adjustments based on renal/hepatic function. As culture results become available, therapy recommendations will be made based on results (de-escalation/escalation) as well as hospital based antibiograms. Pharmacokinetic recommendations will be made for vancomycin and aminoglycosides. Documentation must occur on the day service provided in Sentri-7. The resident is expected to be available from 7:30 am to 4:30 pm or longer days on days when rounding. 7am arrival time is preferred on Wednesdays and Thursdays to prepare for rounds.

Good communication and interpersonal skills are vital to the success of this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

2) Conference and Meeting Attendance
In addition to the learning activities, the resident is expected to attend the following conferences and meetings.

a. Infection Control Committee Meetings on the Thursday of the first full week of the month, bi-monthly from 7-8:30am in the Board Room
b. Case Conference/topic discussion every Friday with attending ID physician
c. Antimicrobial class review presented to preceptor every Monday afternoon

3) Disease States
Common disease states in which the resident is expected to gain proficiency through literature review, topic discussion and/or direct patient care experience including but not limited to:

- Basic microbiology
- Optimal antimicrobial selection
- Antimicrobial resistance and infection control
- Principles of antimicrobial stewardship
- Infectious diseases (in both immuno-competent and immuno-compromised hosts)*
  - Pneumonia (community-acquired, healthcare-associated, hospital-acquired, ventilator-associated)
  - Urinary tract infections
  - Skin and soft tissue infections
  - Bone and joint infections
  - Endocarditis
  - Intra-abdominal infections
  - Catheter-related infections
  - Invasive fungal infections
  - Bacteremia/Sepsis
  - Surgical prophylaxis
  - Peritonitis
  - Meningitis
  - Clostridium difficile
• Febrile neutropenia
• Infections due to multidrug resistant organisms, MRSA, VRE, CRE, etc.
• HIV
• Immunization recommendations

* Individual antimicrobial classes—antibiotics, antifungals, antivirals, antiretrovirals, etc. will be addressed in conjunction with disease-state discussions and it is expected that the resident will independently review relevant antimicrobial pharmacology in addition to assigned readings.

During the learning experience the resident will focus on the goals and objectives outlined in section 4 below by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the critical care learning experience.

Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases will be personalized based upon resident’s abilities and timing of the learning experience during the residency year).

### 4) Activities

<table>
<thead>
<tr>
<th>Goals and Objectives</th>
<th>Description</th>
<th>Activity Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal R 1.1</strong></td>
<td>In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients, including those with multiple co-morbidities, high-risk medication regimens, and multiple medications following a consistent patient care process.</td>
<td></td>
</tr>
</tbody>
</table>
| **OBJ R 1.1.1** | (Applying) Interact effectively with health care teams to manage patients’ medication therapy. | 1) Residents will actively participate in infectious disease rounds on Wednesdays and Thursdays and work in the ID physician’s office providing pharmaceutical care. Interactions should be cooperative, communicative and respectful.  
2) Demonstrates skill in negotiation and advocates for the patient to support safe and effective medication therapy to manage a patient’s infection.  
3) The resident will receive drug and disease state questions from the ID physicians on a weekly basis during and after round and are expected to review literature or other references suggested by their preceptor and have answers ready at the requested date/time by the ID physician.  
4) Spend a half day working with Microbiology Lab Director and with the Infection Control Preventionist.  
5) Foster relationships with the microbiology lab, nursing, IFC... |
personnel and the ID pharmacists at the other Main Line Health sites to support our health system’s antimicrobial stewardship efforts and improve patient outcomes.

<table>
<thead>
<tr>
<th>OBJ R 1.1.2</th>
<th>(Applying) Interact effectively with patients, family members, and caregivers</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The resident will be responsible for providing pharmaceutical care in the ID physician to provide pharmaceutical care such as medication reconciliation, detecting medication related problems, counseling, and drug information.</td>
</tr>
<tr>

</table>
as vancomycin, aminoglycosides, pending microbiology results, have appropriate drug levels such at peak or troughs (or any other therapeutic parameters) ordered and reviewed and offer dose modifications to ensure that the patient reaches therapeutic goals, prevents potential adverse events, or drug interactions.

4. When the resident presents their weekly patient case they should include a) rationale on why the infectious disease physician chose a certain regimen for the patient’s infection(s); b) how it fits into the current evidence-based guidelines; c) information from the hospital admission on how the patient was monitored for their medications; d) what follow up would be needed once the patient was discharged if there were changes in doses or new medications eg. labs; e) how was the medication plan communicated to the patient; f) what steps were put in place and by whom to ensure the patient could obtain their medications and follow up with their physician to ensure the best outcomes?

<table>
<thead>
<tr>
<th>OBJ R1.1.7</th>
<th>(Applying) Document direct patient care activities appropriately in the medical record or where appropriate.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The resident will compose an accurate, concise progress note in Sentri-7 on any direct patient care activities they were involved in during rounds, general surveillance or working in the physicians’ office.</td>
<td></td>
</tr>
<tr>
<td>2. The resident will be evaluated on the quality of the progress notes they write in terms of being clear, including pertinent information so that other clinical pharmacists can review in time to be useful. E.g. A note which describes an interesting patient case the resident was part of during rounds in which they learned information only available if one were in rounds.</td>
<td></td>
</tr>
<tr>
<td>3. Learn to perform an allergy assessment and write a note of outcome in the patient’s medical chart.</td>
<td></td>
</tr>
<tr>
<td>4. The resident should follow all hospital policies and procedures for documentation.</td>
<td></td>
</tr>
<tr>
<td>5. The resident will be responsible to log a minimum number of interventions each day based on the week of the rotation. This is a responsibility of a clinical pharmacist in a hospital.</td>
<td></td>

</table>

<table>
<thead>
<tr>
<th>GOAL R4.1</th>
<th>Provide effective medication and practice-related education to patients, caregivers, health care professionals, students, and the public (individuals and groups)</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R4.1.1</td>
<td>(Applying) Design effective educational activities</td>
</tr>
<tr>
<td></td>
<td>1. The resident will be responsible to provide a final PowerPoint presentation to the physicians and other clinical staff on an infectious disease topic and should include educational objectives.</td>
</tr>
<tr>
<td></td>
<td>2. The resident will select a patient from rounds and present a weekly infectious disease patient case presented to the infectious disease physicians</td>
</tr>
<tr>
<td></td>
<td>3. Provide weekly anti-infective class review to clinical staff and pharmacy students.</td>
</tr>
<tr>
<td></td>
<td>4. In all presentations, the resident should select content that is relevant and at a level that is appropriate to the learners needs i.e. (Physicians, Pharmacists, and Students).</td>
</tr>
<tr>
<td></td>
<td>5. The resident should incorporate teaching strategies which include active learning such as polling questions.</td>
</tr>
<tr>
<td></td>
<td>6. Content should be evidence-based, timely, reflect best practices and include cited references.</td>
</tr>
<tr>
<td></td>
<td>7. The final presentation must be approved by both the preceptor and physicians at least one week prior to the date of presentation.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJ R4.1.2</th>
<th>(Applying) Use effective presentation and teaching skills to deliver education</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. The resident should be prepared to discuss more in depth at the request of the infectious disease physician or preceptor a daily or weekly drug information request and at least one patient case presentation. Drug information questions are at the discretion of the infectious disease doctor/preceptor.</td>
</tr>
<tr>
<td></td>
<td>2. The resident should use their weekly antibiotic class reviews with their preceptors, pharmacists and students, as well as, the final Power Point presentation for physicians to build relationships with their learners.</td>
</tr>
</tbody>
</table>
3. This can be accomplished by using techniques to capture and maintain their audience using planned teaching strategies engaging the audience through active participation such as including an interesting patient.

4. The resident should provide background on the disease state(s), medications and monitoring parameters on their presentations as the focus should always be pharmacy related.

5. The resident will be evaluated on speaking skills, body language, smooth transitions between concepts, using effective handouts/visual aids which help support learning and summarize important points throughout the presentation.

<table>
<thead>
<tr>
<th>OBJ R4.1.3</th>
<th>R 4.1.3 (Applying) Use effective written communication to disseminate knowledge</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>All written work should be free from grammatical errors and demonstrate that the resident prepared in advance and knows the subject manner. Handouts should be well-designed, summarize information and help enhance oral presentations.</td>
</tr>
<tr>
<td>2.</td>
<td>The resident should cite references in their written work.</td>
</tr>
<tr>
<td>3.</td>
<td>The written communication that the resident disseminates should use various graphics such as tables, figures and graphs to help enhance the audience’s understanding of a topic, i.e. Visual learning.</td>
</tr>
<tr>
<td>4.</td>
<td>The resident should utilize a variety of literature including guidelines, studies and other credible references to help expose the audience to the most current information on a topic. E.g. If you are asked to talk about diabetic foot infections, what do the current guidelines state on the most effective treatments?</td>
</tr>
<tr>
<td>5.</td>
<td>The resident should know their audience and direct the content and level of their written communication appropriately. (E.g. physicians, nurses, pharmacists, patients vs. the public).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJ R4.1.4</th>
<th>R 4.1.4 (Applying) Appropriately assess effectiveness of education.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>When providing drug information in the form of a presentation such as the patient case, topic discussions, antibiotic class review or final Power Point presentation, the resident should determine the learning objectives/focus ahead of time to help prepare activities that will enhance the learning experience.</td>
</tr>
<tr>
<td>2.</td>
<td>For the weekly antibiotic class reviews, the resident should include written, verbal or audience self-assessment questions to help determine how well the audience of preceptors, resident, students grasped the concepts taught.</td>
</tr>
</tbody>
</table>
| 3.         | For the case presentations or other information provided to the infectious disease physicians, the resident should summarize and ask if anyone has questions at the end or
4. For the final Power Point presentation the resident should follow up with the physicians to obtain feedback to improve as an effective educator.

<table>
<thead>
<tr>
<th>GOAL R4.2</th>
<th>Effectively employ appropriate preceptor roles when engaged in teaching students, pharmacy technicians, or fellow health care professionals.</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R4.2.1</td>
<td>R 4.2.1 (Analyzing) When engaged in teaching, select a preceptor role that meets learners’ educational needs.</td>
</tr>
<tr>
<td></td>
<td>1. The resident should familiarize themselves with the 4 preceptor roles (direct instruction, modeling, coaching, facilitating) and when to utilize these techniques for instruction. <em>(see required readings)</em></td>
</tr>
<tr>
<td></td>
<td>2. The effectiveness of the resident first identifying then applying these educational objectives will be evaluated when the resident is providing their weekly drug class reviews, but would fit with any presentation. The resident needs to identify which role is applicable to their particular presentation and audience.</td>
</tr>
<tr>
<td></td>
<td>3. Direct instruction is needed when the audience requires background possibly on a disease state or an antibiotic mechanism of action. The resident should explore ways to provide teaching that is interesting and motivating to the audience.</td>
</tr>
<tr>
<td></td>
<td>4. Modeling could be employed once the audience understands a topic or has some existing knowledge to present a more difficult topic such as determining based on mechanism what class an antibiotic would belong to for example.</td>
</tr>
<tr>
<td></td>
<td>5. Coaching during teaching could occur when you want the audience to perform a task with your supervision such as working on finding lab values which help identify that a patient has a particular type of infection The resident is there to assist and provide verbal ques.</td>
</tr>
<tr>
<td></td>
<td>6. Lastly, determining when to allow the learners during your presentation to work alone (facilitate) such as some quiz questions or fill in blanks or potentially a mini-patient case.</td>
</tr>
<tr>
<td></td>
<td>7. The resident should be able to determine based on how well the audience is able to work alone whether they need to go back to more direct instruction or possibly modeling such as using “think out loud” strategies or clues.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJ R4.2.2</th>
<th>R 4.2.2 (Applying) Effectively employ preceptor roles, as appropriate.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. This objective relates to actually applying appropriate preceptor roles.</td>
</tr>
<tr>
<td></td>
<td>2. The resident will be evaluated on how well they match the audience’s needs to the appropriate preceptor role.</td>
</tr>
<tr>
<td></td>
<td>3. What strategies were applied to help teach? Were the strategies effective?</td>
</tr>
<tr>
<td></td>
<td>4. For the antibiotic class review, did the resident provide</td>
</tr>
</tbody>
</table>
adequate background on the mechanism of action of the
drugs, spectrum of activity, dosing, drug structure first
(direct instruction)?

5. Did the resident use strategies to employ critical thinking
such as “think out loud” to help teach the audience how to
walk through a problem?

6. Did the resident coach the audience with verbal queues,
feedback, questions?

7. Lastly, did the resident facilitate when appropriate, such as
using case based questions? If this was employed and the
audience did not know the answers, the resident would be
expected to go back to direct instruction or modeling to
help the audience solve the problems.

8. Once the learners can perform unsupervised is there
anything that could be provided to allow the audience to
work alone such as giving them a calculation to work out or
case questions to complete?

5) Preceptor Interaction

Day 1: Meet at 8 am to orient resident to the rotation requirements, assign readings and explain
evaluation strategy. Additionally orient resident to Sentri-7 and set up dashboard to
monitor patients on antimicrobials. Set up infectious disease census in Smart Chart.

Week 1: Resident to work up assigned patients on infectious disease service and present to
preceptor prior to rounds. Preceptor to provide direct instruction on the role of the ID
pharmacist. Preceptor will attend and participate in rounds with the resident (modeling
pharmacist’s role on the health care team). This will occur on Wednesdays (with Dr.
Kim) and Thursdays (with Dr. Trevino). Resident to log in any interventions made on
any direct patient care activities such as rounds, general surveillance or working in the
physicians’ office in Sentri-7 (minimum 3 per day). On non-rounding days, resident will
work with preceptor to monitor and make therapy recommendations on patients
throughout the hospital as part of the antimicrobial stewardship program. Resident to
provide pharmaceutical care in ID physician office on Thursday afternoon. Case based-
topic discussion to be held on Fridays with ID attending.

Week 2: Resident to work up assigned patients on infectious disease service and present to
preceptor prior to rounds. Preceptor will attend and participate in rounds with the
Resident (coaching the resident to take on more responsibility on the health care team).
Resident to log in any interventions made on any direct patient care activities such as
rounds, general surveillance or working in the physicians’ office in Sentri-7 (minimum
4 per day) On non-rounding days, resident will work with preceptor to monitor and
make therapy recommendations on patients throughout the hospital as part of the
antimicrobial stewardship program. Begin vancomycin and aminoglycoside
pharmacokinetics when applicable. Antimicrobial class review to be presented Monday
2:30-3:30 pm. Resident to provide pharmaceutical care in ID physician office on
Thursday afternoon. Case based-topic discussion to be held on Fridays with ID
attending.

Weeks 3-4: In addition to week 2 activities the resident should exhibit more independence in
following and monitoring assigned patients and take more leadership role in rounds in
terms of recommendations and logging interventions in Sentri-7 (minimum 5 per day). Preceptor will take on role of facilitator and provide feedback to resident on the role in rounds and recommendations on non-rounding days. Work on any assigned projects including DUE, final presentation etc.

Weeks 5: Same as week 3-4. Resident to attend rounds and assume full independence, with preceptor feedback and guidance on patient cases. Sentri-7 should be used with a (minimum of 6 interventions logged per day). Resident will need to get preceptor final approval for power point presentation to physicians. DUE is due by the Wednesday of Week 5 in order to provide time for the ID physicians to offer feedback. The preceptor will model and coach the resident on how to put together the final presentation.

Daily rounds time varies by attending schedule
Preceptor meeting after completion of rounds to review patients and answer questions time permitting, as this may need to occur the following day if rounds run long.

6) Evaluation Strategy
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

Pharmacy Practice Management Learning Activities

Preceptor: Al Celidonio RPh, Pharmacy Manager Paoli Hospital
Office: Ground Floor Pharmacy – Main Building
255 W. Lancaster Ave, Paoli, PA 19301
484-565-1173 (phone), 484-565-4997 (fax)
celidonioa@mlhs.org

1) General Description
The Pharmacy Practice Management is a required 5 week rotation that places emphasis on issues of planning, structure, organization, leadership and philosophy of practice in an integrated health care system. The program helps build the resident’s maturity, creativity, judgment, and problem solving skills necessary in the development and management of progressive pharmacy programs. The Pharmacy Practice Management rotation is designed to ensure that the pharmacy resident receives proper training and guidance regarding the myriad of pharmacy services and leadership skills necessary to be successful in today’s multidisciplinary healthcare environment. The resident will work with the Director during this rotation. The resident will at times function as a supervisor in the various areas of the pharmacy.

2) Goals and objectives will be met through observation or direct involvement in the following activities:

1. Medication Use Management
2. Departmental Operations management
3. Interdepartmental activities/committees
4. Proposal development
5. New program implementation
6. Training / Teaching
7. Purchasing and Inventory Management
8. Development/maintenance of policies and procedures
9. Human Resources management
10. Participation in the administrative aspects of the Pharmacy Resident Recruitment process including interviews, evaluation, selection and planning activities and orientation for new residents
11. Reviewing STARS Event Reporting System for medication errors, adverse drug events and patient falls
12. Reviewing Narcotic Surveillance reports and Medication Administration(MAK) Reports
13. Attend meetings as scheduled
14. Continued Professional Development (CPD)
During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the Practice Management rotation.

Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases will be personalized based upon resident’s abilities and timing of the learning experience during the residency year).

### 3) Activities

<table>
<thead>
<tr>
<th>Activity Detail</th>
<th>Corresponding Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal R1.3</strong>: Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.</td>
<td></td>
</tr>
<tr>
<td>1. Discuss organization’s medication distribution process, which includes automation on nursing units, operating room and emergency room.</td>
<td></td>
</tr>
<tr>
<td>2. The resident will familiarize him/herself with the Main Line Health Medication Use System through daily operational tasks with the Director of Pharmacy.</td>
<td></td>
</tr>
<tr>
<td>3. The resident will be able to explain areas where adverse drug events can occur in terms of automation and information technology.</td>
<td></td>
</tr>
<tr>
<td>4. Promotes safe and effective drug use on a day to day basis by being familiar with applicable laws and MLH Policies and ensuring medications are dispensed safely in the workflow.</td>
<td></td>
</tr>
<tr>
<td><strong>Goal R2.1</strong>: Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.</td>
<td></td>
</tr>
<tr>
<td>1. Discuss STARS Event Reporting System on the desktop reports - organization’s reporting system for medication errors, adverse drug events, patient falls, order entry errors, etc. <a href="https://www.csstars.com/Enterprise/default.cmdx">https://www.csstars.com/Enterprise/default.cmdx</a></td>
<td></td>
</tr>
<tr>
<td>2. The resident will analyze processes within a medication-use system (e.g. root cause analysis, failure mode and effect analysis).</td>
<td></td>
</tr>
<tr>
<td>3. Use best practices to identify opportunities for improvement as well as analyze relevant background using health information technology or automated systems to assist in the evaluation of data.</td>
<td></td>
</tr>
<tr>
<td><strong>Goal R3.1</strong>: Demonstrate leadership skills</td>
<td></td>
</tr>
<tr>
<td>1. Provide effective communication, both verbal and written, to the members of the department, to other departments within the hospital as necessary throughout the rotation. Example: pharmacy department meetings, pharmacy huddles</td>
<td></td>
</tr>
<tr>
<td>2. Demonstrate effective time management, negotiation, and ability to lead interprofessional teams by participating in various meetings and work groups.</td>
<td></td>
</tr>
<tr>
<td>3. Express benefits of professional leadership and advocacy by working</td>
<td></td>
</tr>
</tbody>
</table>

R 1.3.3 (Applying) Manage aspects of the medication-use process related to oversight of dispensing.

R 2.1.3 (Analyzing) Identify opportunities for improvement of the medication-use system.

R 2.1.4 (Applying) Participate in medication event reporting and monitoring.

