You have scheduled a genetic counseling appointment with the Cancer Risk Assessment and Genetics Program. Most insurance plans cover genetic counseling. If you have specific questions about coverage for your genetic counseling appointment, contact your insurance directly to inquire about coverage for CPT code 96040.

To better prepare for your appointment:

- Complete attached personal history questionnaire (also found on our website) and bring to your appointment.
- Try to inquire about as many of your relatives as possible (including children, siblings, aunts, uncles, cousins, grandparents, great grandparents, great aunts/uncles). The genetic counselor will ask you who had cancer, what type of cancer, and at what age it was diagnosed. It’s okay if you cannot get all this information, but whatever you find will help the genetic counselor with your care.
- Genetic testing is optional. Most insurances cover genetic testing costs, when indicated. If you are a candidate for genetic testing, test options, insurance coverage and out of pocket costs (if any) will be reviewed with you at the appointment. You may give a blood or saliva sample for genetic testing at the time of your appointment.
- For all appointment changes (cancellations, re-scheduling), please call the scheduling number at 484-580-1800. For any other questions, please call the Cancer Risk Assessment and Genetics Program directly at 484-565-GENE.
