Thank you for scheduling a genetic counseling appointment with the Cancer Risk Assessment and Genetics Program.

PLANNING FOR YOUR GENETIC COUNSELING APPOINTMENT:

- Most insurances cover genetic counseling. If you have specific questions about coverage, contact your insurance directly to inquire about coverage for CPT code 96040.
- Genetic testing is optional. Most insurances cover genetic testing costs, when indicated. Genetic test options, insurance coverage and out of pocket costs (if any) will be reviewed with you at the appointment. You may give a blood or saliva sample for genetic testing at the time of your appointment if you choose to have testing. You may choose to return to the program for a follow up appointment to review your results.
- For us to better serve you at your appointment, learn as much as possible about cancers in your family members (e.g., children, siblings, aunts, uncles, cousins, grandparents, great grandparents). The genetic counselor will ask you who had cancer, what type of cancer, and at what age it was diagnosed.