R 3.1.1 (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.
with various hospital departments who work closely with pharmacy.

| 1. | The resident will use self-reflection and skills taught by their preceptor to improve the quality of their own performance through professional development, organizational skills, improving expertise using literature. |
| 2. | The resident will compile a leadership and management portfolio during this rotation and upload into PharmAcademic. The portfolio will use the process of Continued Professional Development (CPD) to track and record one’s own personal goals for becoming a better leader and manager. CPD uses the principles of (reflect, plan, act/learn, evaluate, record/review: a) Where am I now? b) Where do I want to be? c) What do I have to do to get there? d) Record my activities/learning e) Review and evaluate my progress after 5 weeks to see my growth. |

<table>
<thead>
<tr>
<th><strong>Goal R3.2: Demonstrate management skills</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Explain the effects of accreditation, legal, regulatory, and safety requirements for pharmacy practice. Review MLH policy and procedures –Corporate Compliance, Joint Commission Standards, HIPPA, etc. Be familiar with the process by which regulatory and safety requirements are implemented and the agencies responsible for accreditation in various departments including state agencies.</td>
</tr>
<tr>
<td>2. Understand the process of managing the practice area of human resources.</td>
</tr>
<tr>
<td>3. Discuss the importance of orientation and training for pharmacy team members.</td>
</tr>
<tr>
<td>4. Participate in the administrative aspects of the Pharmacy Resident recruitment process including interviews, evaluation, selection and planning activities and orientation for new residents.</td>
</tr>
<tr>
<td>5. Review and update designated sections of the department’s policy and procedure manual as needed. Also, participate in the pharmacy department’s planning process. Required policy reviews/revisions due by the end of the rotation. <em>Written formative feedback in PharmAcademic will be provided</em></td>
</tr>
</tbody>
</table>

| **R 3.1.2 (Applying)** |
| Apply a process of ongoing self-evaluation and personal performance improvement. |

| **R 3.2.1 (Understanding)** |
| Explain factors that influence departmental planning. |

| **R 3.2.2 (Understanding)** |
| Explain the elements of the pharmacy enterprise and their relationship to the health care system. |

| **R 3.2.3 (Applying)** |
| Contribute to departmental management. |

| **1.** Explain the principles of financial management of a pharmacy department by assisting in preparing budgets, discussing sources for revenue and dealing with reimbursement from payers in current health care environment |
| **2.** Monitor Controlled substance usage and identify potential Drug Diversion through Discrepancy report and Narcotic Surveillance Reports. |
| **1.** Describe the Pharmacy Department’s current goals and status and the development of these goals in conjunction with the budget. |
| **2.** The resident will be actively involved in developing/assessing short and long range goals for the department. |
| **3.** The resident will understand the strategy and supportive documentation underlying these goals. Resident will participate in implementing a practice area goal including implementation through informal work groups. |
4. Participate in the numerous meetings held within the department and with other departments. This participation shall provide the resident with the exposure to the multitude of relationships necessary for the functioning of the department with other departments.
   - Pharmacy and Therapeutics Committee
   - Nursing-Pharmacy Medication Safety Committee
   - Paoli Quality Committee
   - Paoli Patient Safety Committee
   - Paoli Culture of Safety Embedding Committee
   - Pharmacy Team Committee’s-Leadership Team, Director’s Mtg, Clinical Team, and Purchasing Committee
   - Pharmacy-MAK Advisory Committee
   - MLH Accreditation Team
   - CPOE Order-set Committee
   - Project Red Committee

1. Act ethically in the conduct of all job-related activities. Read over MLH code of conduct policies and procedures.
2. The resident will be provided information on professional organizations at the state, local and national level which promote pharmacy practice. The resident will demonstrate commitment to the profession of pharmacy through their personal conduct.
3. Assumes responsibility for personal work quality and improvement.
4. Sets realistic goals and timelines and strives to maintain a healthy work-life balance.
5. Comes prepared for meetings and project deadlines and integrates new learning into performance.
6. Show enthusiasm, motivation and a “can do” approach.

Goal E2.2: Contribute to the management and development of pharmacy staff

| 1. The resident will supervise clerical personnel/support personnel, delegate work and will be provided opportunity to review the employee | E 2.2.3 (Understanding) Explain the components |
2. Learn techniques for offering suggestions to personnel on improving performance.
3. How to praise superior performance and how to work with various documentation tools.
4. Learn about the performance standards for various positions and effective ways to measure work against objective and subjective standards.

1. Discuss the policy and procedure of the discipline process.
2. Learn to resolve conflicts through negotiation.

4) **Preceptor Interaction**

Daily: 08:30 – 17:00, May vary based on activities of the day. Attend meetings as scheduled.

*(The length of the time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and where the rotation occurs in the residency program)*

5) **Expected Progression of Resident Responsibility on this Learning Experience:**

Day 1: 9am- Meet with preceptor in office to review Practice Management learning activities and expectations with resident including reviewing policies and procedures, operations chart, adding meetings to calendar, etc.

Weeks 1-5- Shadow preceptor at meetings and day to day operational tasks. Preceptor to model administrative role of a pharmacist in a healthcare organization. Resident to take on more responsibility each week with the final goal of being able to work independently in a supervisory role in the pharmacy department. By the end of the rotation the resident should be able to:

- Design and discuss a Hospital-wide organization chart for professional and administrative services.
- Discuss the mission of the Hospital and its relationship to the goals and objectives of Main Line Health.
- Describe an organizational chart for the Pharmacy Department and defend or critique its organizational structure.
- Interpret departmental financial and benchmarking reports
- Use financial and benchmarking reports to justify a new project
- Have a formal understanding of the policies and procedures of the Pharmacy Department and assist in the required review process
- List the functions of various Hospital committees and their relationship to the overall hospital organization.
- Describe and assist in the recruitment process for Pharmacy Practice Residents.
- Describe the day-to-day workings of the Pharmacy Department including medication procurement and distribution
- Assist in scheduling of staff
- Assist in the management and development of staff
- Manage select areas of the pharmacy
- Run a pharmacy staff meeting and/or pharmacy huddle by the end of the rotation

6) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- **Formative assessments:** The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- **Summative evaluations:** This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- **Preceptor and Learning Experience evaluations** must be completed by the last day of the learning experience.

Emergency Department Rotation Learning Experience

**Learning Experience:** Emergency Medicine and Transitions in Care

**Learning Experience Type:** Core Rotation

**Preceptor(s):**
- Deena Rojek, Clinical Pharmacist Emergency Medicine
  484-565-2558 (phone)
  Emergency Room, Paoli Hospital
  rojekd@mlhs.org

1) **Description:**

Paoli is a 222-bed community hospital that serves a mix of medical, surgical, and trauma patients. The ED averages over 30,000 patient visits annually and is comprised of 3 rapid evaluation rooms, 21 acute beds, 6 fast track beds, and 2 trauma bays. Paoli is a Level II trauma center and is the only trauma accredited hospital in Chester County.

This rotation is a 5-week learning experience that focuses on emergency medicine and transitions in care. The hours are 8:00 am to 4:30 pm. During these hours the resident is expected to be present in the ED and actively involved in patient care activities. All projects for this rotation and other resident responsibility are to be completed during off hours - unless otherwise approved by the preceptor. This rotation will provide an opportunity to work with a variety of prescribers including physicians, medical residents, nurse practitioners, and physician assistants. The preceptor for this rotation works directly in the ED and will be available for questions and consultation via phone and in person anytime during the rotation hours.

Pre-requisites for this rotation include BLS and ACLS certification. Also, good communication skills and ability to multi-task will be vital to the success of this learning experience.

During this rotation, the pharmacy resident will be responsible for establishing a relationship and working with the ED personnel to identify, prevent, and resolve many different types of medication issues. The resident will provide both cognitive and dispensing services to the ED. The dispensing functions will include review of medication orders generated for ED patients and fulfillment of medication orders as needed. The cognitive functions will include medication list management, patient counseling/education, decisions about patient care, assisting with traumas/codes, developing educational materials, and providing drug information as needed. The resident and preceptor will meet daily to discuss patients and topics. All recommendations and information provided will be documented via electronic interventions.

Topics that may be reviewed during this rotation include (but are not limited to):

- Cardiovascular emergencies (chest pain, ACS/MI, CHF, HTN, arrhythmias, blood clot)
- Pulmonary emergencies (respiratory failure, PE, asthma, COPD, allergic reactions)
- Gastrointestinal emergencies (GI bleed, nausea, diarrhea, constipation)
- Neurologic emergencies (seizures, stroke, TIA)
- Infectious disease emergencies (sepsis, meningitis, pneumonia, STD, tetanus, rabies)
- Toxicology emergencies (overdose, accidental ingestion)
- Endocrine/Metabolic emergencies (DKA, electrolyte disturbances)
- OB/GYN emergencies (vaginal bleeding, ectopic/other pregnancy concerns)
- Trauma/Code emergencies (car accidents, falls, gun shots, assaults)
- Kits used in ED (RSI, STEMI, adult code cart, pediatric code cart, trauma kit, HIV exposure)

2) **Timeline:**

**Week 1:**
- Tour the ED and learn where all necessary things are kept
- Introduce yourself to appropriate ED staff (different people work each day)
- Review learning activities and expectations for this rotation
- Become familiar with computer program used to manage ED patients
- Shadow a nurse and prescriber to gain an understanding of the complexity of patient care within the emergency department
- Observe ED pharmacist and begin to take on responsibilities as appropriate
- Prepare a handout and present one topic discussion (ED kit / disease state)

**Ongoing ED activities:**
- Provide drug information as requested
- Report any ADR’s (via STARS) or Great Catch’s (via intranet) that arise
- Observe/participate in traumas and codes whenever possible
- Counsel patients as requested by ED staff

**Week 2:**
- Obtain a medication history on at least 3 patients per day
- Review and profile at least 10% of medication orders generated for emergency department patients between 8:00 am and 4:30 pm
- Prepare a handout and present one topic discussion (ED kit / disease state)
- Perform chart review for at least 2 patients
- Chose most interesting patient from this week and present a brief patient case
- Brainstorm ideas for educational in-service

**Week 3:**
- Obtain a medication history on at least 4 patients per day
- Review and profile at least 15% of medication orders generated for emergency department patients between 8:00 am and 4:30 pm
- Prepare a handout and present one topic discussion (ED kit / disease state)
- Perform chart review for at least 3 patients
- Chose most interesting patient from this week and present a brief patient case
- Finalize topic for education in-service

**Week 4:**
- Obtain a medication history on at least 5 patients per day
- Review and profile at least 20% of medication orders generated for emergency department patients between 8:00 am and 4:30 pm
- Prepare a handout and present one topic discussion (ED kit / disease state)
- Perform chart review for at least 4 patients
- Chose most interesting patient from this week and present a brief patient case
- Prepare slides, poster, handout, and/or pocket-card for educational in-service

Week 5:

- Obtain a medication history on at least 6 patients per day
- Review and profile at least 25% of medication orders generated for emergency department patients between 8:00 am and 4:30 pm
- Perform chart review for at least 5 patients
- Chose most interesting patient from this week and present a brief patient case
- Present educational in-service to pharmacy, nursing, and/or medical staff

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the critical care learning experience.

Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases will be personalized based upon resident’s abilities and timing of the learning experience during the residency year).

### 3) Activities:

<table>
<thead>
<tr>
<th>Objectives</th>
<th>Associated Activities</th>
</tr>
</thead>
</table>
| OBJ R1.1.1 (Applying) Interact effectively with health care teams to manage patients’ medication therapy | 1. (Medication Histories) Obtain and record assigned number of daily medication histories including current prescription therapies, over the counter products, compliance, and medication/food allergies. Communicate relevant on-going information to health care team.  
2. (Patient Care) Work with an interdisciplinary team to achieve optimum care for ED patients. Exhibit a professional, caring attitude toward patients and their families, while prioritizing the pharmaceutical needs of patients. |
| OBJ R1.1.2 (Applying) Interact effectively with patients, family members, and caregivers | 1. (Patient Interactions) Interact with patients, families, and caregivers to gather pertinent information and provide education when needed.  
2. (Patient Interactions) Show empathy for patients, families, and caregivers. |
| OBJ R1.1.3 (Analyzing) Collect information on which to base safe and | 1. (Medication Management) Assume responsibility for providing pharmaceutical care to ED patients in collaboration with preceptor. Complete an in-depth |
| OBJ R1.1.4 | (Analyzing) Analyze and assess information on which to base safe and effective medication therapy | 1. (Medication Management) Check appropriateness of all medication regimens in these patients and make recommendations for modifications as indicated. 2. (Medication Management) Identify non-compliant patients, analyze the root cause and make recommendations to patients, family, caregivers, or physicians in order to improve medication adherence. |
| OBJ R1.1.5 | (Creating) Design or redesign safe and effective patient-centered therapeutic regimens and monitoring plans (care plans) | 1. (Drug Information) Retrieve, review, and interpret medical literature to provide patient-specific drug information as appropriate. |
| OBJ R1.1.6 | (Applying) Ensure implementation of therapeutic regimens and monitoring plans (care plans) by taking appropriate follow-up actions | 1. (Drug Information) Retrieve, review, and interpret medical literature to provide patient-specific drug information as appropriate. 2. (Medication Monitoring) Follow-up on dose adjustment recommendations based on patients renal or hepatic impairment. |
| OBJ R1.1.7 | (Applying) Document direct patient care activities appropriately in the medical record or where appropriate | 1. (Documentation of Activities) Document all interventions, recommendations, and direct patient care activities in the hospital’s electronic clinical database. |
| OBJ R1.1.8 | (Applying) Demonstrate responsibility to patients | 1. (Patient Care) Work with an interdisciplinary team to achieve optimum care for ED patients. Exhibit a professional, caring attitude toward patients and their families, while prioritizing the pharmaceutical needs of patients. |
| OBJ R1.2.1 | (Applying) Manage transitions of care effectively | 1. (Medication Histories) Obtain and record assigned number of daily medication histories including current prescription therapies, over the counter products, compliance, and medication/food allergies. Communicate relevant on-going information to health care team. 2. (Order Entry) Reconcile medications and follow up on recommendations made to physicians. |
| OBJ R1.3.1 | (Applying) Prepare | 1. (Order Entry) Profile medication orders and review for... |
and dispense medications following best practices and the organization’s policies and procedures, both accuracy and safety. Make formulary appropriate conversions and provide recommendations for medication modifications as needed.

2. (Medication preparation) Prepare medications needed during traumas and codes by using appropriate technique.

<table>

<tbody>
<tr>
<td></td>
<td>1. (Codes and Traumas) Participate in management of medical emergencies and traumas in the ED. 2. (Policies and Procedures) Review policies and procedures for the emergency department and apply them as need during medical emergencies.</td>
</tr>
</tbody>
</table>
4) Feedback and Evaluations:

The first day of this rotation will include an introduction to the objectives and expectation as well as a discussion of the resident’s personal goals. Throughout the rotation, the resident will be provided with day-to-day verbal feedback.

PharmAcademic will be used to document written feedback and evaluations (see chart below). The resident and the preceptor will independently complete their assignments and save them as a draft. The resident and preceptor will discuss all written feedback and evaluations commenting on both the residents’ performance of the activities and the accuracy of their self-assessment skills. After the discussion all items will be signed in PharmAcademic.

- **Self-Assessments:** these will be used to document in PharmAcademic the weekly activities competed by the resident along with their reflection of the learning experience (*fulfills OBJ R3.1.2*)
- **Formative Assessments:** these will be used to provide the resident with ongoing, activity focused, measurable, and constructive feedback
- **Summative Evaluation:** this will summarize the resident’s performance throughout the learning experience while providing them with specific comments and examples which they can use to improve their performance in subsequent learning experiences
- **Preceptor/Learning Experience Evaluation:** this will be used to provide the preceptor with constructive feedback about their teaching style and the overall rotation which can be used to improve the learning experience in the future

5) **Rotation Self-Assessments:**

**Week 1**

1) Which prescriber and nurse did you shadow and what was something you learned from each of these experiences?
2) What was your most memorable/interesting patient from this week? What did you learn from your interaction with this patient? What would you do differently?
3) What traumas/codes did you participate in this week? How did you contribute to the health care team? What areas do you feel you need to improve upon?
4) What interventions did you make this week? Please categorize: patient safety, medication reconciliation, and medication related problem such as duplicate medication.
5) What drug information questions were you asked? What was challenging about the questions? Did any of them require immediate answers vs. time to review references?

**Weeks 2-4**

1) Which disease state/protocol/kit/guideline did you choose to present this week? Why did you choose this topic? What resources did you need to review before presenting? What did you learn?
2) What was your most memorable/interesting patient from this week? What did you learn from your interaction with this patient? Do you feel you learned from last weeks’ interactions anything that you are now doing differently?
3) What traumas/codes did you participate in this week? How did you contribute to the health care team? What areas do you feel you need to improve upon? What are some ways you can improve?
4) What interventions did you make this week? Please categorize: patient safety, medication reconciliation, and medication related problem such as duplicate medication.
5) What drug information questions were you asked? What was challenging about the questions? Did any of them require immediate answers vs. time to review references?

**Week 5**

1) What topic did you chose for your education in-service? What format did you chose to present the material? How did you feel your presentation went? Did you get feedback from the audience?
2) What was your most memorable/interesting patient from this week? What did you learn from your interaction with this patient? Do you feel you learned from last weeks’ interactions anything that you are now doing differently?
3) What traumas/codes did you participate in this week? How did you contribute to the health care team? Would you be able to function independently? Why or Why Not?
4) Provide one example of an intervention you made and one example of drug information you were asked for this week. Do you feel your interventions have improved over the past 5 weeks? How so? Do you feel more secure answering questions requiring immediate answers?

1) General Description
The Cardiology rotation is a 5 week required rotation in the PGY-1 residency program at Paoli Hospital.

Goals of the rotation include:
The resident will have the opportunity to explore the various practice areas within the field of Cardiology and will:

• Review the physiology of the normal cardiovascular system and its relationship to disease.
• Acquire a better understanding of the various cardiovascular disorders - CHF, HTN, angina, arrhythmias, etc.
• Learn the basics of the ECG and its role in diagnosis and therapeutic intervention of cardiac disease.
- Gain an understanding of the basic pharmacology and pharmacokinetics of cardiac drugs
- Become familiar with physical assessment of the cardiovascular system as it applies to diagnosis and the monitoring of drug therapy interventions.
- Acquire a better understanding of the various commonly used cardiovascular diagnostic and interventional procedures.

**Description**

The Paoli Hospital Cardiology rotation has teamed up with the Cardiology Consultants of Philadelphia Main Line Division. The physician practice is located conveniently at Paoli Hospital consists of eight physicians and two nurse practitioners. There is one non-invasive cardiologist and one interventionalist rounding in the hospital each day. The resident will divide their time between each of the cardiologists who are on site each day. Additionally, the resident will provide pharmaceutical care to patients in the cardiology office as part of the rotation requirements. Paoli Hospital is recognized nationally for quality in cardiac care and offers the following services: electrocardiograms, stress echocardiograms, nuclear imaging services, carotid and peripheral vascular ultrasound, cardiac catheterizations, cardiac rehabilitation, arrhythmia management (ICD and pacemaker device implants and monitoring), echocardiograms, stress testing, interventional procedures, noninvasive procedures, catheter ablation procedures, stroke prevention and screening, monitoring and management of therapeutic anticoagulation and cardiovascular risk factor management including lipids, smoke cessation and exercise prescription. The resident will design, recommend, monitor and evaluate patient-specific therapeutic regimens which will concentrate on cardiac medications based on knowledge gained during actual rounds, physical exams, progress notes and laboratory values as well as utilizing the pharmacology, pharmacokinetics, pharmacodynamics and therapeutics of the drugs.

