

Riddle Hospital's Modernization Project: Building for Our Future

Riddle Hospital's Campus Master Plan will mark the most significant facility improvement in its existence and among the largest capital investments in Main Line Health history. The modernization project will include a new patient pavilion to be completed in 2023, as well as renovations to existing care units, support areas and parking. Once completed, the hospital will be equipped with all private patient rooms, contemporary facilities and advanced technology to support the evolving needs of the community.
