

### CREDIT DESIGNATION

This activity has been submitted to the American Board for Transplant Certification, American Nephrology Nurses Association, and Pennsylvania State Board of Social Workers to award 5.0 CEUs for nurses, social workers, and dialysis patient care technicians. The Pennsylvania State Nurses Association is accredited as an approver of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

### CONFLICT OF INTEREST

Faculty and all others who have the ability to control the content of continuing education activities sponsored by Main Line Health are expected to disclose to the audience whether they do or do not have any real or apparent conflict(s) of interest or other relationships related to the content of their presentation(s).

### LOCATION AND DIRECTIONS

Lankenau Medical Center | 100 East Lancaster Avenue  
Annenberg Center, Rooms 101 A, B, and C | Wynnewood, PA 19096

For directions, go to [mainlinehealth.org/Lankenau](http://mainlinehealth.org/Lankenau) and click on "Patients & Visitors."

### PARKING

Free parking is available in parking garage A. Bring parking token for validation.

### QUESTIONS

For all questions or for special needs, please contact Cara Morasco at 484.476.3135.

LANKENAU KIDNEY TRANSPLANT PROGRAM  
2018 SYMPOSIUM

UPDATES IN  
TRANSPLANTATION  
CARE

Friday, April 27, 2018  
Lankenau Medical Center

CONTINUING EDUCATION PROGRAM

LANKENAU KIDNEY TRANSPLANT PROGRAM | 2018 SYMPOSIUM

# UPDATES IN TRANSPLANTATION CARE

Friday, April 27, 2018  
8:00 AM to 4:00 PM  
Lankenau Medical Center

SUBMITTED FOR APPROVAL FOR 5.0 CEUs FOR NURSES, SOCIAL WORKERS,  
AND DIALYSIS PATIENT CARE TECHNICIANS

### WHO SHOULD ATTEND

Nurses, social workers, dialysis center staff, transplant professionals, and other health professionals involved in the care of patients before and after kidney transplantation

Main Line Health®

# UPDATES IN TRANSPLANTATION CARE

Annenberg Conference Center  
Rooms 101 A, B, and C  
Lankenau Medical Center  
100 East Lancaster Avenue  
Wynnewood, PA 19096

## PROGRAM DESCRIPTION

This educational symposium will address emerging issues in kidney transplantation, including impacts of the opioid crisis and hepatitis C epidemic on availability of quality donor organs and clinical implications of increased-risk organ transplantation. Safe pain management in patients with failing kidneys, prior opioid use and obesity risks in kidney transplantation, indications for kidney-pancreas transplantation, and special needs of patients with delayed graft function also will be reviewed.

The program will include presentations by members of the organ transplant teams at Lankenau Medical Center and Thomas Jefferson University Hospitals, as well as personal accounts from a panel of individuals who have undergone kidney transplantation and living kidney donation at Lankenau Medical Center.

## REGISTRATION

To register, visit: [mainlinehealth.org/events](http://mainlinehealth.org/events)

By March 31: \$20 | After March 31: \$30

Jefferson Transplant Institute

Jefferson Transplant Institute is a partnership between Thomas Jefferson University Hospitals and Main Line Health. The partnership merges Main Line Health's and Jefferson's expertise and resources in transplantation care and offers a new model of shared care for patients needing organ transplantation.

## AGENDA AND SPEAKERS

- 8:00 AM** **Registration and Continental Breakfast**
- 8:45 AM** **Welcome**  
**Keith Superdock, MD, FACP**  
*Medical Director, Lankenau Kidney Transplant Program*
- 9:00 AM** **The Opioid Crisis and Hepatitis C Epidemic: A New Era of Organ Donation and Transplantation**  
**Tim Snyder, CPTC**  
*Advanced Practice Coordinator/Clinical Coordinator, Gift of Life Donor Program*
- 10:00 AM** **Helping Patients Understand the Facts About Accepting Increased-Risk Donor Organs**  
**Kristina Bryson, RN, CCTC**  
*Transplant Coordinator, Lankenau Kidney Transplant Program*
- 10:30 AM** **Living Kidney Donation: Starting the Conversation**  
**Madelynn Maleski, RN, CPTC, CCTC**  
*Living Donor Coordinator, Lankenau Kidney Transplant Program*
- 11:00 AM** **Opioid Use in Kidney Transplant Patients and Living Donors: Risks and Recommendations**  
**Donna Stecher, PharmD**  
*Transplant Pharmacist, Lankenau Kidney Transplant Program*
- 11:30 AM** **Lunch**
- 12:15 PM** **Does This Patient Need a Kidney, a Pancreas, or Both?**  
**Ashesh Shah, MD, FACS**  
*Transplant Surgeon, Jefferson Transplant Institute*
- 12:45 PM** **Obesity and Kidney Transplantation: Why Weight Matters**  
**Carlo Ramirez, MD, FACS**  
*Surgical Director, Lankenau Kidney Transplant Program  
Transplant Surgeon, Jefferson Transplant Institute*
- 1:30 PM** **Patient Panel: Personal Experiences with Kidney Transplantation**  
**Cassidy Shaver, MSW, LSW**  
*Transplant Social Worker, Lankenau Kidney Transplant Program*
- 2:30 PM** **Not Your Routine Dialysis Session: Managing Dialysis in Patients with Delayed Graft Function**  
**Keith Superdock, MD, FACP**
- 3:30 PM** **Closing Remarks**  
**Keith Superdock, MD, FACP**

## LEARNING OBJECTIVES

At the conclusion of this program, the participant should be able to:

Explain how the opioid epidemic is impacting organ donation and transplantation

State the difference between donor-derived viral exposure and donor-derived viral infection

List three characteristics that would cause an organ donor to be classified as increased risk

Describe the screening process for detecting transmissible disease in donors and the follow-up screenings for recipients who accept increased-risk organs

Educate hepatitis C virus (HCV)-positive patients about the potential advantages of accepting an HCV-positive organ

Explain the rationale for vaccinating all potential organ transplant recipients against hepatitis B virus (HBV) infection

List three potential complications of kidney transplantation in a patient who is morbidly obese

State the clinical indications for pancreas transplant before, pancreas transplant after, and pancreas transplant at the same time as kidney transplant

List two potential life-threatening complications after pancreas transplantation

Educate patients with chronic kidney disease about safer options for pain management

Identify three post-transplant complications linked with opioid use before kidney transplantation

Define delayed graft function and identify three causes of delayed graft function after kidney transplantation

Discuss dialysis implications in patients with delayed graft function after kidney transplantation

List two pathways to and three benefits of living donor transplantation

Describe what is meant by "altruistic living organ donation"