Good communication and interpersonal skills are vital to the success of this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

**Conference and Meeting Attendance**

In addition to the learning activities, the resident is expected to attend the following conferences and meetings.

a. Cardiology Grand Rounds on the third Tuesday of the month, 12-1 pm in the Potter Room
b. Case Conference/topic discussion weekly in cardiologist office (preceptors present)
c. Morning report/huddle in cardiologist office at 7am Monday, Wednesday and Fridays to discuss patients and prepare for day
d. Patient case presentation every Monday afternoon with preceptors and students.
e. Cardiothoracic case reviews on the 4th Tuesday of the month, 7-8am in the Board Room

2) **Disease States**

Common disease states in which the resident will be expected to gain proficiency through literature review, topic discussion and/or direct patient care experience including but not limited to:

- Anatomy and Physiology of the Cardiovascular system
- Arrhythmias (e.g. Atrial fibrillation, Heart block, Ventricular Tachycardia)
- Hypertension
- Mechanical Valves / Annuloplasty
• Mechanical Assist Devices (e.g. ECMO, LVAD)
• Heart Failure
• Coronary Artery Disease (e.g. MI, CABG, stents, thrombolytics)
• Hyperlipidemia
• Endocarditis
• Cardiogenic shock
• Anticoagulation

*Consensus treatment guidelines, drug class reviews will be addressed in conjunction with disease-state discussions and it is expected that the resident will independently review relevant pharmacology in addition to assigned readings

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the critical care learning experience.

### 3) Activities

<table>
<thead>
<tr>
<th>Goals and Objectives</th>
<th>Description</th>
<th>Activity Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal R 1.1</strong></td>
<td>In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients, including those with multiple co-morbidities, high-risk medication regimens, and multiple medications following a consistent patient care process.</td>
<td></td>
</tr>
<tr>
<td><strong>OBJ R 1.1.1</strong></td>
<td>(Applying) Interact effectively with health care teams to manage patients’ medication therapy.</td>
<td>6) Residents will actively participate in cardiology rounds weekly. Resident should check cardiologist/NP schedules to make arrangements to work with various clinicians, specialties e.g.: electrophysiologists, interventionalist, inpatient and outpatient cardiology rounds. 7) During rounds, the resident should display respectful and cooperative communication with the various physicians and nurse practitioners. 8) The resident should support safe and effective medication therapy to manage a patient’s cardiac health. 9) The resident should respond to team requests for drug information in a timely manner.</td>
</tr>
<tr>
<td><strong>OBJ R 1.1.2</strong></td>
<td>(Applying) Interact effectively with</td>
<td>1. The resident will be responsible for providing pharmaceutical care in the cardiologist office practice</td>
</tr>
</tbody>
</table>
patients, family members, and caregivers

which may include warfarin monitoring with nursing and medication counseling.

2. Residents should show compassion, appropriate communication skills and cultural competence when speaking to patients and their family/caregivers.

3. Residents should help patients take part in their own healthcare by teaching them about their disease states and required medication therapy.

<table>
<thead>
<tr>
<th>OBJ R 1.1.3</th>
<th>(Applying) Collect information on which to base safe and effective medication therapy.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>3. The resident will be required to accurately gather and organize patient specific information on assigned patients either before or during rounds with the cardiology team.</td>
</tr>
<tr>
<td></td>
<td>4. The resident may be expected to present patients they have worked up to the cardiologists during rounds.</td>
</tr>
<tr>
<td></td>
<td>5. The resident should review each patient’s current history, health records, prescription/OTC medication usage, lab results, cost, previous medication adherence and lifestyle to help identify suitable and effective medications used for a variety of cardiac indications such as anticoagulation, antiplatelet therapy, heart rate/rhythm, blood pressure, heart failure, etc.</td>
</tr>
<tr>
<td></td>
<td>6. Data may be collected through the EMR, face to face interviews or other reliable sources of information such as the patient’s pharmacy or nursing home MAR.</td>
</tr>
<tr>
<td></td>
<td>7. In addition to rounds, during the weekly patient case the resident should explain which information is important to collect for the specific disease states which will be presented in the case. e.g. If presenting a patient case on heart failure, the resident displays the information they collected to determine appropriate therapy such as stage of heart failure, labs, current history, lifestyle, socioeconomic factors, access to medications or need for preventative care.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJ R 1.1.4</th>
<th>(Analyzing) Analyze and assess information on which to base safe and effective medication therapy.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>4. The resident will analyze each patient’s health records to identify medication-related problems to discuss with preceptors and cardiology team members.</td>
</tr>
<tr>
<td></td>
<td>5. Examples may include:</td>
</tr>
<tr>
<td></td>
<td>o Lack of indication, unmet medical needs, suboptimal therapy, therapeutic duplication, ADR or potential for and ADR, drug-disease, nutrient, and lab interactions.</td>
</tr>
<tr>
<td></td>
<td>o Harmful social, non-prescription, or other medication therapy.</td>
</tr>
<tr>
<td></td>
<td>o Lack of understanding of medication, non-adherence and the cause, medication discrepancies in care plans, and financial impact.</td>
</tr>
<tr>
<td></td>
<td>6. In addition to rounds, during the weekly patient case the resident should include how they analyzed and assessed the patient’s health records and medication therapy to</td>
</tr>
</tbody>

(Creating) Design or redesign safe and effective patient-centered therapeutic regimens and monitoring plans |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Determine if it was optimal e.g.: If a patient has Afib, they should display therapeutic warfarin levels, whether there are any drug interactions present, is the patient‘s warfarin dose appropriate to receive full benefit of therapy? What is a therapeutic INR?</td>
</tr>
<tr>
<td></td>
<td>1. The resident’s role in cardiology rounds should be to determine potential interventions based on the collection of data and analysis of patient profiles which include current evidence-based, measurable and achievable therapeutic goals.</td>
</tr>
<tr>
<td></td>
<td>2. The resident should take into account patient specific factors such as economics, culture, ethic or emotional needs. Therapy should promote wellness and take into consideration quality of life and promote adherence.</td>
</tr>
<tr>
<td></td>
<td>3. The resident should familiarize themselves with various cardiology medications and how they are monitored.</td>
</tr>
<tr>
<td></td>
<td>4. The resident should plan for effective monitoring for medications that have measurable and obtainable goals which help the patient stay adherent to therapy, prevent adverse events and reflect best evidence. E.g. INR w/warfarin and signs of bleeding or bruising.</td>
</tr>
<tr>
<td></td>
<td>5. The resident should take into account all medications a patient is taking when optimizing therapy to assist the cardiology team who may not be as familiar with medications outside of the cardiology realm.</td>
</tr>
<tr>
<td></td>
<td>6. For the weekly case the resident should also include the patient centered therapeutic regimens and how they should be monitored as described in the above bullets.</td>
</tr>
<tr>
<td>OBJ R1.1.6</td>
<td>(Applying) Ensure implementation of therapeutic regimens and monitoring plans (care plans) by taking appropriate follow-up actions.</td>
</tr>
<tr>
<td></td>
<td>1. During rounds the resident will be responsible to ensure that patients receiving cardiac drugs requiring monitoring such as anticoagulants, anti-arrhythmics, lipid lowering therapies, anti-platelets, beta-blockers, pressors, etc., have appropriate drug levels and labs such as PT/INR, PTT (or any other therapeutic parameters) ordered and reviewed and offer dose modifications to ensure that the patient reaches therapeutic goals, prevents potential adverse events, or drug interactions.</td>
</tr>
<tr>
<td></td>
<td>2. The resident should follow up on all recommendations with physicians, nurse practitioners, patients and caregivers.</td>
</tr>
<tr>
<td></td>
<td>3. The resident should work with patients and their caregivers to make sure they can follow up after discharge with their required monitoring such as with an INR or checking blood pressures.</td>
</tr>
<tr>
<td></td>
<td>4. When the resident presents their weekly patient case they should include a) rationale on why the cardiologist chose a certain regimen for the patient’s cardiac problem(s); b) how</td>
</tr>
</tbody>
</table>
it fits into the current evidence-based guidelines; c) information from the hospital admission on how the patient was monitored for their medications; d) what follow up would be needed once the patient was discharged if there were changes in doses or new medications, e.g., labs; e) how was the medication plan communicated to the patient; f) what steps were put in place and by whom to ensure the patient could obtain their medications and follow up with their physician to ensure the best outcomes?

| OBJ R1.1.7 | (Applying) Document direct patient care activities appropriately in the medical record or where appropriate. | 6. The resident will compose an accurate, concise progress note in Sentri-7 on any direct patient care activities they were involved in during rounds, working in the physicians’ office, cath lab, EKG reading or additional activities they had involvement in with the team.  
7. The resident will be evaluated on the quality of the progress notes they write in terms of being clear, including pertinent information so that other clinical pharmacists can review in time to be useful. A minimum of 2-3 notes per day should be documented. E.g. A note which describes an interesting patient case the resident was part of during rounds in which they learned information only available if one were in rounds.  
8. The resident will be evaluated on the standard duties of a clinical pharmacist including logging in all interventions made into Sentri-7.  
9. Sentri-7 entries should follow all hospital policies and procedures for documentation. |

| OBJ R1.2.1 | (Applying) Manage transitions of care effectively. | 1. The resident should obtain or validate each patient’s medication history for newly admitted patients to determine if any discrepancies exist. The resident should communicate findings to cardiologist/NP.  
2. Provide patient discharge medication reconciliation service for patients on cardiology census when applicable. Provides accurate and timely follow-up with physicians on drug related problems.  
3. If needed, the resident should follow-up with the patient/family/caregiver to make sure steps are in place to assure the patient can obtain and know how to administer medications on discharge. E.g.: high cost anti-coagulants or injectable medications. |

| GOAL R4.1 | Provide effective medication and practice-related education to patients, caregivers, health care professionals, students, and the public (individuals and groups) | 8. The resident will be responsible to provide a final PowerPoint presentation to the physicians and other clinical staff on a cardiology topic and should include educational objectives. |

<p>| OBJ R4.1.1 | (Applying) Design effective educational activities |</p>
<table>
<thead>
<tr>
<th>OBJ R4.1.2</th>
<th><strong>(Applying) Use effective presentation and teaching skills to deliver education</strong></th>

<tr>
<td>9.</td>
<td>This objective relates to actually applying appropriate preceptor roles.</td>
</tr>
<tr>
<td>10.</td>
<td>The resident will be evaluated on how well they match the audience’s needs to the appropriate preceptor role.</td>
</tr>
<tr>
<td>11.</td>
<td>What strategies were applied to help teach? Were the strategies effective?</td>
</tr>
<tr>
<td>12.</td>
<td>For the patient case, did the resident provide adequate background on the disease, drugs and monitoring first (direct instruction)?</td>
</tr>
<tr>
<td>13.</td>
<td>Did the resident use strategies to employ critical thinking such as “think out loud” to help teach the audience how to walk through a problem?</td>
</tr>
<tr>
<td>14.</td>
<td>Did the resident coach the audience with verbal queues, feedback, questions?</td>
</tr>
<tr>
<td>15.</td>
<td>Lastly, did the resident facilitate when appropriate, such as using case based questions? If this was employed and the audience did not know the answers, the resident would be expected to go back to direct instruction or modeling to help the audience solve the problems.</td>
</tr>
</tbody>
</table>

4) **Preceptor Interaction**

Prior to Day 1: Meet to orient resident to the rotation requirements, assign readings and explain evaluation strategy. Additionally orient resident to Sentri-7 and set up dashboard to monitor patients on anti-arrhythmics. Set up cardiology census in Smart Chart.

Week 1: Monday attend morning huddle at 7am in cardiology office and then round with assigned inpatient cardiologist or nurse practitioner. Resident may need to work up patients on Mondays during rounds (on the fly). Wednesday and Fridays 7am morning huddle in cardiology office, come prepared to discuss recommendations or concerns with preceptor and physicians prior to rounds. Round rest of the day. Preceptor will be available to attend and participate in morning huddle and time permitting round with the resident (modeling pharmacist’s role on the health care team). Resident may also be asked to provide pharmaceutical care in cardiologists’ office at the discretion of the attending physician.

Tuesday and Thursday: work with electrophysiologists in EP lab and interventionalists in Cath Lab till 3pm, then spend the rest of the day following up with cardiologists on any recommendations, logging in any interventions made during rounds in Sentri-7, reviewing discharge medication lists and monitoring patient profiles for follow-up with physicians on Wednesday and Friday morning huddles. If possible, pre-round on any patients for the next day’s rounds. Preceptors will be available to discuss patients with resident after pre-rounds. Resident should be prepared to respond to drug information queries by cardiologists in the practice. Cardiology patient case presentation to be held
weekly on Mondays from 2:30-3:30 with pharmacist preceptors and pharmacy students as audience. Resident should be prepared to present a topic of interest to the cardiologists on Fridays as a drug information request or patient case (topic will be assigned by cardiologists early in week).

**Week 2:** Monday attend morning huddle at 7am in cardiology office and then round with assigned inpatient cardiologist or nurse practitioner. Resident may need to work up patients on Mondays during rounds (on the fly). Wednesday and Fridays 7am morning huddle in cardiology office, come prepared to discuss recommendations or concerns with preceptor and physicians prior to rounds. Round rest of the day. Preceptor will be available to attend and participate in morning huddle and time permitting round with the resident (coaching the resident to take on more responsibility on the health care team). Resident may also be asked to provide pharmaceutical care in cardiologists’ office at the discretion of the attending physician.

**Tuesday and Thursday mornings** with electrophysiologists, interventionalists and afternoon in warfarin clinic till 3pm then spend the rest of the day following up with cardiologists on any recommendations, logging in any interventions made during rounds in Sentri-7, and reviewing discharge medication lists and monitoring patient profiles for follow-up with physicians on Wednesday and Friday morning huddles. If possible, pre-round on any patients for the next day’s rounds. Preceptors will be available to discuss patients with resident after pre-rounds. Resident should be prepared to respond to drug information queries by cardiologists in the practice. Cardiology patient case presentation to be held weekly on Mondays from 2:30-3:30 with pharmacist preceptors and pharmacy students as audience. Resident should be prepared to present a topic of interest to the cardiologists on Fridays such as a drug information request or patient case (topic will be assigned by cardiologists early in week).

**Week 3:** Monday through Friday round with inpatient cardiologists till 3pm. Attend 7am morning huddles in cardiologist office MWF. Then afternoon same as Week 1 with resident exhibiting more independence in following and monitoring assigned patients.

**Week 4:** Monday, Wednesday and Fridays same as Week 3, the resident should exhibit more independence in following and monitoring assigned patients and take more leadership role in rounds in terms of recommendations. Tuesday and Thursday work with nurse practitioners until 3pm (Thursday with Gloria observing pacer appointments) then spend the rest of the day the same as Week 2 and Week 3 afternoon activities. Work on any assigned projects including final presentation. Resident will need to get preceptor final approval for Power Point presentation to physicians.

**Weeks 5:** Attend Morning huddles MWF as before at 7am in cardiologist office. Monday and Tuesday work in cardiologist office half day. Then work on afternoon activities the same as previous weeks, prepare for any patients on census for the next day. Wednesday your choice in am such as EP lab, cath lab, hospital rounds. Final presentation at lunchtime. Thursday and Friday mornings round with inpatient cardiologist and afternoon in warfarin clinic. Work on Sentri-7 surveillance, communication with doctors for follow ups and checking medications before discharge on patient profiles. Friday final topic discussion at huddle. Final evaluation Friday afternoon.
Daily rounds time varies by attending schedule. Resident is responsible to complete rounds daily with cardiologist. Morning report/huddle occurs Monday Wednesday and Friday mornings at 7am. Resident is responsible to be on time and prepared. The resident will be assigned their rounding schedule on MWF during the huddle at the cardiology office and Tues/Thursdays they will need to page cardiologist in the am to meet. The resident may spend some time with several doctors or nurse practitioners from the practice and will be expected to be available to help counsel patients in the physician office, assist nurses with following PT/INR results for outpatient warfarin patients. Preceptor meeting will need to be scheduled after completion of rounds to review patients and answer questions and go over census patient for the following day, time permitting, as this may need to occur the following day if rounds run long.

[Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases) will be personalized based upon resident’s abilities and timing of the learning experience during the residency year]

5) **Evaluation Strategy**

PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptors will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences. Feedback from the cardiologist will be provided to the resident based on verbal discussions with the doctors as well as an evaluation form that will be distributed to the doctors on the last day of the rotation.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

1) General Description
The medication safety rotation is a 4 week elective rotation in the PGY-1 residency program at Paoli Hospital.

“Main Line Health is focused on creating a reliable culture of safety. Our Mission is to provide a superior patient experience. Our goal at Main Line Health is to be well ahead in patient safety by eliminating preventable harm.”

All employees of Main Line Health have an important role in ensuring a culture of safety, in error prevention, and in achieving Main Line Health’s mission and goal. Our Safety Behaviors at MLH and the Error Prevention Tools associated with each are:

</tbody>
</table>
2) **Goals of the rotation include:**

5. To assist the resident in identifying ways to improve the medication use system and to minimize the risk of adverse drug events.
6. To provide the opportunity for the resident to develop and participate in various initiatives designed with the goal of making a positive impact toward medication safety in a community hospital setting.
7. To increase the resident’s knowledge of various strategies utilized in medication safety through attendance at hospital meetings and participation in daily tasks associated with medication safety including surveillance tools, reports and communication tools.

**Required meetings:**
- Pharmacy safety huddles (daily in Pavilion Pharmacy)
- Hospital safety coach meeting (monthly on 4th Wednesday of the month from 3:45-5pm)
- Nursing-Pharmacy Patient Safety Committee (formerly CQI Committee) meeting (monthly on 3rd Wednesday of the month from 10-11am)
- Pharmacy Staff meeting (monthly on 3rd Thursday of the month 8am and 1:30pm)
- One day field trip to ISMP which will be arranged for Resident to occur early in rotation.

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the Medication Safety Rotation.

**3) Activities**

<table>
<thead>

will be in the form of a quality improvement project. | medication-use system. (Applying) Implement changes to improve patient care and/or the medication-use system.  

| Exercise leadership and time management skills to achieve departmental goals and fulfill practice responsibilities during this highly independent rotation. | R 3.1.1  

( Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership.  

| Educate staff on medication safety initiative and use audio/visual aids to enhance the effectiveness of communications. Educate staff on ISMP visit. | R 2.2.5  

R 4.1.3  

(Creating) Effectively develop and present, orally and in writing a final project report. (Applying) Use effective written communication to disseminate knowledge.  

| Error prevention tool assignment which includes assessing successes and areas for improvement in one’s performance. Integrate the use of safety tool to demonstrate awareness and practice improvement. | R 3.2.4  

( Applying) Manage one’s own practice effectively.  

| Provide “Safety Jeopardy” Game to staff which includes an educational PowerPoint which addresses Main Line Health Safety Behaviors. Provide the audience with learning objectives, interactive learning and teaching strategies that show rapport with audience and effective presentation skills. Assess learning by including learner participation in question and answers and feedback on the success of the program. | R 4.1.1  

R 4.1.2  

R 4.1.4  

( Applying) Design effective educational activities. (Applying) Use effective presentation and teaching skills to deliver education. (Applying) Appropriately assess effectiveness of education.  

4) Preceptor Interaction

Progression of resident responsibility:
Prior to starting or Day 1 of rotation: Meet with preceptor to review customized medication safety plan and what project initiative(s) will be undertaken by the resident during the rotation. Go over schedule and due dates of assignments, meetings and ISMP visit.

By the rotation midpoint: The resident will have a complete draft for the implementation of a change to the medication use system. Have a list of ideas for staff education. Obtain necessary management/committee approvals. Begin working on Rx newsletter article. Resident will provide
education to their preceptors and staff on visit to the ISMP and any interesting initiatives they may be able to apply to our institution.

