NUANCE
Dragon Medical Network Edition to Dragon Medical One Command Comparison

WORK EFFICIENTLY – DMNE and DMOne
* You can "select" the text and record new text
* Use your voice instead of keyboard or mouse
* Place cursor in middle of text and record new text
* Say "what can I say" for a list of available commands
* Use hotkeys or microphone buttons

TIPS – DMNE and DMOne
* If single words are not being recognized, delete the whole phrase and say it again
* Say "open settings" to configure hotkeys and microphone buttons
* Pause before and after each command
* Remember to correct using Dragon rather than typing corrections
* Say "exit Dragon" or close Dragon to save profile

HIDDEN DICTATION BOX – DMNE
* Press the "stop/play" button twice on the PowerMic to open the hidden dictation box
* Dictate text, click cursor in EHR
* Press the Transfer Text button on the PowerMic

ANCHORING - DMOne
* "anchor speech focus" allows the user to place the cursor where they want the dictation to go, then move around to other applications (labs, x-rays, etc.)
* "release speech focus"
* "show anchored application" brings the anchored application back into focus