**By the end of the rotation:** The resident will complete an implementation in policy or procedures related to the medication use system, educate the staff via a presentation on a medication safety related issue (at the Nursing-Pharmacy Patient Safety Committee meeting, pharmacy staff meeting(s) and in person if needed). Set up, schedule and run the “Safety Jeopardy Game” with pharmacy staff. Complete and submit Error Prevention Tool Quarterly Report with at least one example of how one of these tools was utilized at work.

The resident is expected to be available daily from 8 am to 4:30 pm or longer depending upon meetings, deadlines, emergencies, etc.

*The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and where the rotation occurs in the residency program*

5) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

**Recommended Readings and Websites:**
2. Institute for Safe Medication Practice (ISMP) [Internet]. www.ismp.org

Potential Medication Distribution Projects (Must be approved by preceptors)
- Choose one of the 2016-17 Targeted Medication Safety Best Practices for Hospital from ISMP as a quality improvement project at Paoli Hospital {PDF also located in residency folder} (http://www.ismp.org/Tools/BestPractices/default.aspX)
- ISMP visit inspired quality improvement project
- Staffing request for a medication safety project
- Allergy assessment tool in the ER

Tentative Schedule for 2016-2017 Resident:

**Week one:** Review ISMP target best practices for 2016-2017
Identify drug distribution improvement project
Develop formalized recommendation for improvement and implementation of project
ISMP visit Date to be determined
Provide feedback on ISMP visit with preceptors and staff on quality initiatives at ISMP

*Begin week one and continue throughout rotation:* Work with pharmacy staff to review various reporting tools to identify ADRs and report using STARS Event Reporting System on desktop. Update allergies in Siemens

**Week two:** Obtain necessary approvals from management/committees for project
Educate Staff on targeted medication distribution/workflow improvement project

**Week three:** Continue staff education.
Attend required meetings

**Week four:** Set up, schedule and run the “Safety Jeopardy Game” with pharmacy staff. Turn in Error Prevention Tool Quality Report to preceptors
Outpatient Hematology/Oncology Rotation Learning Activities

    Gregory J. Ochsner, MD

Director of Oncology: Sue Zuk, RN, MSN, AOCN
Administrative Coordinator: Carolyn M. Fansler, RN, BSN, OCN

Jennifer Forster, Nursing Supervisor, 3 Main, Paoli Hospital

1) General Description

The Hematology/Oncology rotation is a 4 week elective rotation in the PGY-1 Pharmacy Residency program.

Goals:

- To develop the Pharmacy Resident’s knowledge base and skill set in providing care for the ambulatory hematology/oncology patient.
- To provide an opportunity for the resident to practice clinical pharmacy in both the chemotherapy and medical oncology clinic settings and interact with a multidisciplinary team in the provision of evidence-based treatment and supportive care.

Description:
The Cancer Center of Paoli Hospital, a Fox Chase Cancer Center Partner, offers an award winning comprehensive and innovative oncology program in the fight against breast, prostate, colorectal, lung and other cancers. The Paoli Hospital Cancer Center which is an ambulatory, outpatient, oncology site attached to Paoli Hospital is recognized by the American College of Surgeons as one of the nation's
best in cancer care programs and includes a well-respected Radiation Oncology Center which is accredited by the American College of Radiology. The Cancer Center at Paoli Hospital is the only institution in Chester County to offer a comprehensive Senior Oncology Program addressing the special health and social needs of the elderly cancer patient, providing them with the most effective therapies, while minimizing side effects and providing support. Main Line Health has additional sites which are also ambulatory, outpatient, oncology satellites serviced by Paoli Hospital pharmacists. These are located at:

Health Center: Collegeville, 599 Arcola Road, Collegeville, PA 19426 and Main Line Health Center at Exton Square, 154 Exton Square Parkway, Exton, PA 19341.

The role of the pharmacist within the cancer center pharmacy is specialized and involves review of patient laboratory values and chemotherapy dosing/regimens to ensure accurate chemotherapy administration. The Pharmacy also assists in preventing or lessening chemo-associated side effects such as nausea and vomiting, anemia, and neutropenia. The chemotherapy pharmacist works closely with physicians, infusion nurses and nurse practitioners to ensure that chemotherapy may be administered safely and effectively.

The specialty practice pharmacist works in collaboration with physicians, nurses, social workers and other ancillary personnel in decisions involving chemotherapy selection and dosing and assists in the evaluation of off-label use(s) for chemotherapeutic agents, provides supportive care when necessary, and acts as an educator/liaison between Nursing, Pharmacy, and the Medical Oncology departments even when new disease or medication-specific standards of care emerge.

The Pharmacy Resident, under the coaching and facilitation of the preceptors, will learn the operation of our pharmacy department in the cancer center and provide care for outpatient oncology patients.

The Pharmacy Resident will be offered the opportunity to make inpatient rounds with the attending physicians from the cancer center when they receive consults. Additionally, the Nurse Manager from 3 Main will notify the Pharmacy Resident when a patient is being admitted for chemotherapy administration. The nurses on 3 Main are chemotherapy certified and responsible for verifying chemotherapy orders on their patients and administering chemotherapy during a patient’s admission. These patients are exclusively admitted onto 3 Main at Paoli Hospital. On occasion these patients may require ICU or PCU admissions and the assigned nurse from 3 Main will still be responsible to administer the chemotherapy. The Nurse Manager and Nurse Supervisor Jennifer Forster from 3 Main is notified 3 days in advance when a patient is being admitted for chemotherapy. They will notify the Pharmacy Resident so that they can take part in the checking of chemotherapy orders based on guidelines, ensure proper anti-emetics and premedications are ordered, etc. The Pharmacy Resident will be responsible to follow these patients during their hospitalization and contact the ordering physician to clarify treatment plans or make therapeutic recommendations after reviewing the patient's medication profile and medical chart for appropriateness of drug therapy.

**Potential Discussion Topics:**

- Chemotherapy-Induced Nausea/Vomiting
- Anemia and Neutropenia
- Constitutional Symptom Management (diarrhea/constipation)
  Additional supportive care topics relevant to cancer patients (pain, neuropathy, depression, mouth care, infection in immunocompromised host, malnutrition/wasting)
- Hypercalcemia of malignancy
- Tumor lysis syndrome
- Malignant effusions
- Oncologic emergencies
- Off-Label Use and Chemotherapeutic Regimen Evaluation
- Clinical Trials or New Drugs in the Pipeline
- Breast and ovarian cancers
- Gastrointestinal Cancers (Colorectal, Pancreatic, Esophageal/Gastric, Biliary/Hepatic)
- Genitourinary Cancers (Prostate, Bladder, Renal Cell, Germ Cell, Cervical, Endometrial, Testicular)
- Lung cancer
- Lymphomas/Leukemias/Multiple Myeloma
- Sarcomas
- Growth kinetics of solid tumors and the implications of cell-cycle kinetics and resistance to chemotherapy
- Rationale of combination chemotherapy; including the way chemotherapy regimens affect cell kinetics
- Purpose and major complications of radiation therapy
- Resources for the Pharmacist in a cancer center

2) Conference and Meeting Attendance
In addition to the learning activities, the Pharmacy Resident is expected to attend the following conferences and meetings.
  a. Chart Rounds on active patients on chemotherapy on the Thursdays from 8-9am in the Malvern Room
  b. Tumor Board every Thursday from 12-1 pm in the Potter Room

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the Hematology/Oncology learning experience.

3) Learning Activities:

<table>
<thead>
<tr>
<th>Activity Detail</th>
<th>Objectives Covered with Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goal R1.3: Prepare, dispense, and manage medications to support safe and effective drug therapy for patients</td>
<td></td>
</tr>
</tbody>
</table>
1) Assume responsibility for providing pharmaceutical care to patients in the oncology clinic in collaboration with preceptor.
2) Resident will assume responsibility for Senior Oncology Patients due for counseling during this time frame in addition to other patients who need counseling.
3) Use effective communication skills, show empathy, respectful, collaborative, cultural competence
4) Identify medication therapy problems taking into account patient health status, risk factors, access to medications and health data.
5) Therapeutic regimens take into account goals, disease state, best evidence, patient/caregiver needs and take into account physical, mental, emotional and financial factors.

**Goal R1.3: Prepare, dispense, and manage medications to support safe and effective drug therapy for patients**

1) Given a chemotherapy order or prescription, the resident will be responsible for reviewing the patient's medication profile and medical chart for appropriateness of drug therapy.
2) The resident will collaborate with members of the interdisciplinary team to clarify the treatment plan or to make recommendations when applicable.
3) The resident will understand therapeutic endpoints in order to evaluate achievement of patient-specific goals.

R 1.3.1 (Applying) Prepare and dispense medications following best practices and organization’s policies and procedures.
R 1.1.6 (Applying) Ensure implementation of therapeutic regimens and monitoring plan by taking appropriate follow-up actions

1) Learn the process for reviewing, processing, preparing and dispensing chemotherapy in ambulatory based cancer center.
2) Demonstrates commitment to medication safety, prioritizes workflow, checks accuracy of dispensed medications and technicians.

R 1.3.3 (Applying) Manage aspects of the medication-use process related to oversight of dispensing.

1) The resident will be a visible, integral member of the interdisciplinary team by providing pharmaceutical recommendations, drug information and pharmacy support upon request while conducting themselves in a professional, cooperative manner.
2) In addition, be prepared to evaluate off-label indications for chemotherapeutic agents and regimens, both for safety and efficacy parameters.

R 1.1.1 (Applying) Interact effectively with health care teams to manage patients’ medication therapy
R 1.1.6 (Applying) Ensure implementation of therapeutic regimens and monitoring plan by taking appropriate follow-up actions
1) Demonstrate understanding of pharmacodynamic/pharmacokinetic principles when analyzing patients' medication profiles to determine if any therapeutic recommendations are necessary for clinically significant drug interactions, dosing, and monitoring of drug therapy (example: anemia management, nausea and vomiting, chemotherapy dose changes based on toxicity).

R 1.1.3 (Analyzing) Collect information on which to base safe and effective medication therapy
R 1.1.4 (Analyzing) Analyze and assess information on which to base safe and effective medication therapy.

1) Document patient care activities where applicable in Sentri-7 daily.

R1.1.7 (Applying) Document direct patient care activities appropriately in the medical record or where appropriate

<table>
<thead>
<tr>
<th>Goal R3.1: Demonstrate leadership skills</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attend cancer center interdisciplinary meetings</td>
</tr>
</tbody>
</table>

R 3.1.1 (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership

<table>
<thead>
<tr>
<th>Goal 4.1: Provide effective medication and practice-related education to patients, caregivers, health care professionals, students and the public (individuals and groups)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Read necessary/assigned materials and be prepared to discuss with the preceptor, the management of selected disease states as it pertains to the ambulatory oncology population.</td>
</tr>
<tr>
<td>2) Topic discussions will occur once a week on Wednesday afternoons (subject to change) with Attending Physician.</td>
</tr>
</tbody>
</table>

R4.1.2 (Applying) Use effective presentation and teaching skills to deliver education.
R4.1.3 (Applying) Use effective written communication to disseminate knowledge

<table>
<thead>
<tr>
<th>Goal 4.2: Effectively employ appropriate preceptor roles when engaged in teaching students, pharmacy technicians, or fellow health care professionals.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) When applicable, assist in precepting Pharmacy students</td>
</tr>
</tbody>
</table>

R4.1.1 (Applying) Design effective educational activities
R4.1.2 (Applying) Use effective presentation and teaching skills to deliver education.
R4.1.3 (Applying) Use effective written communication to disseminate knowledge
R4.1.4 (Applying) Appropriately assess effectiveness of education
on rotation, by presenting hematology/oncology drug class reviews and one patient case presentation.

2) Residents should identify applicable preceptor roles for the presentation which may include direct instruction, modeling, coaching and facilitating.

3) Residents should provide adequate background to assess knowledge and understanding of learners and use think aloud strategies, verbal feedback and questions to facilitate learner independence. Ex. Provide fill in blanks on a hand out to assess learning.

educational activities
R4.1.2 (Applying) Use effective presentation and teaching skills to deliver education.
R4.1.3 (Applying) Use effective written communication to disseminate knowledge
R4.1.4 (Applying) Appropriately assess effectiveness of education
R4.2.1 (Analyzing) When engaged in teaching, select a preceptor role that meets learners’ educational needs.
R4.2.2 (Applying) Effectively employs preceptor roles, as appropriate.

4) Preceptor Responsibilities:

- Day One orients Pharmacy Resident to the cancer center. Have the Pharmacy Resident review terminology. Calculate an ANC and a BSA.
- Serve as a role model for the provision of pharmaceutical care.
- Enhance Pharmacy Resident's current understanding of commonly encountered rotation disease states and pharmacology.
- Help establish an evidence-based approach to the provision of pharmacotherapy to patients on the current rotation.
- Show Pharmacy Resident how to double check and enter chemotherapy orders in computer.
- After instruction allow Pharmacy Resident to prepare chemotherapy using aseptic technique.
- Teach Pharmacy Resident to review chemotherapy orders for the following day.
- Assist in topic discussions.
- Provide prompt and effective feedback to ensure a valuable learning experience.

[The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and where the rotation occurs in the residency program]
5) **Evaluation Strategy**

PharmAcademic software will be used for documentation of scheduled evaluations (see chart below). The Pharmacy Resident and the Preceptors will independently complete the assigned evaluation and save as a Draft. The Pharmacy Resident and the Preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- **Formative Assessments:** The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- **Summative Evaluation:** This evaluation summarizes the Pharmacy Resident’s performance throughout the learning experience. Specific comments should be included to provide the Pharmacy Resident with information to use to improve performance in subsequent learning experiences. The preceptors will collaborate and provide one evaluation of the resident based on the activities they were directly involved with teaching and/or observing.
- **Rotation Handoff:** The preceptor will provide valuable information for future preceptors on various skills, knowledge, projects, attendance, problem-solving, professionalism, communication, initiative and progress towards achieving individual and residency goals and objectives for the residency program.
- **Preceptor and Learning Experience evaluations** must be completed by the last day of the learning experience.

1) General Description
The Information Technology rotation is a 4 week elective rotation in the PGY-1 residency program at Paoli Hospital. The resident will be required to work in the Pharmacy Information Technology Department of Main Line Health System and with the PIVOT team.

Goals of the rotation include:

1. To expose the resident to the evolution of Main Line Health System’s medication-use system by applying pharmacy informatics principles, standards, and best practices.
2. To provide the opportunity for the resident to gain basic understanding of the language and concepts of information technology (IT) thereby equipping the resident to function in the interdisciplinary environment of informatics project teams.
3. To promote and advance the professional duties and responsibilities of a pharmacy informatics specialist.

Meeting Attendance
In addition to the learning activities, the resident is expected to attend the following meetings:
Pharmacy and Therapeutics meetings on the 4th Wed of the Month on site at BMH alternating with the 4th Tues of the Month via teleconference at PH from 7-8:30am.

b. Pharmacy Leadership meetings on the 2nd Wed of each month from 2-4pm.
c. Clinical meetings on the 1st Tues of each month from 2-4pm.
d. Directors Meeting which occur once a month.
e. IT workgroup meetings/conference calls/project - meeting dates and times are based on projects
f. MAK Advisory Council Meetings
g. Clinical Informatics Council meetings during the 4th week of each month
h. Committee to Improve Chemotherapy Order Entry Process in Ambulatory Procedure Care Units
i. PYXIS Disaster Recovery Plan Meetings

2) **Pharmacy Informatics Topics**
The resident will have the opportunity to explore the following practice areas within the field of pharmacy informatics:

- Computerized prescriber order entry (CPOE) for electronic medication ordering integrated with electronic health records (EHRs) and pharmacy information systems.
- Clinical decision support tools that bring best practice information and guidelines to clinicians at the time it is needed and rules-based systems for monitoring, evaluating, responding, and reconciling medication-related events and information.
- Pharmacy information systems that allow electronic validation of medication orders in real time, provide the data flows needed to update both the medication administration record (MAR) and order-driven medication dispensing systems, and support such operational activities as supply chain management and revenue compliance.
- Automated dispensing cabinets and robotics integrated and/or interfaced with pharmacy information systems.
- Integrated medication administration management systems that enable bar code medication administration and use of “smart” infusion pumps.
- Integrated medication surveillance applications for medication incident and adverse event reporting.

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective. Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the Medication Safety Rotation.

3) **Activities**

<table>
<thead>

R 2.1.4

R 1.3.1
R 1.3.2

R 1.3.3

R 2.1.3

R 4.1.2
2. Provide staff education to PIVOT team on an assigned topic

Goals and Objectives Defined

Goal R1.1: In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients, including those with multiple co-morbidities, high risk medication regimens, and multiple medications following a consistent patient care process.
   - **OBJ R 1.1.1 (Applying)**
     Interact effectively with health care teams to manage patients’ medication therapy.
   - **OBJ R 1.1.3 (Analyzing)**
     Collects information on which to base safe and effective medication therapy.
   - **OBJ R 1.1.4 (Analyzing)**
     Analyze and assess information on which to base safe and effective medication therapy.

Goal R1.3: Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.
   - **OBJ R 1.3.1 (Applying)**
     Prepare and dispense medications following best practices and the organization’s policies and procedures.
   - **OBJ R 1.3.2 (Applying)**
     Manage aspects of the medication-use process related to formulary management.
   - **OBJ R 1.3.3 (Applying)**
     Manage aspects of the medication-use process related to oversight of dispensing.

Goal R2.1: Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.
   - **OBJ R 2.1.3 (Analyzing)**
     Identify opportunities for improvement of the medication use system.
   - **OBJ R 2.1.4 (Applying)**
     Participate in medication event reporting and monitoring.

Goal R3.2: Demonstrate management skills
   - **OBJ R 3.2.3 (Applying)**
     Contribute to department management.

Goal R4.1: Provide effective medication and practice-related education to patients, caregivers, health care professionals, students, and the public (individuals and groups)
   - **OBJ R 4.1.2 (Applying)**
     Use effective presentation and teaching skills to deliver education.

4) Preceptor Interaction and Resident Responsibilities:
Week 1-2: @ PIVOT office

- On the first day, meet preceptor at 8 am for orientation. Review rotation requirements and evaluation strategy. Assign readings, e-learnings, and weekly meeting schedule.
- Learn about Epic EHR implementation at MLH. Work with preceptor and other PIVOT staff members to explore the Epic platform. Attend meetings and work groups as assigned by preceptor. Participate in discussions related to information technology as they come up during the work day. Develop educational program for staff (PIVOT or Pharmacy).

Weeks 3-4: @ Bryn Mawr Hospital

- On the first day, meet with preceptor at 9am for orientation. Review rotation requirements and evaluation strategy. Assign meeting schedule and potential project ideas.
- Learn about current state within Siemens’s EHR. Work with preceptor and other IT staff members to explore the Siemens’s platform including Soarian, MAK, and pharmacy applications. Work with Patricia Pawling MAK System Administrator, Clinical Informatics for 1 to 2 days. Resident should be cognizant of practice standards and other evidence such as National Quality Measures, ISMP alerts, and Joint Commission sentinel alerts when making recommendations.
- Resident will be assigned a project which will improve the overall quality of some aspect of the current medication-use system using a best-practices model. This may be in response to or reconciling of a medication-related event.

[The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and where the rotation occurs in the residency program]

5) Evaluation Strategy
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences. The preceptors will collaborate and provide a joint evaluation of the resident at the based on the activities they were directly involved with teaching and/or observing.
- Rotation Handoff: Rotation Handoff: The preceptor will provide valuable information for future preceptors on various skills, knowledge, projects, attendance, problem-solving, professionalism, communication, initiative and progress towards achieving individual and residency goals and objectives for the residency program.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

Office for Pain and Palliative Care Paoli Team Members Room 425 Main Bldg.

1) **General Description**

Pain and Palliative Care is a 4 week elective learning experience at Paoli Hospital. This program is designed to provide the resident with training in understanding how to assess and manage pain and symptoms in a variety of patient populations in an inpatient setting.

The pharmacy resident is responsible for participation in gathering a pain and symptom assessment, making recommendations for both pain and adjunctive medications, and following up with patients and their caregivers to assess medication therapy in order to make necessary modifications to the care plan. Education to patients, their caregivers and clinical staff including physicians are crucial elements of the rotation as pain management may have a direct impact on a patient’s overall outcome. Perception of pain, definitions of types of pain, patient safety and hospital performance as they relate to patient outcomes will be an integral theme of the rotation.

Good communication and interpersonal skills are vital to success in this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

2) **Disease States**

Common therapeutic areas in which the resident will be expected to gain proficiency through literature review, topic discussion and/or direct patient care experience including but not limited to:

- End of life care
During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the critical care learning experience.

3) Activities

<table>
<thead>
<tr>
<th>Goals and Objectives</th>
<th>Description</th>
<th>Activity Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goal R 1.1</td>
<td>In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients, including those with multiple co-morbidities, high-risk medication regimens, and multiple medications following a consistent patient care process.</td>
<td></td>
</tr>
<tr>
<td>OBJ R 1.1.1</td>
<td>(Applying) Interact effectively with health care teams to manage patients’ medication therapy.</td>
<td>10) Residents will actively participate in pain and palliative care interdisciplinary rounds weekly. 11) During rounds, the resident should display respectful and cooperative communication with the palliative care team. 12) The resident should support safe and effective medication therapy to help manage patient’s pain.</td>
</tr>
<tr>
<td>OBJ R 1.1.2</td>
<td>(Applying) Interact effectively with patients, family members, and caregivers</td>
<td>1. Residents will be responsible for providing effective counseling to patients and their caregivers/family related to new or existing pain management therapy-this may include hospice, palliative, acute or chronic pain patients. 2. Residents should show empathy, cultural</td>
</tr>
</tbody>
</table>
| OBJ R 1.1.3 | (Applying) Collect information on which to base safe and effective medication therapy. | 1. The resident will be required to accurately gather and organize patient specific information on assigned patients prior to formal consult with the pain and palliative care team. 
2. The resident should review each patient’s current history, health records, prescription/OTC medication usage, lab results, cost, previous medication adherence and lifestyle to help identify suitable and effective pain and adjunctive therapy. 
3. Data may be collection through the EMR, face to face interviews or other reliable sources of information. |
| OBJ R 1.1.4 | (Analyzing) Analyze and assess information on which to base safe and effective medication therapy. | 7. The resident will analyze each patient’s health records to identify medication-related problems to discuss with preceptor and the pain and palliative care team. 
8. Examples may include: 
   o Lack of indication, unmet medical needs, suboptimal therapy, therapeutic duplication, ADR or potential for and ADR, drug-disease, nutrient, and lab interactions. 
   o Harmful social, non-prescription, or other medication therapy. 
   o Lack of understanding of medication, non-adherence, medication discrepancies in care plans, and financial impact. |
| OBJ R 1.1.5 | (Creating) Design or redesign safe and effective patient-centered therapeutic regimens and monitoring plans (care plans) (Applying) Ensure implementation of therapeutic regimens and monitoring plans (care plans) by taking appropriate follow-up actions. | 1. The resident will make recommendations for initiation of pain medications and adjunctive therapies to manage nausea, constipation, anxiety, insomnia, etc. to preceptor/pain and palliative care team that optimize medication therapy, are ethical, incorporate patient specific factors/needs, promote wellness, and are achievable goals. 
2. Develop a working knowledge of current literature, terminology and best practices in the treatment of pain and palliative care. |
such as the multi-modal therapy approach.

3. Develop a clear understanding of hospital outcomes on pain management including Press-Ganey and HCAHPS scores and online sources comparing hospitals across the nation such as [www.hospitalcompare.hhs.gov](http://www.hospitalcompare.hhs.gov)

4. Recommendations should be persuasive yet respectful and convey expertise.

5. The resident should ensure recommendations are communicated to the patient/caregiver and include monitoring plans, address health related problems, expectations for pain control, handling and administration of the medication regimen.

6. Patient/caregiver should be instructed on when to follow up with their provider/pharmacist to achieve therapy goals.

<table>
<thead>
<tr>
<th>OBJ R 1.1.7</th>
<th>(Applying) Document direct patient care activities appropriately in the medical record or where appropriate.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The resident will assist in composing pain and palliative care consult note with preceptor/pain and palliative team member in the patient’s electronic medical record.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Goal R 1.3</th>
<th>Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R 1.3.2</td>
<td>(Applying) Manage aspects of the medication-use process related to formulary management.</td>
</tr>
<tr>
<td>1. The resident will follow appropriate procedures regarding exceptions to the formulary such as restricted medications. Ensure non-formulary medications are dispensed, administered and monitored in a manner that ensures patient safety.</td>
<td></td>
</tr>
<tr>
<td>2. Familiarize themselves with the process of entering orders in CPOE for the purposes of understanding the prescriber’s perspective on viewing order sets etc. Expected drug classes covered include: non-narcotic and narcotic pain medications, benzodiazepines, sedative hypnotics, non-prescription sleep aids, anticonvulsants, antiemetics, laxatives.</td>
<td></td>
</tr>
<tr>
<td>3. Make conscious formulary decisions based on cost and patient financial</td>
<td></td>
</tr>
<tr>
<td>GOAL R 2.1</td>
<td><strong>Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.</strong></td>
</tr>
<tr>
<td>------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>OBJ R 2.1.3</td>
<td>(Analyzing) Identify opportunities for improvement of the medication-use system</td>
</tr>
<tr>
<td></td>
<td>1. The resident will be required to participate in a process improvement project which will be related to the area of pain and/or palliative care.</td>
</tr>
<tr>
<td></td>
<td>2. The resident may identify an opportunity for improvement or be assigned a project.</td>
</tr>
<tr>
<td></td>
<td>3. The resident should utilize best practices such as National Quality Measures, ISMP etc.</td>
</tr>
<tr>
<td></td>
<td>4. The resident should demonstrate pharmacy concerns, solutions and interests to the pain and palliative care team using health information technology or automated systems to assist in improvements.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>GOAL R 4.1</th>
<th><strong>Provide effective medication and practice-related education to patients, caregivers, health care professionals, students, and the public (individuals and groups)</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R 4.1.1</td>
<td>(Applying) Design effective educational activities</td>
</tr>
<tr>
<td></td>
<td>1. Provide a final PowerPoint presentation on a topic of interest to the palliative care/pain management team members.</td>
</tr>
<tr>
<td></td>
<td>2. The resident should define educational objectives which address the audience learning needs.</td>
</tr>
<tr>
<td></td>
<td>3. The residents should incorporate teaching methods which match the learner and should be evidence based and timely reflecting best practices. References should be cited.</td>
</tr>
</tbody>
</table>

| OBJ R 4.1.2 | (Applying) Use effective presentation and teaching skills to deliver education |
|            | 1. The final PowerPoint presentation should capture the audience’s interest throughout and should include active audience participation. |
|            | 2. The resident will be evaluated on speaking skills, body language, smooth transitions between concepts, using effective handouts/visual aids which help support learning and summarize important points throughout the presentation. |
4) **Preceptor Interaction**

Pre-rounds with resident and assignment of patients
Interdisciplinary team rounds on Wednesdays 9-10am Office 424 (4-Main)
Daily consults completed
Project management
Expect daily hours to be 8:30am to 5:30-6pm

**Interdisciplinary Team members**
Cynthia Wagner, CRNP  Manager (Full time divided amongst MLH hospitals)
Mary O’Hare, CRNP Nurse Practitioner (3 days/week)
Lynn Wolff, CRNP Nurse Practitioner (Full time)
Susan McAndrew, RN Coordinator (4 days/week)
Teresa Holman, CRNP (20 hours/week)
Sandy O’Haire, CRNP (3 days/week)
Sandra Urtishak, MD (1 day week: Wednesday)
Adam Tyson, MD
Kiyo Yoda, Pharm-D (Full-time in Pharmacy)
Barbara Emery, Chaplain (Full-time for hospital)
Barbara Jordan, Volunteer

**Expected progression of resident responsibility on this learning experience:**
Prior to Day 1: Assigned reading will be in “Shared Drive Paoli Residency Program” under Rotations: Pain and Palliative Folder (Z:\Rotations\Pain-Palliative) to prepare for rotation
Prior to Day 1: Primary preceptor to review Pain and Palliative learning activities and expectations with resident and Pain management team roles and scope of practice

- **Week 1:** Resident to work up assigned patients prior to team rounds or consults. Resident to round with preceptor and work on any assigned projects. Preceptor will allow resident to observe and participate more actively in rounds or meetings as the week progresses.
- **Week 2:** Resident to work up assigned patients and ask questions for clarification to preceptor prior to team rounds or consults. Preceptor will be present and participate in rounds or problem resolution (coaching the resident to take on more responsibility on health care team).
- **Week 3-4:** Patient and caregiver education will also be provided by the resident after modeling by preceptor. In addition week 2 activities will continue with more independence of resident in following and monitoring assigned patients. Work on any assigned projects including final presentation.

**[The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and where the rotation occurs in the residency program]**

5) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

1) General Description
The General Pediatrics/NICU rotation is a 4 week elective rotation in the PGY-1 residency program at Paoli Hospital.

Goals of the rotation include:
1. To expand the resident's basic understanding of disease states encountered in pediatric medicine.
2. To provide the resident with clinical knowledge and skills in the application of therapeutics which will include proper drug therapy selection, patient monitoring, pharmacokinetics, patient education, drug administration and delivery of pharmaceutical care in the pediatric hospitalized patient.
3. To provide the opportunity for the resident to become an integral member of the medical team through collaboration and rounds.
4. To assist the resident in developing a variety of skills including decision-making, teaching, and communication skills in the specialized pediatric environment.
5. To provide the resident with the opportunity to develop treatment plans in the pediatric population.

Description
The Paoli Hospital PGY-1 Pharmacy Practice Residency Program has teamed up with Nemours/Alfred I. DuPont Hospital for Children. The hospital is located on a 300 acre estate in Wilmington, Delaware, which is one of the nation’s largest pediatric health systems. Nemours/Alfred I. DuPont Hospital for Children is a 190 bed multi-specialty, tertiary care teaching institution. The health system offers advanced inpatient and outpatient pediatric care in more than 30 specialties. Nemours/Alfred I. DuPont Hospital for Children has an established PGY-1 Pharmacy Residency Program exclusively in pediatric medicine which is designed to develop compassionate, clinically superior pharmacists who are seeking a career in hospital practice or further specialize in pediatric care. The rotation will expose the resident to direct patient care for a variety of pediatric disease states. The resident will participate in services provided to the patients located on the general pediatrics units of the hospital. A variety of disease states are managed in the general pediatrics unit including respiratory illness, gastrointestinal illness, etc. The resident will work with medical residents, nurses, aides, attending physicians and the precepting pharmacist to implement pharmaceutical care plans, and to prevent and solve medication therapy issues. The resident will also be provided with experiences in the NICU as well as working in the area of antimicrobial stewardship in pediatrics.

Conference and Meeting Attendance
In addition to the learning activities, the resident is expected to attend the following conferences and meetings.

a. Pediatric Grand Rounds every Wednesday at 8:00am.

2) Disease States
Core Content that resident should be familiar with
- Asthma
- RSV bronchiolitis
- Cystic Fibrosis
- Kawasaki’s Disease
- MRSA
- Gastroesophageal reflux disease
- Seizures
- Neonatal sepsis
- Pneumonia

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective. The resident will gradually assume responsibility for all of the patients within the assigned unit. The PGY1 resident must devise efficient strategies for accomplishing required activities in a limited time frame.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the critical care learning experience.

### 3) Activities

<table>
<thead>
<tr>
<th>Goals and Objectives</th>
<th>Description</th>
<th>Activity Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal R1.1</strong></td>
<td>In collaboration with the health care team, provide safe and effective patient care to a diverse range of patients, including those with multiple co-morbidities, high-risk medication regimens, and multiple medications following a consistent patient care process.</td>
<td></td>
</tr>
</tbody>
</table>
| OBJ R 1.1.1          | (Applying) Interact effectively with health care teams to manage patients’ medication therapy. | 1. The resident will attend patient care rounds daily with either the Blue team or the Gold Team around 9:30-10 am  
2. During rounds, the resident should display respectful and cooperative communication with the interdisciplinary team.  
3. The resident should support safe and effective medication therapy for the pediatric patient.  
4. Respond to requests for drug information or literature searches from other healthcare professionals/preceptor. |
| OBJ R 1.1.2          | (Applying) Interact effectively with patients, family members, and caregivers | 1. The resident will provide patient/family/caregiver counseling when needed.  
2. The resident should display appropriate language for pediatric patients, show empathy, and cultural competence.  
3. The resident should help pediatric patients and their families/caregivers feel empowered to take responsibility for their health.  
    - For example: demonstrate proper inhaler or insulin injection technique, blood sugar, peak flow meter use or other self-monitoring. |
<table>
<thead>
<tr>
<th>OBJ R 1.1.3</th>
<th>(Applying) Collect information on which to base safe and effective medication therapy.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. The resident will generate and review patient pharmacy profiles every morning.</td>
</tr>
<tr>
<td></td>
<td>2. Daily review of pertinent laboratory data and information on the MAR, EMR.</td>
</tr>
<tr>
<td></td>
<td>3. The resident should ensure patient height/weight, age, gender, renal, hepatic function and vaccine records are accurately collected.</td>
</tr>
<tr>
<td></td>
<td>4. Organize, clarify and review medical and social history, medication adherence, lifestyle preferences, socioeconomic factors and any previous adverse reactions to medications.</td>
</tr>
<tr>
<td></td>
<td>5. The resident should obtain the most reliable information requiring in some cases face to face discussions with patient’s family/caregivers.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OBJ R 1.1.4</th>
<th>(Analyzing) Analyze and assess information on which to base safe and effective medication therapy.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. The resident should take all collected information to identify any medication related problems. Data may be collected during rounds to help clarify information collected by EMR.</td>
</tr>
<tr>
<td></td>
<td>2. Provide assistance for all drug-related questions or problems that are identified on rounds.</td>
</tr>
<tr>
<td></td>
<td>3. Follow drug level and therapeutic monitoring on Vancomycin, Aminoglycosides, and Anticonvulsants.</td>
</tr>
<tr>
<td></td>
<td>4. Identify patients for potential conversion from IV to PO therapy when appropriate.</td>
</tr>
<tr>
<td></td>
<td>5. Identify pediatric patients who have a lack of indication for a medication, unmet medication need such as pain, constipation, diarrhea, fever, nausea etc.</td>
</tr>
<tr>
<td></td>
<td>6. Identify pediatric patients with suboptimal medications in terms of dose, dosage form, duration, route and method of administration. (Ex. Unable to swallow tablet convert to liquid formulation); therapeutic duplications, potential for ADR or actual ADR, drug-drug, lab, disease, nutrient interactions/potential for these interactions.</td>
</tr>
<tr>
<td></td>
<td>7. Financial impact to a patient’s family due to medications should be considered, lab monitoring needed, lack of understanding of therapy and non-adherence.</td>
</tr>
</tbody>
</table>
| OBJ R 1.1.5 | (Creating) Design or redesign safe and effective patient-centered therapeutic regimens and monitoring plans (care plans) | 1. The resident will design/redesign a therapeutic regimens and monitoring plans for all age pediatric patients and communicate recommendations with the medical team which use best evidence, address specific patient needs, and address quality of life, patient disease states and goals of therapy.  
2. Recommendations for initiation of medications and adjunctive therapies should display an understanding of an array of pediatric conditions, should optimize medication therapy.  
3. Monitoring plans should include therapeutic goals, ensure appropriate/timely follow up, include safety and adherence parameters, be cost-effective and measure potential for any side effects/adverse events.  
   - Ex: Monitor patients on TPN for adequate fluid and calorie intake  
4. Develop a working knowledge of current literature, terminology and best practices in the treatment of pediatric conditions and apply this during rounds with the medical team. |
| OBJ R 1.1.6 | (Applying) Ensure implementation of therapeutic regimens and monitoring plans (care plans) by taking appropriate follow-up actions | 1. The resident should communicate therapeutic decisions or changes with the pharmacy staff, preceptor and/or medical team.  
2. The resident should ensure recommendations are communicated clearly to the patient/caregiver and include monitoring plans, address health related problems, expectations for resolution of symptoms, handling and administration of the medication regimen. Ex. Include written directions if necessary,  
3. The resident should exhibit responsible, professional behavior when a patient refuses treatment and offer solutions, skillfully diffuse negative reactions, and work collaboratively with the medical team and patient/caregiver/family.  
4. Patient/caregiver/family should be instructed on when to follow up with their provider/pharmacist to achieve therapy goals.  
5. Recommendations should be persuasive yet respectful and convey expertise. |
<p>| OBJ R 1.1.7 | (Applying) Document direct patient care activities appropriately in the medical | 1. The resident should document interventions after consultation with preceptor using health system’s policies/procedures. |</p>
<table>
<thead>
<tr>
<th>GOAL R1.3</th>
<th>Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R 1.3.1</td>
<td>(Applying) Prepare and dispense medications following best practices and organization’s policies and procedures.</td>
</tr>
</tbody>
</table>
| 1. | The resident will be responsible to assist preceptor with verification of pharmacy orders and TPN’s by:  
   - Correctly interpreting appropriateness of medication before preparing/distributing the first dose; this includes contacting prescribers to clarify/verify dosages or other medication-related issues. |
| 2. | The resident may prepare medications after orientation to organization’s policies, procedures, standards, equipment ensuring quality and safety. |
| 3. | The resident should maintain accuracy and confidentiality of patient’s protected health information. |

<table>
<thead>
<tr>
<th>GOAL R2.1</th>
<th>Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R 2.1.4</td>
<td>(Applying) Participate in medication event reporting and monitoring.</td>
</tr>
<tr>
<td>1.</td>
<td>Report and document medication errors and/or adverse drug events when identified using institution’s available technology, policies and procedures.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>GOAL R4.1</th>
<th>Provide effective medication and practice-related education to patients, caregivers, health care professionals, students, and the public (individuals and groups)</th>
</tr>
</thead>
<tbody>
<tr>
<td>OBJ R 4.1.1</td>
<td>(Applying) Design effective educational activities</td>
</tr>
<tr>
<td>1.</td>
<td>The resident will be required to present weekly topic discussions with preceptor once a week.</td>
</tr>
<tr>
<td>2.</td>
<td>The resident will provide an in-service to the medical team or nursing staff, as well as, to the pharmacy staff on a relevant topic of interest in pediatrics.</td>
</tr>
<tr>
<td>3.</td>
<td>The resident should define educational objectives which address the target audience learning needs</td>
</tr>
<tr>
<td>4.</td>
<td>The residents should incorporate teaching methods which match the learner and should be evidence based and timely reflecting best practices. References should be cited.</td>
</tr>
<tr>
<td>OBJ R 4.1.2</td>
<td>(Applying) Use effective</td>
</tr>
</tbody>
</table>
| 1. | The in-service should capture the audience’s interest throughout and should include active
<table>
<thead>
<tr>
<th>OBJ R 4.1.3</th>
<th>(Applying) Use effective written communication to disseminate knowledge.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>1. The resident should at all times write in a manner that is easy to understand and be free of errors.</td>
</tr>
<tr>
<td></td>
<td>2. Written presentations should include a critical evaluation of the literature, advancements in pediatric practice/medicine and summarize what the resident has learned from their research.</td>
</tr>
<tr>
<td></td>
<td>3. The resident should adjust content for the audience level of knowledge and incorporate tables, graphs; figures to enhance audience understanding of the topics presented. Ex: Is the intended audience the public, a pediatric patient, parent, pharmacist, student, physician?)</td>
</tr>
<tr>
<td></td>
<td>4. Appropriate reference citations will be required.</td>
</tr>
</tbody>
</table>

4) **Preceptor Responsibilities/Interaction:**

- Serve as a role model for the provision of pharmaceutical care.
- Enhance resident's current understanding of commonly encountered rotation disease states and pharmacology.
- Help establish an evidence-based approach to the provision of pharmacotherapy to patients on the current rotation.
- Assist in topic discussions
- Provide prompt and effective feedback to ensure a valuable learning experience.
- Expected progression of resident responsibilities on this learning experience: (length of time preceptor spends in each of these phases will be personalized based upon resident’s abilities and timing of the learning experience during the residency year).

**Prior to Day One, Resident responsible to review required readings.**
Expected progression of resident responsibility on this learning experience:

Day 1:  Meet at assigned time to orient resident to the rotation requirements, assign readings, explain evaluation strategy, as well as, a discussion of the resident’s personal goals. Throughout the rotation, the resident will be provided with day-to-day verbal feedback.

Week 1:  Resident to work up patients for assigned patient care areas and present to preceptor prior to rounds. Preceptor will attend and participate in rounds with the resident (modeling pharmacist’s role on the health care team). Resident will work with preceptor to monitor and make therapy recommendations on patients throughout the hospital. Weekly topic discussion.

Week 2:  Resident to work up patients for assigned patient care areas and present to preceptor prior to rounds. Preceptor will attend and participate in rounds with the Resident (coaching the resident to take on more responsibility on the health care team). Resident will work with preceptor to monitor and make therapy recommendations on patients throughout the hospital. Begin vancomycin and aminoglycoside pharmacokinetics when applicable. Weekly topic discussion. Work on final in-service presentation.

Weeks 3-4:  In addition to week 2 activities the resident should exhibit more independence in following and monitoring assigned patients and take more leadership role in rounds in terms of recommendations. Work on any assigned projects. Present final in-service presentation.

5) Evaluation Strategy
PharmAcademic will be used to document written feedback and evaluations (see chart below). The resident and the preceptor will independently complete their assignments and save them as a draft. The resident and preceptor will discuss all written feedback and evaluations commenting on both the residents’ performance of the activities and the accuracy of their self-assessment skills. After the discussion all items will be signed in PharmAcademic.

- Formative Assessments: these will be used to provide the resident with ongoing, activity focused, measurable, and constructive feedback
- Summative Evaluation: this will summarizes the resident’s performance throughout the learning experience while providing them with specific comments and examples which they can use to improve their performance in subsequent learning experiences
- Preceptor/Learning Experience Evaluation: this will be used to provide the preceptor with constructive feedback about their teaching style and the overall rotation which can be used to improve the learning experience in the future

Dr. Michael Dabrow (left) meets with patient Mary Jane McCrystal (center) of West Chester and oncology nurse Joann Moore. Dabrow, medical director of the Cancer Center of Paoli Hospital

1) **General Description and Background**

The Senior Oncology Program rotation is a longitudinal rotation in the PGY-1 pharmacy residency program. The Cancer Center at Paoli Hospital under the direction of the medical director Dr. Michael Dabrow has developed a Senior Oncology Program to address the unique health needs and social services of elderly cancer patients. All patients 70 years and older with a newly diagnosed cancer are evaluated. These patients receive a comprehensive geriatric assessment prior to starting treatment to help tailor therapy to meet their needs and improve their quality of life and outcomes. Goals of the Senior Oncology Program are to provide the most effective therapies, minimize side effects with other co morbidities and to maintain their ability to perform activities of daily living. The Senior Oncology Program using screening tools to assess for dementia, depression, risk of falls and social support. The program includes social work; geriatric oncology trained nurses, dieticians, physical therapists as well as pharmacists. The role of the pharmacist in the Senior Oncology Program is to provide support in terms of medication review and counseling with enrolled patients. This occurs every 3 months when patients have their comprehensive multidisciplinary review. Patients bring in their medications and nursing is responsible to update their written medication list in the chart. The pharmacist is responsible to obtain the medication list, review the medications for expected side effects and drug interactions. The pharmacist then meets with the patient during their chemotherapy treatment to answer questions about medications, mark the medication list as reviewed, make a notation on the Senior Oncology
Management Schedule Form in the chart and complete a Senior Oncology Program Pharmacist Medication Evaluation form which is placed in the chart. If the pharmacist finds any medication issues they can contact the oncologist, oncology nurse or patient’s primary care physician (PCP). All patients enrolled in the program have letters send to their PCP who is aware of the medication review and potential phone calls from pharmacists counseling their patients receiving chemotherapy treatments.

2) **Goals of Rotation**
This rotation will give the resident exposure to ambulatory care in a busy hospital based cancer center. Additionally residents will utilize their counseling skills and develop rapport with seniors from the local community. This rotation will require the resident to familiarize themselves with chemotherapy regimens and supportive care treatments and to develop skills in patient counseling and detecting and correcting medication related problems with a focus on the senior/geriatric population ultimately with the goal of improving patient outcomes.
Core Content which will be covered via patient experiences, discussion of reading materials and resident research.
Good communication and interpersonal skills are vital to success in this experience.

3) **Disease States**
The resident will counsel patients on their medications in all disease states as they relate to the patient’s maintenance medications, pain medications, supportive medications used for nausea, vomiting, diarrhea, nutrition, sleep, depression, anxiety, anemia or neutropenia. Additionally, the resident is expected to review the current chemotherapy agents in their treatment regimen as it pertains to that patient’s cancer.

4) **Key Contacts**
- Susan Zuk RN, MSN, AOCN, Director Oncology, Cancer Center at Paoli Hospital zuks@mlhs.org, phone 484.565.1608, fax 610.647.2006
- Vicki Hughes MSW, Social Worker, Cancer Center at Paoli Hospital
- Joann Moore, RN, Oncology Nurse, Cancer Center at Paoli Hospital
- Linda Cellucci, Administrative Assistant, Cancer Center at Paoli Hospital, celluccil@mlhs.org, phone 484.565.1497

5) **Activities/Expectation of Residents**
- Pharmacist/Resident will be notified via fax from Sue Zuk RN or her administrative assistant Linda Cellucci in advance of a Senior Oncology patient who is need of medication counseling. Additionally, patient medication lists with treatment dates and some dictated history by the oncologist will also be faxed to 3rd floor pharmacy in advance of the patient treatment date. The counseling should occur on a chemotherapy treatment day. *Collegeville and Exton* patients can be seen by the pharmacist working in those centers on that date and will need to be contacted ahead of time to let them know they are to see a Senior Oncology patient. Linda Cellucci will provide the patient phone number on the faxed paperwork.
- The resident will need to write a confirmatory email addressed to Sue Zuk and Linda Cellucci with the title of the email: “Senior Oncology Program fax received” and include in the email the name of the patient, date of treatment and center. The email should cc Joe Stuccio, Andrea Weeks, and the other resident. If it is an Exton or Collegeville patient please include the pharmacist’s name who would be counseling the patient that day and also send them a separate email to confirm they are available. If the resident is able to see the patient they should include this in the email for a Paoli patient.

- After receiving the fax for new patients, the resident should add the patients name and required information onto the Senior Oncology Master patient excel worksheet

- Resident will review patient profile, chemotherapy medications and look up in Micromedex or Lexicomp each medication they are unfamiliar with to determine potential for side effects or drug interactions. This should be done ahead of time on patients that the resident is planning on counseling.

- Resident will attempt to call patient prior to visit to ask them to bring medication bottles including the patients for Collegeville and Exton.
  - On the day of treatment the resident may need to call Paoli Cancer Center Pharmacy to speak to either pharmacist Joe George or Joe Stuccio to get patient start time for chemotherapy
  - The expectation is that the resident has prepared prior to meeting the patient on any discussion points or areas of concern
  - That the resident has done a thorough review using a reputable reference including drug interaction screen
  - Patients are counseled and the resident should make an attempt to have the patient open up about areas for concern including gait disturbances, depression, sleep, nutrition, anxiety, nausea, vomiting, diarrhea, pain, adherence, social/economic etc. so that the patient can be referred for appropriate care.
  - That the resident has reviewed potential inappropriate medications in the elderly using the current Beers criteria and/or STOPP/START tools

- After counseling
  - The resident should use a blue sticker to note in the medication list in the hardcopy patient oncology center chart that they have reviewed the medications. Any changes to the medication list should be documented appropriately following the Cancer Center Policies. No abbreviations for directions sig codes. Ex: BID should be written out twice daily. PO should be written as oral.
  - Blue Sticker should include: “Medications Reviewed for Senior Oncology Program”, date, your signature and title.
  - Find the senior oncology management schedule form in the patient’s chart and under the pharmacy consult section date and sign your name
  - The interdisciplinary progress note has been replaced by the Senior Oncology Program Pharmacist Medication Evaluation form which is designed to assess the patient’s
knowledge about their medications, determine if they can open bottles without assistance, detect and address missed doses, read prescription labels, self-administer medication and whether a pill box would be useful. The goal of the medication review is to detect polypharmacy and any medication related problems such as unsafe drugs in the elderly, drug-drug interactions, potential medication related adverse drug reactions or preventable events such as the need for renal dosing, suboptimal or duplicate therapies, and as mentioned earlier in previous bullet, any social concerns should be noted. The resident should always address problems detected and a solution. This should be discussed with the patient and their oncologist at the center before leaving the patient. If the doctor is unavailable, follow up with the physician and determine the best approach to communicating the information with the patient if they have left the center. If the patient is doing well that should be noted also. Sign your name, print your name, and include your title and contact information and time spent. (White copy goes in chart in senior oncology section, yellow to Linda Cellucci, and pink stored in the pharmacy senior oncology binder in the 3rd floor pharmacy office.

- Resident will make every effort to see patient while they are getting chemotherapy. If the patient leaves before the resident can get to the center, the resident should find out when the next treatment is due and come on that date/time.
- If a fax arrives for a Collegeville and Exton patient, the Resident will need to check the staff pharmacist schedule to determine which pharmacist is working at that site on the date of the Senior Oncology patient’s scheduled treatment. The pharmacist should be contacted via an email to alert them and ask if they are able to see the patient.
- If there are any medication issues the resident should use clinical judgment in terms of urgency. The patient’s oncologist is located on site at the cancer center. The patient’s oncology nurse is also available at the cancer center. Follow up calls regarding non oncology issues should be done with the patient’s PCP or other consulting physician depending upon the medication problem. Any discussions with physicians, nurses etc. should be noted in the progress note.
- Non-urgent but important progress notes can be flagged with a blue chart flag.
- If a problem cannot be resolved with a medication the progress note should indicate that you are following up with the patient’s physician and you will write another note in the chart if necessary to make the cancer center clinicians aware of your resolution of the problem(s).
- If the resident cannot resolve the medication issue or needs assistance they should consult their preceptors.
- Resident will document consult and counseling in Sentri-7. Please try and do this immediately following the counseling as the patient will only be active in Sentri-7 while they are actively registered in Siemens pharmacy.
- Residents are responsible to maintain pharmacy internal Master Senior Oncology patient excel list with active patients enrolled in senior oncology program and who they have counseled. This is stored in the Pharmacy share drive, folder marked: Senior Oncology.
• Residents are responsible for completing the Senior Oncology Medication Bottles spreadsheet in the same folder which is designed to keep statistics on our impact on discrepancies found by patients bringing in their medication bottles.
• Attend Senior Oncology Program Meetings once a month or when scheduled
• Additional assignments as requested by preceptor or Senior Oncology Staff

6) Preceptor Interaction
• More frequently during training as pharmacy is consulted to see patients. Direct instruction and modeling of strategies to perform medication therapy reviews and ice breakers with patients.
• As needed throughout longitudinal experience.
• Formative, ongoing feedback will be provided to the resident regularly on how they are progressing and how they can improve after resident performs tasks and interviews patients
• Adjustments to the resident’s learning activities will be made if necessary in response to information obtained through day to day informal observations, interactions and assessments and each resident’s abilities and performance.

7) Expected Progression
• Residents will shadow preceptor before, during and after patient counseling sessions.
• Pharmacist will observe residents before, during and after patient counseling sessions until preceptor feels resident has progressed enough to complete consults on their own.
• Residents will complete the majority of the senior oncology patient counseling sessions and documentation independently, but both preceptors will still be assisting with the counseling to remain active in the program
• Preceptor will shadow resident at least once per quarter to assess longitudinal progress.

8) Evaluation Strategy
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.
• Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
• Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.
• Residents will complete formative self-assessments in PharmAcademic at the end of the first 3 Quarters. This will be utilized by the preceptor during their quarterly summative evaluations and to assist in making adjustments to the resident’s activities on the rotation.

Patient education references available on MLH intranet: Go to Clinical Departments>MLH Rad/ Med Oncology>PH Cancer Center>Patient Education. There are links to oral chemotherapy handouts as well as symptom management sheets: on anxiety, bone loss, constipation, depression, diarrhea, fatigue, mucositis, neuropathy, pain. These can be provided to patients at the time of counseling as well as mailed to patients.

References/Recommended Readings:

3. Beers Criteria available online on the American Geriatric Society (also available on the residency share drive)
4. STOP/START criteria (available in the residency share drive)
5. Fall prevention handout (available in the residency share drive)
6. Morisky Medication Adherence Scales: MMAS-4 and MMAS-8 (available in the residency share drive)
During the learning experience the resident will focus on the goals and objectives outlined in section 9 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the senior oncology learning experience.

9) **Activities**

<table>
<thead>
<tr>
<th>TAUGHT AND EVALUATIED OBJECTIVES</th>
<th>DESCRIPTION</th>
<th>ACTIVITY USED TO MEET THIS OBJECTIVE</th>
</tr>
</thead>
</table>
| **R 1.1.1**                    | (Applying) Interact effectively with health care teams to manage patients’ medication therapy. | 1) During counseling session, if a patient need arises that pharmacist cannot assist with it is expected that they contact/communicate with oncologist, RN, PCP, etc.  
2) Attend and contribute at Senior Oncology Meetings to various process improvement ideas or provide input on status of program.  
3) Complete project or additional assignments at the discretion of the preceptor or senior oncology staff. |

| **R 1.1.2**                    | (Applying) Interact effectively with patients, family members, and caregivers. | 1) Build patient-pharmacist relationship while counseling patient. Provide patient education including new medication teaching, disease state teaching, maintenance medication or drug interactions.  
2) Use effective patient education techniques to provide counseling to patients and caregivers, including information on medication therapy, adverse effects, compliance, appropriate use, handling, and medication administration. |

| **R 1.1.3**                    | (Analyzing) Collect information on which to base safe and effective medication therapy. | 1) Review patient’s medications for inappropriateness in the elderly, drug interactions, side effects and adherence.  
2) Review disease states as they relate to all prescribed home medications and cancer center medications. |

| **R 1.1.4**                    | (Analyzing) Analyze and assess information on which to base safe |                                      |
| R 1.1.6 | (Applying) Ensure implementation of therapeutic regimens and monitoring plans (care plans) by taking appropriate follow-up actions. | 1) If the resident needs to contact/communicate with another health care professional regarding medications/discrepancies/drug interactions, etc. The resident follows up to make sure the situation is resolved or the issues is taken care of properly.  
2) Documentation that the issue was taken care of in the patient’s chart is necessary.  
3) Bring up patient care issues at monthly senior oncology meetings. |
| R 1.1.7 | (Applying) Document direct patient care activities appropriately in the medical record or where appropriate. | 1) Complete Senior Oncology Pharmacist Evaluation form and place in chart under the senior oncology section of the patient’s chart, The evaluation form should indicate what was discussed with patient and any medication or patient care issues that were addressed or need follow up including the number of interventions.  
2) Sticker the medication list in chart  
3) Sign senior oncology management schedule in chart  
4) Place intervention in Sentri-7.  
5) Note on the master senior oncology spreadsheet that patient was counseled, date and your initials.  
6) Complete the senior oncology medication bottles spreadsheet |
| R 1.1.8 | (Applying) Demonstrate responsibility to patients | 1) Patients are counseled while in the cancer center receiving treatment and as
close to their quarterly medication and multidisciplinary assessment as possible

2) Determine urgency for communication of any medication issues. Make sure internal patient list is maintained and updated when patients are counseled. Ensure that accurate and timely medication specific information regarding a specific patient reaches those who need it in an appropriate time.

3) Choose and manage daily activities so that they reflect a priority on delivery of appropriate patient-centered care to each patient. Show enthusiasm and team approach to seeing patients and offering assistance when have availability to see patients based on resident’s schedule.
**Drug Information Rotation Learning Experience**

<table>
<thead>
<tr>
<th>Learning Experience:</th>
<th>Drug Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Learning Experience Type:</td>
<td>Drug Information</td>
</tr>
</tbody>
</table>

1) **General Description**

The Drug Information rotation is a required longitudinal rotation where residents will be responsible for providing comprehensive, evidenced-based medication information. The residents are expected to respond to drug information requests in a timely manner and document all details of the interventions. Inquiries will not be limited to health care professionals and may include requests from patients and their caregivers. Responses should be tailored to the appropriate language level dependent on the background of the requestor. As part of the longitudinal experience, residents will be responsible for reviewing and evaluating journal and final presentations of APPE students and will also be required to prepare and present two formal journal clubs per resident. A minimum of one newsletter article must be submitted to be included in the MLHS Pharmacy Newsletter and one formal staff development in-service must be completed.

2) **Activities/Tasks**

*Drug Info service:* Residents will document questions and answers into the appropriate database in the shared drive. Residents will be assigned a drug information phone so that requesters can reach them throughout the hospital. Drug information hours are generally 7 am to 4 pm. From 4 pm to 10 pm residents will provide after hours drug information service and will be provided laptop access to the network. Each resident beginning the Saturday they are staffing to the following Friday night till 10 pm will alternative the after hours drug information service. Each call will be triaged for urgency.

*Community Outreach:* Residents will participate in outreach events such as Senior Supper talk, brown bag etc. as coordinated by the hospital community coordinator (At least 2 occurrences).

*Drug Shortages:* As part of the drug information service, residents may need to respond to urgent drug shortage inquiries in a timely manner. This process may involve working with the purchaser in obtaining the appropriate therapeutic alternative(s).

*Staff Education:* Residents will provide staff in-services on various topics throughout the year. In-services will be provided in person as needed and at least twice
a month via e-mail summaries (i.e. PPRM-Paoli Pharmacy Resident Memo). Within PPRM, residents will summarize recent DI questions & answers as well as short summaries of recent student presentations. One formal staff development in-service will be required and can be scheduled during any rotation.

*Journal Review: Present two (2) journal clubs per resident (i.e. one resident run journal club per quarter); review and evaluate journal presentations by APPE students.

*Newsletter article: At least one article must be submitted by April 1st

*Teaching: Oversight of APPE/IPPE students. Residents will share the responsibility of scheduling and evaluating students’ journal clubs and final presentations. This also includes sending out e-mail reminders to staff. Opportunities for teaching students will be assigned during the year.

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the drug information learning experience.

### 3) Goals and Objectives

Writing free from grammatical errors and demonstrates knowledge of topic and cites appropriate references. | R4.1.1 (Applying) Design effective educational activities  
R4.1.2 (Applying) Use effective presentation and teaching skills to deliver education.  
R4.1.3 (Applying) Use effective written communication to disseminate knowledge |
| Submit at least one MLHS newsletter article Writes in a manner that is easily understandable and free of errors. Demonstrates thorough understanding of the topic. Notes appropriate citations and references. | R4.1.3 (Applying) Use effective written communication to disseminate knowledge |
| Respond to drug shortages. As part of the drug information service, residents may need to respond to urgent drug shortage inquiries in a timely manner. This process may involve working with the purchaser in obtaining the appropriate therapeutic alternative(s) and formulating a response to management in the form of an email or word document with recommendations. | R 1.3.2 (Applying) Manage aspects of the medication-use process related to formulary management |
| Oversight of APPE/IPPE students. Residents will                     | R4.2.1 (Analyzing) When engaged in teaching,                                        |
have multiple opportunities to work and teach students in varying capacities such as the responsibility of scheduling and evaluating students’ journal clubs and final presentations. This also includes sending out e-mail reminders to staff. Provides direct instruction, models for learners, coaches/supervises while skills are being performed. Allows learners to perform independently and provides effective feedback.

| select a preceptor role that meets learners’ educational needs. R4.2.2 (Applying) Effectively employs preceptor roles, as appropriate. |

4) **Preceptor Interaction**
- More frequently during initial training
- Bi-Monthly Meetings to discuss drug information projects and responses and provide verbal constructive feedback
- As needed throughout longitudinal experience.

5) **Expected Progression**
**Week 1 Timeline:**
- Send introduction e-mail(s) to pharmacy department staff and any other appropriate parties (i.e. introduction of resident names, contact number(s), contact e-mails etc.).
- Become familiar with the shared drive drug information data base and look into further improvements on usability for other pharmacy staff.
- Set up drug information phone after hours schedule for the year and send to staff

**Weeks 2-52:**
- Staff in-services as needed (minimum one formal staff development in-service)
- Answer drug information questions via drug information phone
- Maintain drug information database
- Provide patient counseling
- Attend scheduled community outreach events
- Respond to drug shortages
- Complete 2 journal clubs
- Complete one newsletter article for the MLHS Pharmacy newsletter
- Work with students. Schedule, attend and evaluate student presentations.
- Write every other week Paoli Pharmacy Resident Memo (PPRM) newsletter email to staff which includes brief synopsis of the following: 1) answers to drug information questions 2) journal clubs 3) presentations all of which occurred during the prior 2 week time frame

6) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.
Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.

Residents will complete self-assessments in PharmAcademic at the end of each quarter. This will be utilized by the preceptor during their quarterly summative evaluations and to assist in making adjustments to the resident’s activities on the rotation.

Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.

Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

Resident Self-Assessment Questions in PharmAcademic:

1. Please describe an unusually challenging drug information question you had this month and how you approached finding the answer?
2. How do you assess the effectiveness of the education you provide? How well were your learning objectives met?
Project Red Rotation Learning Experience
(Readmission Prevention Initiative)

Preceptor: Kelly Butler, Pharm.D., Clinical Pharmacist
Designated Rotations: Internal Medicine, Project Red
Office: Ground Floor Pharmacy – Main Building
        255 W. Lancaster Ave • Paoli, PA 19301
        484-565-1192 (phone) • 484-565-4997 (fax)
        butlerk@mlhs.org

1) General Description
The Project RED (Re-engineered Discharge) is a longitudinal rotation. This rotation focuses on improving processes that occur during a patient’s transition from hospital to home. One in five elderly patients is readmitted to the hospital within 30 days after discharge and approximately 40% may be avoidable. Patients who have congestive heart failure, acute myocardial infarction or pneumonia are screened on admission for eligibility. The “Teach Back” method is utilized to assess a patient’s understanding of skills required to avoid readmission including knowledge about medications and most importantly, on the day of discharge, a review of written discharge instructions. This rotation will require the resident to develop skills in patient counseling with a focus on preventing readmissions due to heart failure and improving patient outcomes.
Core Content which will be covered via patient experiences, discussion of reading materials.

Good communication and interpersonal skills are vital to success in this experience.

2) Disease States
During this Project Red rotation, the resident will counsel patient on their medications in the following disease states: Congestive Heart Failure, Acute Myocardial Infarction, and Pneumonia.

3) Key Contacts
Project Red is led by the Patient Care Facilitators (PCF) on each floor. The Project Red team is a multidisciplinary team of Physicians, Cardiologists, Pharmacists, PCFs, Care Managers, and Social Workers
- 3A (Telemetry) – Lisa Springer, RN, MSN and Joyce Kish, RN, MSN
- 4B (Med/Surg) – Deb Tagland, NP
- 3 Main (Oncology/Tele) – Tim O’Brien, RN

4) Activities
- Pharmacy will be notified via email by a PCF when a patient is enrolled in Project Red.
- Resident will review patient profile, compare home meds to current inpatient medications.
- Resident will make every effort to see patient while inpatient.
- Resident will document consult in patient chart using Pharmacy Note
- Resident will contact patient via phone call within 72 hours after discharge.
- Resident will document phone call in Excel file kept on pharmacy shared drive.
5) **Preceptor Interaction**  
- More frequently during training as pharmacy is consulted to see patients.  
- As needed throughout longitudinal experience.

6) **Expected Progression**  
- Resident will shadow Preceptor for inpatient visits as well as follow-up phone calls.  
- Pharmacist will observe Resident during inpatient visits and follow-up phone calls until Preceptor feels Resident has progressed enough to complete consults on their own.  
- Resident will complete all Project Red inpatient consults and follow-up phone calls on own.  
- Preceptor will shadow Resident quarterly or as often as needed at the discretion of the preceptor.

7) **Evaluation Strategy**  
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.  
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.  
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

During the learning experience the resident will focus on the goals and objectives outlined in section 8 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the drug information learning experience.
8) Objectives

<table>
<thead>
<tr>
<th>OBJECTIVE</th>
<th>DESCRIPTION</th>
<th>ACTIVITY USED TO MEET THIS OBJECTIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>R1.1.2</td>
<td>(Applying) Interact effectively with patients, family members, and caregivers.</td>
<td>Build patient-pharmacist relationship while counseling patients. Interactions should be respectful and show empathy.</td>
</tr>
<tr>
<td>R1.1.7</td>
<td>(Applying) Document direct patient care activities appropriately in the medical record.</td>
<td>Document Pharmacy Consult in the Pharmacy Note section of Smart Chart. Provide preceptor summary of follow up phone call for documentation in the Excel Pharmacy Project Red log. Documentation should be clear and written in a timely manner. Documentation should follow the health system’s policies and procedures, including that entries are signed, dated, timed, legible, and concise.</td>
</tr>
<tr>
<td>R1.1.8</td>
<td>(Applying) Demonstrate responsibility to patients</td>
<td>Gives priority to patient care activities. Provides patient with information on medication therapy, adverse effects, compliance, appropriate use, handling and medication administration. Informs patients how to obtain their medications in a safe, efficient and cost-effective manner. Determines barriers to patient compliance and makes appropriate adjustments.</td>
</tr>
<tr>
<td>R1.2.1</td>
<td>(Applying) Manage transitions of care effectively</td>
<td>Participates in medication education. Follows up with patient in a timely and caring manner - contacts the patient within 72 hours of discharge. Takes appropriate steps to help avoid unnecessary hospital admissions and/or readmissions - during follow-up with a patient post-discharge, if a patient need arises that pharmacist cannot assist with contact/communicate with PCF, PCP, etc.</td>
</tr>

Pharmacy & Therapeutics Rotation Learning Activities

Primary Preceptor: Al Celidonio RPh, Director of Pharmacy Paoli Hospital
Office: Ground Floor Pharmacy – Main Building
255 W. Lancaster Ave, Paoli, PA 19301
484-565-1173 (phone), 484-565-4997 (fax)
celidonioa@mlhs.org
Co-Preceptor: Kelly Butler, PharmD
Office: Ground Floor Pharmacy – Main Building
255 W. Lancaster Ave • Paoli, PA 19301
484-565-1192 (phone) • 484-565-4997 (fax)
butlerk@mlhs.org

Pharmacy and Therapeutics Meets the fourth Wednesday of the Month on site at Bryn Mawr Hospital alternating with the 4th Tuesday of the Month via teleconference at Paoli Hospital.

1) General Description
The Pharmacy and Therapeutics Rotation is a longitudinal rotation in the PGY-1 pharmacy residency program at Paoli Hospital. (From the Pharmacy Manual, Policies and Procedures, Policy 9:00 P & T Committee Scope and Responsibility available online at https://mainlinehealth.ellucid.com/documents/view/3620): The Pharmacy and Therapeutics Committee is a Committee of the Medical Staff responsible for the development and surveillance of all medication use policies and practices to assure optimum clinical results and a minimum potential for hazard to patients. The President of the Medical Staff, in consultation with the Medical Executive Committee, appoints the Pharmacy and Therapeutics Chair as well as physicians, pharmacists, nurses and other supporting membership. The Main Line Health (MLH) Pharmacy and Therapeutics Committee will meet monthly, at least ten times per year, and has three primary functions: Formulary Maintenance, Safe Medication Use, and Medication Use Evaluation. The P & T Committee is also responsible for the development of all drug distribution and administration policies and procedures including all new or updated MLHS pre-printed/computerized physician order entry physician order forms if medications are listed. Good written and oral communication and interpersonal skills are vital to success in this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

2) Actual tasks will include:

- Attendance at Pharmacy Leadership Meetings which meets the 2nd Wednesday of each Month.
- Attendance at Pharmacy Clinical Meetings which meets the 1st Tuesday of each Month.
- Provide support to the Pharmacy and Therapeutics Committee by completing one drug class review, monograph, treatment guideline, or protocol including a Failure Mode and Effects Analysis for a medication formulary request for presentation at P and T committee
- Prepare one Medication Use Evaluation for presentation at P and T committee. Assist in implementing and approved changes.
- Assist in compiling data for Adverse Drug Reaction Detection and Surveillance Program (monthly monitoring) for presentation at P and T committee
- Attendance at Pharmacy and Therapeutics Committee Meetings which meet on the 4th Wednesday of each Month alternating with the 4th Tuesday of the Month and transcription of the Meeting Minutes

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the P and T learning experience.

### 3) Activities

<table>
<thead>
<tr>
<th>Activity Detail</th>
<th>Objectives with Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal R3.2:</strong> Demonstrate management skills</td>
<td></td>
</tr>
<tr>
<td>Demonstrates effective workload and time-management skills. Assumes responsibility for personal work quality and improvement. Attends Pharmacy and Therapeutics, Leadership and Clinical Meetings and collaborates in a professional manner with others within the organization.</td>
<td>R 3.2.4 (Applying) Manage one’s own practice effectively.</td>
</tr>
<tr>
<td><strong>Goal R2.1:</strong> Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.</td>
<td></td>
</tr>
<tr>
<td>Provide support to the Pharmacy and Therapeutics Committee and its subcommittees in the form of a drug class review, monograph, treatment guideline, or protocol. Interpretation of medical literature, cost analysis and budget and patient safety issues should be analyzed. Present formulary review at P and T Committee Meeting.</td>
<td>R 2.1.1 (Creating) Prepare a drug class review, monograph, treatment guideline or protocol.</td>
</tr>
<tr>
<td>Transcription of Pharmacy and Therapeutics Committee Minutes and any other required minutes for attended meetings. Effectively communicates any changes approved to the medication formulary, medication usage, or other policies or procedures to appropriate parties.</td>
<td></td>
</tr>
<tr>
<td>Assist in compiling and analyzing adverse drug event data as part of surveillance program for presentation at Pharmacy and Therapeutics Committee</td>
<td>R 2.1.4 (Applying) Participate in medication event reporting and monitoring.</td>
</tr>
<tr>
<td>Prepare an assigned Medication Use Evaluation which will be presented at Pharmacy and Therapeutics Committee or appropriate committee. Assist in implementing approved changes such as education to staff.</td>
<td>R 2.1.2 (Applying) Participate in a medication-use evaluation.</td>
</tr>
</tbody>
</table>
4) **Preceptor Interaction**
Weekly or more often as needed:
Preceptor office hours for projects and topic discussions will be arranged on a week by week basis.

5) **Expected progression of resident responsibility on this learning experience:**
Weeks 1-4: Preceptor to review Pharmacy and Therapeutics learning activities and expectations with Resident. Resident to be assigned MUE, formulary review request and begin required research

Weeks 4-52: Resident to attend required meetings and work on assignments including ADR data, reading required literature, gathering and compiling data and cost analysis. Resident should provide Preceptor with preliminary outlines for formulary review and MUE after they are 25% completed to receive verbal feedback and to make sure that they are meeting deadlines for completion.

*The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident's progression in the current rotation and what activities the resident is participating in based on meeting schedules and assignment deadlines during the residency program*

6) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments: The preceptor will provide the resident with ongoing, activity focused, measurable, and constructive feedback in order to enhance learning.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

Nursing-Pharmacy Medication Safety Committee Rotation
Learning Experience

Preceptor: Al Celidonio RPh, Pharmacy Manager Paoli Hospital
Office: Ground Floor Pharmacy – Main Building
255 W. Lancaster Ave, Paoli, PA 19301
484-565-1173 (phone), 484-565-4997 (fax)
celidonioa@mlhs.org

The Nursing-Pharmacy Medication Safety Committee (formerly the Continuous Quality Improvement (CQI) Committee) meets the third Wednesday of the Month from 10-11:30 am.

1) General Description
The Nursing-Pharmacy Medication Safety Committee Rotation is a longitudinal 52 week required rotation in the PGY-1 pharmacy residency program at Paoli Hospital. The Nursing-Pharmacy Medication Safety Committee reviews all medication administration events (similarities, trends, and process issues) to ensure that patients are receiving on admission, and throughout their hospital stay, the most appropriate, safe, and effective drug therapy for their clinical condition. At each campus a pharmacist and nurse co-lead the Nursing-Pharmacy Medication Safety Committee meeting. The meeting includes risk and quality managers and meets monthly to review medication administration events/near misses. When trends are noted, process redesign is deployed. Final decision about change in practice is made by the P&T Committee.

From the administrative policy and procedure manual Main Line Health (MLH) mission statement is “To provide a comprehensive range of safe, high quality health services, complemented by related educational and research activities that meet community needs and improve the quality of life in the communities we serve.” Core values are compassion, participation, innovation, excellence, integrity and communication. The MLH definition of quality: The highest value and quality is present when the optimal outcome is attained with the most appropriate utilization of resources. Achieving quality means adding value to all tasks through a commitment to continuous improvement of services which serve our patients, physicians, staff and community. There is continuous efforts to improve performance throughout the organization using the model methodology of define, measure, analyze, improve and control. Quality improvement activities will be collaborative and interdisciplinary and are aligned with the Institute of Medicine six quality aims: safe, timely, efficient, effective, equitable and patient-centered. Activities should be centered on meeting the current external demands in terms of quality and efficiency of our services while at the same time managing and preventing patient harm. Service quality will be measured by patient satisfaction.

Meeting attendance is required and documentation of meeting agenda topics is required. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame.

2) Actual tasks will include:
- Attendance at the Nursing-Pharmacy Medication Safety Committee which meets the third Wednesday of the Month from 10-11:30 am in the Malvern Room (meeting room may
- Attendance at weekly Medicine Grand Rounds held on Wednesdays from noon to 1 pm in the Potter Room (meeting room may change)
- Attendance at Schwartz Rounds which meet periodically in place of Medicine Grand Rounds same time and room.
- Attendance at monthly Pharmacy Staff Meetings with transcription of minutes.
- Documentation in PharmAcademic of meeting agenda/minutes/discussions along with 3 take home points from the meeting or Medicine Grand/Schwartz Rounds
- For the Nursing-Pharmacy Medication Safety Committee quarterly process improvement ideas that are shared with the Committee which can come from other meetings attended. Other ideas can be an ISMP article that can have some impact if initiated system-wide.

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the Nursing-Pharmacy Medication Safety Committee learning experience.

### 3) Activities

<table>
<thead>
<tr>
<th>Activity Detail</th>
<th>Objectives with Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal R2.1:</strong> Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization.</td>
<td></td>
</tr>
<tr>
<td><strong>Goal R3.1:</strong> Demonstrate leadership skills</td>
<td>R 3.2.3 (Applying) Contribute to departmental management.</td>
</tr>
<tr>
<td><strong>Goal R3.2:</strong> Demonstrate management skills</td>
<td></td>
</tr>
<tr>
<td>➢ Meet with preceptor quarterly to discuss what is going on at the various meetings that may pertain to pharmacy and to review upcoming Nursing-Pharmacy Medication Safety Committee process improvement topic for presentation.</td>
<td></td>
</tr>
<tr>
<td>➢ Helps identify and define significant departmental needs as they pertain to medication safety.</td>
<td></td>
</tr>
<tr>
<td>➢ Manages time effectively to attend meetings.</td>
<td>R 3.1.1 (Applying) Demonstrate personal, interpersonal, and teamwork skills critical for effective leadership</td>
</tr>
<tr>
<td>➢ Demonstrates ability to lead and negotiate interprofessional committee members.</td>
<td></td>
</tr>
<tr>
<td>➢ Effectively communicates and takes into consideration various health care professionals’ perspectives.</td>
<td></td>
</tr>
<tr>
<td>➢ Takes responsibility to take Pharmacy Staff meeting minutes in a timely manner and uses effective communication skills.</td>
<td></td>
</tr>
<tr>
<td>➢ Minimum of 2 process improvement ideas presented at the Nursing-Pharmacy Medication Safety Committee Meetings which is taken from a prior meeting such as a Medicine Grand Rounds, article read or information from or ISMP article.</td>
<td>R 2.1.3 (Analyzing) Identify opportunities for improvement of the medication-use system.</td>
</tr>
<tr>
<td>➢ Gather and assist in analysis of data that provides relevant background information needed to make recommendations.</td>
<td></td>
</tr>
</tbody>
</table>
Ideas should be applicable system-wide and use best practices to identify opportunities for improvement in the medication use system.

- On-going self-reflection in PharmAcademic in the form of a brief outline of the Nursing-Pharmacy Medication Safety Committee meeting agenda and discussion.
- Three take home points should be included. This includes Medicine Grand Rounds and Schwartz Rounds.
- Self-evaluation should take into consideration the development of professional goals and plans reflecting on experiences and new skills developed through meeting attendance.
- Demonstrate ability to incorporate constructive feedback from others to evaluate one’s own strengths and areas for improvement.

R 3.1.2 (Applying) Apply a process of ongoing self-evaluation and personal performance improvement.

4) **Preceptor Interaction**

Quarterly or more often as needed:
Preceptor office hours for topic discussions will be arranged quarterly or on an as needed basis

**Expected progression of resident responsibility on this learning experience:**

**Day 1:** Preceptor to review the Nursing-Pharmacy Medication Safety Committee Rotation learning activities and expectations with Resident. Provide information to the Resident in terms of meeting/committee/rounds locations, dates and times.

**Weeks 1-52:** Resident to attend meetings/Medicine Grand Rounds/Schwartz Rounds as required and document in PharmAcademic required information described in the activities above.

**Monthly:** Pharmacy Staff Meeting Attendance with transcription of minutes

**Quarterly—Weeks 13, 26, 39, and 52:** Presentation at the Nursing-Pharmacy Medication Safety Committee Meeting: Identifies a minimum of 2 quality improvement/safety ideas based off of other meetings/Medicine Grand Rounds/Schwartz Rounds attended or ISMP article as described in the activities section. Topic should be discussed with preceptor prior to presentation at the Nursing-Pharmacy Medication Safety Committee Meeting.

Good communication and interpersonal skills are vital to success in this experience. The resident must devise efficient strategies for meeting attendance while still completing obligations of other rotation requirements.

*The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident's progression in the current rotation and what activities the resident is participating in based on meeting schedules during the residency program*
5) **Evaluation Strategy**

PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- **Resident Self-Evaluations:** These will be utilized by the resident using PharmAcademic on a quarterly basis to document activities performed on this rotation along with their reflection on what they have learned or contributed.
- **Formative assessments:** Preceptor will provide verbal on-going feedback to the resident which is activity focused, measurable, constructive about how they are progressing and how they can improve throughout the rotation.
- **Summative evaluations:** This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- **Preceptor and Learning Experience evaluations** must be completed by the last day of the learning experience.

**Self-Reflection Questions**

1. Briefly describe the Nursing-Pharmacy Medication Safety Committee Agenda this month. (Provide at least 3 take home points). Did you learn anything unexpected? How do you plan to use this information in the future?

2. Briefly describe how you contributed to the Nursing-Pharmacy Medication Safety Committee Meeting this month. Did you have any quality improvement/safety ideas? Did you find it difficult to come up with a medication safety idea? What resources did you use?

3. What Grand Rounds and/or Schwartz Rounds did you attend this month? Please describe 3 take home points you learned from each. Was this new knowledge for you? How do you plan to use this knowledge? Are there any safety events that were mentioned?

4. What were some highlights from the last Pharmacy Staff Meeting you attended? How are new policies addressed by the pharmacy director? What types of questions did staff have? What type of leadership and communication skills are needed to run a staff meeting? Based on this point in the residency do you feel comfortable running a staff meeting? Why or why not?
Pharmacy Services/Staffing Rotation

Primary Preceptor: Liz Ferrigno, RPh
Pavilion Pharmacy
255 W. Lancaster Ave, Paoli PA 19301
484-565-2550
ferrignol@mlhs.org
Secondary preceptor(s): designated pharmacy staff mentors

1) **General Description:**
The Staffing/Pharmacy Services is a longitudinal rotation in the PGY-1 pharmacy residency program. The resident will work in the Ground Floor Pavilion Pharmacy as assigned. This rotation will begin after the pharmacy orientation rotation and will end on June 30th of the residency year. The PGY1 pharmacy resident will continue to build upon skills in pharmacy operations, utilization of computer systems (Cerner, Pyxis, Sentri-7, Smart Chart, etc.), pharmacist responsibilities, learning Policy/procedures of MLH, supervision of technicians, and trouble-shooting. MLH Safety behaviors will continue to be emphasized and monitored for utilization. Rotation activities allow the resident to assimilate and integrate a variety of practice skills developed within the Pharmacy Department in order to function effectively as an acute care pharmacy practitioner. Proposed schedule for resident is every other weekend x 42 weeks/after orientation, training and licensure are completed.

2) **Actual tasks will include:**
The pharmacy staffing experience will primarily focus on inpatients. The PGY1 pharmacy resident will need to demonstrate competency in the areas of inpatient pharmacy, including unit dose procedures, order processing, problem resolution, IV admixture and chemotherapy preparation (when required). An understanding of the role of the pharmacist and the pharmacy technician, as well as the systems and technology used for inpatients is further developed. The PGY1 pharmacy resident will be involved in medication regimen review, medication order verification, dispensing, and provision of drug information. Other activities include participation in medication reconciliation at transitions of care, evaluating renal dosing, therapeutic drug monitoring (heparin, warfarin, etc.), reporting adverse drug events and medication events, providing patient education and counseling to patients upon request. The resident will be responsible for presenting a 5 minute review of a Policy and Procedure at monthly staff meetings to reinforce polices that were introduced during the Pharmacy Practice and Orientation Rotation.

During the learning experience the resident will focus on the goals and objectives outlined in section 3 below by performing the activities that are associated with each objective.

Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to the Pharmacy Staffing Rotation learning experience.

</tr>
</tbody>
</table>
| OBJ R1.1.2 | (Applying) Interact effectively with patients, family members and caregivers.                                                                                                                                                                                                                                                                                       | 1. Provide information or modifications to the therapeutic plan to the patient or members of the health care team.  
2. Demonstrates ability to document interventions and understands the significance of documentation and all relevant criteria involved in documentation.  
3. Interacts respectfully and collaboratively.                                                                                                                                                                                                                   |
| OBJ R1.1.4 | (Analyzing) Analyze and assess information on which to base safe and effective medication therapy.                                                                                                                                                                                                                                                                  | 1. Demonstrates ability to identify medication therapy problems, including: therapeutic duplications, adverse drug events or potential for such events, clinically significant drug-drug, drug-disease interactions or potential for interactions.  
2. Demonstrates ability to evaluate laboratory values and make modifications to therapy according to hospital policy (Renal dose adjustment policy.)                                                                                      |
| OBJ R1.1.7 | (Applying) Document direct patient care activities appropriately in the medical record or where appropriate.                                                                                                                                                                                                                                                      | 1. Selects appropriate direct patient-care activities for documentation (verbal orders, restricted drug use, renal dose adjustments, and exceptions to formulary).  
2. Follows the hospital’s policies and procedures for documentation, written and electronic. All entries are signed, dated, timed, legible, and concise.  
3. Utilizes safety surveillance tool (Sentri-7) and documents IV to PO conversions and Vitamin K interventions appropriately.  
| Goal R1.3 | Prepare, dispense, and manage medications to support safe and effective drug therapy for patients.                                                                                                                                                                                                                                                               | 1. Document modifications to a medication order appropriately.  
2. Prepare medication using appropriate |
| OBJ R1.3.1 | (Applying) Prepare and dispense medications following best practices and organization’s policies and procedures.                                                                                                                                                                                                                                                 | 1. Document modifications to a medication order appropriately.  
2. Prepare medication using appropriate |
techniques and following the organization’s policies and procedures and applicable professional standards.

3. Ensure solutions are appropriately concentrated, without incompatibilities, stable and appropriately labeled and stored according to organization’s policies.

4. Follow a procedure to check the accuracy of medications dispensed, including correct patient, correct medication, correct dosage form, correct dose, correct number of doses, expiration date and proper repackaging and auxiliary labeling (if required).

5. Demonstrate ability to prioritize responsibilities and ensure that patients receive medications on time.

| OBJ R1.3.2 | (Applying) Manage aspects of the medication-use process related to formulary management. | 1. Follow appropriate procedures regarding exceptions to the formulary.  
|            |                                                                                      | 2. Ensure non-formulary medications are dispensed, administered and monitored in a manner that ensures patient safety. |

| OBJ R1.3.3 | (Applying) Manage aspects of the medication-use process related to oversight of dispensing. | 1. Ensure IV products are prepared using appropriate aseptic technique.  
|            |                                                                                      | 2. Ensure medications are stored appropriately and understand the hospital’s safety measures for storage, disposal, monitoring of refrigerated and scheduled products. (Temp-trak, PharmEcology Waste Management, CII safe) |

| GOAL R2.1 | Demonstrate ability to manage formulary and medication-use processes, as applicable to the organization. | 1. Demonstrate ability to utilize STAR reporting system for reporting of Adverse Drug Events and Med Events.  
|           |                                                                                      | 2. Demonstrate ability to recognize Great Catches and submit via online reporting system.  

| OBJ R2.1.4 | (Applying) Participate in medication event reporting and monitoring. | 1. Demonstrate ability to utilize STAR reporting system for reporting of Adverse Drug Events and Med Events.  
|            |                                                                                      | 2. Demonstrate ability to recognize Great Catches and submit via online reporting system.  

| Goal R3.1 | Demonstrate leadership skills. | 1. Routinely seeks applicable new learning opportunities when performance does not meet |
expectations.
2. Demonstrates pride in, and commitment to, the profession through appearance, personal conduct, planning to pursue board certification and pharmacy association activities.
3. Demonstrates personal commitment to and adheres to organizational and departmental policies and procedures. (Employment Code of Conduct, Personal Appearance of pharmacy staff, Situational Time Off, Confidentiality, Red Rules)
4. Demonstrate knowledge in MLH policies and procedures and shares pertinent information at pharmacy staff meetings. Each resident will present 6 policies and procedures to the staff.

<table>

<td>4. Explain safe practices for storage, dispensing, administration and security of pharmaceuticals.</td>
</tr>
</tbody>
</table>

4) **Preceptor Interaction:**
   - Designated pharmacy staff mentors will provide direct instruction, modeling, and coaching of various strategies to perform required staffing responsibilities.
   - Designated pharmacy staff mentors and primary preceptor will provide formative, ongoing, constructive feedback while residents are staffing in order to improve their performance on required tasks and facilitate independence and confidence in the resident.
   - Primary preceptor will meet with resident once monthly or more frequently to discuss residents’ progress and identify areas for increased emphasis or need for additional training based on pharmacist mentor progress reports and resident’s own request.
5) **Expected Progression**

- Resident to acquire strategies to appropriately prioritize work load.
- Resident to eventually manage workflow independently.
- Resident will familiarize and utilize available resources to manage work effectively.
- Initiate interactions with prescribers regarding disease state management in a professional manner.
- Make solid clinical recommendations to improve patient outcomes.
- Good communication and interpersonal skills are vital to success in this experience.
- The resident must devise efficient strategies for meeting their staffing responsibilities while still completing obligations of other rotation requirements.
- Goal for resident to function independently and effectively as an acute care pharmacy practitioner in varies areas of the pharmacy and in their future career in any hospital pharmacy setting.

**The length of time the preceptor spends in each of the phases of learning will depend on BOTH the resident’s progression in the current rotation and what activities the resident is participating in based on the staffing schedules during the residency program**

6) **Evaluation Strategy**

PharmAcademic will be used for documentation of scheduled evaluations (see chart below). The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Formative assessments (see below) will be ongoing, constructive, focus on activities and be measurable in order to strengthen the resident’s skills regarding their role in preparing, dispensing and managing safe and effective drug therapy for patients.
- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

<table>

</tr>
</tbody>
</table>
Formative assessments will be made through the staff pharmacist mentors who work directly with the residents. The staff pharmacist mentors will complete the attached PGY1 Resident Progress Report twice quarterly based on direct observations, instruction, modeling and coaching in order to facilitate/assist residents in functioning independently in the role of a hospital pharmacist. Residents will receive ongoing, constructive feedback to strengthen their skills from the pharmacist mentors while they are working directly with the resident. The Resident Progress reports will be given to the primary preceptor who will utilize these reports to discuss areas for improvement or necessary skill development and to help determine if the resident is moving towards achieving the goals and objectives assigned to this rotation and for the residency.

For more information please see Paoli Hospital PGY1 Pharmacy Residency General Information: pages 26-28 of the pharmacy residency manual.

### Additional Comments on back.

**Comments:**

Activities the resident did well.

Areas where the resident could focus efforts to improve skills:

Educational needs and or re-training areas (deficiencies):
Residency Project Rotation Learning Activities
Residency Program Director: Al Celidonio RPh, Director of Pharmacy, Paoli Hospital
Office: Ground Floor Pharmacy – Main Building
255 W. Lancaster Ave, Paoli, PA 19301
484-565-1173 (phone), 484-565-4997 (fax)
celidonioa@mlhs.org

Project Advisor(s) will be assigned to assist Resident in completion of Residency project.

1) General Description
Each resident is responsible for the completion of a residency project. The project may be in the form of original research, a problem-solving exercise, or development, enhancement or evaluation of some aspect of pharmacy operations or patient care services. As a component of the project, the resident will submit the project as a work in progress for poster presentation at the ASHP Midyear Meeting. Alternatively the resident may have the project completed for the ASHP Midyear Meeting. Good written and oral communication and interpersonal skills are vital to success in this experience. The resident must devise efficient strategies for accomplishing the required activities in a limited time frame. Attendance/Podium Presentation at the Eastern States Residency Conference held in the Spring generally in early May will also be required. The resident may complete the original work presented for the ASHP Midyear Meeting or do a new project. The Eastern States Residency Conference is a forum where residents share experiences and expertise. Each resident will make a presentation on his or her residency project, which will be evaluated by the Residency Director and/or coordinating preceptor(s). Residents will also be reviewed by their peers and other preceptors attending the program.

2) Project Selection / Scope of Projects/ Approval
A list of potential projects will be generated by the Residency Advisory Committee (RAC) and distributed to the residents for consideration. It is the aim of the committee to provide the resident with a number of research topics related to: current activities and/or clinical practice issues at the medical center, current issues in pharmaceutical care, medication safety, pharmacy services and/or other areas of interest of the sponsoring committee members. In addition to projects submitted by RAC members, projects may be submitted by any pharmacy staff personnel and/or others as appropriate. Alternately, the resident may independently select a project and submit this to the RAC committee for approval. The Residency Advisory Committee will approve the final list of potential projects before it is distributed to the residents.

3) Project Advisor(s)
Project advisor(s)’ function is as project mentors and co-principal investigators. They will work directly with the resident to oversee the initiation, development, and completion of the research project. The advisor will collaborate on the research project itself and serve as a resource for the resident, as they would with any other research undertaking. It is expected that the advisor will participate in all committee meetings, provide periodic feedback to the resident and committee, critically review the all data collection and presentations, and perform any other functions of a collaborator.
Actual tasks will include:
See Appendix A

4) Goals and Objectives
During the learning experience the resident will focus on the goals and objectives outlined below by performing activities that are associated with each objective. Achievement of the goals of the residency is determined through assessment of ability to perform the associated objectives. The table below demonstrates the relationship between the activities and the goals/objectives assigned to this learning experience.

R 3.1.1  
R 3.1.2  
R 3.2.4 |
| Evaluate data to determine if additional modifications or changes are needed. Assess impact of project including sustainability. Use continuous quality improvement principles to assess the impact of the projects such as in patient care, economics, operations or outcomes. Address areas for changes. | (Evaluating) Assess changes made to improve patient care or the medication-use system | R2.2.4 |
| Prepare an abstract, pertinent to the study, for application to the Eastern States Residency Conference (refer to the Eastern States website for specific deadline.) All abstracts must be submitted to the project coordinator and/or RAC for review at least 2 weeks prior to the final Eastern States deadline. | (Applying) Use effective written communication to disseminate knowledge. | R4.1.3 |
| In preparation for Eastern States Platform Presentation, the resident will present a study synopsis with project results to the RAC for preview and comments. Prior to the Eastern States, the resident will present, in full, at least one oral presentation of their project in PowerPoint format to the RAC for final review and approval. The resident will also share | (Creating) Effectively develop and present, orally and in writing, a final project report | R 2.2.5 |
outcomes of changes to Paoli Hospital division/clinical area which most closely involved in the study or impacted by the study. Final report is completed in acceptable manuscript style suitable for publication in the professional literature.

6) **Preceptor Interaction**
Weekly or more often as needed:
Preceptor/Project Advisors office hours for projects and topic discussions to be based on meeting dates and coordinated meeting times which are mutually acceptable. Preceptors will provide verbal on-going feedback to the resident which is activity focused, measurable, constructive about how they are progressing and how they can improve throughout the rotation.

Expected progression of residency project is described in full in Appendix A and C. Appendix D includes previous residency projects titles.

[The length of time the preceptor spends in each of the phases of learning will be personalized based upon BOTH the resident’s abilities and progression with the responsibilities on this learning experience.]

7) **Evaluation Strategy**
PharmAcademic will be used for documentation of scheduled evaluations (see chart below).
The resident and the preceptor will independently complete the assigned evaluation and save as draft. The resident and the preceptor will then compare and discuss the evaluations. This discussion will provide feedback both on performance of the activities and the accuracy of the resident’s self-assessment skills. Evaluations will be signed in PharmAcademic following this discussion.

- Summative evaluations: This evaluation summarizes the resident’s performance throughout the learning experience. Specific comments should be included to provide the resident with information they can use to improve their performance in subsequent learning experiences.
- Preceptor and Learning Experience evaluations must be completed by the last day of the learning experience.

Appendix A

Resident Project Timeline

General Project Timeline:
Project management is a significant component of the Residency Project. The following timeline will serve as general template for the resident to prepare his/her own individual timeline and project deadlines.

July 1st - August 15th: The resident, in conjunction with his/her Residency Program Director/Coordinator, and/or potential project preceptor(s), will identify a residency project. A written summary of the project’s goals, methods, and anticipated impact on services signed by the project preceptor must be submitted to his/her residency director no later than August 15th. (See attached form). Earlier submission is encouraged. If changes are needed, comments will be returned to the resident no later than two weeks from receipt of the proposal.

September 1st - October 1st: The resident will submit an application to the Main Line Health IRB for review and approval of their project. Pending approval, the resident will commence/continue working on their project; or should a project be denied, the resident will work with the project coordination and Residency Director to make the appropriate changes to attain approval or if necessary, select an alternate project. The resident is responsible for developing a personal project timeline to be reviewed and submitted to the project advisor and/or the Residency Director by: September 15th. The project timeline will include specific time points for data collection, data analysis and presentation preparation.) Additionally, during this time period, the resident will prepare an abstract, pertinent to the study, for application to the ASHP Midyear Residency Poster Session (refer to the ASHP website for specific deadline.) All abstracts must be submitted to the project coordinator and/or RAC for review at least 2 weeks prior to the final ASHP deadline.

October 1st - March 15th: The resident will work within his/her individual timeline to complete data collection, data analysis, and final project summaries. Status reports from the resident and the project preceptor should be completed and presented to the Residency Director and RAC Committee as part of the midpoint evaluation.

March 15th – April 15th: In preparation for the Eastern States Conference presentation, the resident will present a study synopsis with project results to the RAC for review. Prior to the Eastern States, the resident will present, in full, at least one oral presentation of their project to the RAC for final review and approval. During this time, consideration should be given to presenting study results to the Paoli Hospital division/clinical area which may be most closely involved in the study or impacted by the study results. Completed projects which require recommendation for an operational change, formulary addition or deletion, implementation or medication guideline or restriction, or treatment protocol implementation) will need to be presented to the Main Line Health Pharmacy and Therapeutics Committee for final approval.

Project Completion:
The project will be considered complete when the stated objectives have been met. A residency certificate will not be awarded until the project is completed. A final summary of the residency project in manuscript style will need to be submitted to the Residency Program Director to fulfill residency requirements.

Resident 1 Assignment Deadlines 2016-2017

Rotation 1: Pharmacy Practice (7/1/16-8/20/16)
- Resident Self-Assessments Due—7/8, 7/15, 7/22, 7/29, 8/5, 8/12, 8/19/16
- Summative Evaluation – 8/19/16
- Evaluation of Preceptor and Experience – 8/19/16
- Rotation Hand-off – 8/19/16

Rotation 2: Internal Medicine (8/21/16-9/24/16)
- Summative Evaluation – 9/23/16
- Evaluation of Preceptor and Experience – 9/23/16
- Rotation Hand-off – 9/23/16

Rotation 3: Hematology/Oncology Elective (9/25/16-10/22/16)
- Summative Evaluation – 10/21/16
- Evaluation of Preceptor and Experience – 10/21/16
- Rotation Hand-off – 10/21/16

Rotation 4: Critical Care (10/23/16-11/26/16)
- Summative Evaluation – 11/25/16
- Evaluation of Preceptor and Experience – 11/25/16
- Rotation Hand-off – 11/25/16

Rotation 5: ASHP Midyear & Projects (11/21/15-12/24/16)
- Staff In-services scheduled

Rotation 6: Pharmacy Administration (12/25/16-1/28/17)
- Summative Evaluation – 1/27/17
- CPT due at end of rotation
- Evaluation of Preceptor and Experience – 1/27/17
- Rotation Hand-off – 1/27/17

Rotation 7: ED Pharmacy (1/29/17-3/4/17)
- Formative Assessments Due 2/3, 2/10, 2/17, 2/24
- Resident Self-Assessments Due – 2/3, 2/10, 2/17, 2/24, 3/3/17
